Ownership of Board of Commissioners

The Board of Commissioners has disclosed its ownership in both the Bank and other banks and other companies domiciled both at home and abroad. The Board of Commissioners' share ownership can be seen in the table below.

Komisaris Independen

Komisaris Independen adalah anggota Dewan Komisaris yang tidak memiliki hubungan keuangan, kepengurusan, kepemilikan saham dan/atau hubungan keluarga dengan anggota Direksi, anggota Dewan Komisaris lain dan/atau pemegang saham pengendali, atau hubungan dengan bank yang dapat mempengaruhi kemampuan yang bersangkutan untuk bertindak independen.

Komisaris Independen Bank ditetapkan paling kurang 50% (lima puluh persen) dari jumlah anggota Dewan Komisaris. Berdasarkan Akta Risalah RUPST nomor 09 tanggal 06 April 2021, jumlah anggota Dewan Komisaris bank **bjb** yang efektif 66,7% dari jumlah Dewan Komisaris. Dengan demikian, jumlah Komisaris Independen tersebut telah memenuhi ketentuan yang ditetapkan Otoritas Jasa Keuangan.

Independent Commissioners

Independent Commissioner was a member of the Board of Commissioners who had no financial, management, share ownership and/or family relationship with members of the Directors, other members of the Board of Commissioners and/or controlling shareholders, or a relationship with a bank that might affect the ability of the person concerned to act independently.

The Bank's Independent Commissioners were determined to be at least 50% (fifty percent) of the total members of the Board of Commissioners. Based on the Deed of Minutes of the AGMS number 09 dated April 6, 2021, the number of effective members of the Board of Commissioners of bank **bjb** was 66.7% of the total number of the Board of Commissioners. Thus, the number of Independent Commissioners had complied with the provisions set by the Financial Services Authority.

Pernyataan Komite Audit Atas Efektivitas SPI dan Manajemen Risiko

Sistem Pengendalian Internal dan Manajemen Risiko di bank **bjb** telah diimplementasikan dengan tujuan untuk memastikan aktivitas manajemen dalam mencapai tujuan organisasi berjalan secara efektif dan efisien. Efektivitas SPI tercermin pada pencapaian pemenuhan tingkat kepatuhan bank terhadap berbagai peraturan-peraturan yang berlaku baik yang bersifat internal maupun eksternal yang ditetapkan oleh Otoritas Jasa Keuangan, efektivitas dan efisiensi kegiatan operasional bank, penerapan manajemen risiko pada semua unit organisasi, ketersediaan informasi dan laporan keuangan secara lengkap, tepat waktu dan akurat, sehingga kegiatan bank berjalan dengan lancar dan berkesinambungan (*sustainable*) dari waktu ke waktu.

Statement of the Audit Committee on the Effectiveness of Spi and Risk Management

The Internal Control and Risk Management System at bank **bjb** was implemented with the aim of ensuring that management activities in achieving organizational goals run effectively and efficiently. The effectiveness of SPI was reflected in the achievement of compliance with the level of bank compliance with various applicable internal and external regulations set by the Financial Services Authority, effectiveness and efficiency of bank operational activities, implementation of risk management in all organizational units, availability of information and financial reports on a regular basis complete, timely and accurate, so that bank activities run smoothly and sustainably from time to time.

Dewan komisaris selalu melakukan pemantauan dan pengawasan terhadap pelaksanaan sistem pengendalian internal dan manajemen risiko secara umum termasuk berbagai kebijakan yang ditetapkan Direksi, untuk memastikan proses pengendalian internal bank dan penerapan manajemen risiko bank berjalan secara efektif dan efisien. Dalam menjalankan tugasnya, Dewan Komisaris dibantu oleh Komite Audit dan Komite Pemantau Risiko.

Pada pelaksanaannya, Direksi, Unit-unit kerja terkait, dan Satuan Kerja Audit Internal (SKAI) selalu melakukan pemantauan secara rutin dan berkesinambungan terhadap pelaksanaan pengendalian internal bank dengan membandingkan sasaran dengan realisasi. Risiko-risiko utama bank telah menjadi perhatian utama agar dapat diidentifikasi secara dini dengan menyiapkan berbagai mitigasi untuk mengatasi risiko-risiko tersebut. Satuan Kerja Audit Internal yang merupakan organ organisasi vital bank dengan didukung sumber daya yang kompeten dengan sertifikasi yang memadai, secara efektif dan efisien menjalankan fungsi audit internal terhadap keseluruhan unit-unit organisasi baik di pusat maupun cabang dan selalu menyampaikan hasil temuan audit kepada Komite Audit dan Direksi yang membidangi agar dapat ditindaklanjuti secara cepat dan tepat. Komite Audit sebagai organ yang membantu Komisaris selalu melakukan pemantauan atas efektivitas jalannya Audit Internal dan memastikan bahwa pelaksanaan Audit internal berjalan sesuai dengan rencana yang ditetapkan setiap awal tahun.

Secara umum komitmen secara menyeluruh dan berkesinambungan dalam melaksanakan sistem pengendalian internal dan manajemen risiko Bank telah dijalankan dengan baik dan memadai oleh seluruh jajaran manajemen, dalam hal ini direksi dan pejabat Bank, serta seluruh karyawan Bank terutama unit-unit terkait dengan pemantauan intensif yang dilakukan oleh Dewan Komisaris dari waktu ke waktu secara berkesinambungan.

Komite Nominasi dan Remunerasi

Komite Nominasi dan Remunerasi merupakan salah satu alat kelengkapan Dewan Komisaris yang berfungsi untuk membantu Dewan Komisaris dalam melaksanakan fungsi dan tugasnya di bidang yang berkaitan dengan nominasi dan remunerasi terhadap anggota Direksi dan Dewan Komisaris. Peraturan Otoritas Jasa Keuangan mewajibkan bank untuk membentuk Komite Nominasi dan Remunerasi sebagai penerapan *good corporate governance* sehingga bank dapat dikelola berlandaskan prinsip-prinsip keterbukaan, akuntabilitas, pertanggungjawaban, independensi dan kewajaran sehingga pengelolaan bank dapat dipertanggungjawabkan.

Dasar Pembentukan Komite Nominasi dan Remunerasi

Komite Nominasi dan Remunerasi Perseroan dibentuk berdasarkan:

1. Peraturan Otoritas Jasa Keuangan nomor 34/POJK.04/2014 tanggal 08 Desember 2014 tentang Komite Nominasi dan Remunerasi Emiten atau Perusahaan Publik

The Board of Commissioners always monitored and supervised the implementation of the internal control system and risk management in general, including the various policies set by the Directors, to ensure that the bank's internal control process and the implementation of bank risk management run effectively and efficiently. In carrying out its duties, the Board of Commissioners was assisted by the Audit Committee and the Risk Monitoring Committee.

In practice, the Directors, related work units, and the Internal Audit Unit (SKAI) always carried out regular and continuous monitoring of the implementation of bank internal control by comparing targets with realization. The main bank risks became a major concern so that they could be identified early by preparing various mitigations to overcome these risks. The Internal Audit Unit, as a vital organizational organ of the bank and supported by competent resources with adequate certification, effectively and efficiently carried out the internal audit function of all organizational units both at the head and branches and always submitted audit findings to the Audit Committee and Directors in charge so that it could be followed up quickly and precisely. The Audit Committee as an organ assisting the Commissioners always monitored the effectiveness of the Internal Audit and ensured that the implementation of the internal audit went according to the plan set at the beginning of each year.

In general, the overall and continuous commitment to implementing the Bank's internal control and risk management system had been carried out properly and adequately by all levels of management, in this case the Bank's directors and officers, as well as all Bank employees, especially units related to intensive monitoring carried out by the Bank Board of Commissioners from time to time on an ongoing basis.

1. Ditetapkannya suatu struktur pengendalian yang tepat, yang menjelaskan aktivitas pengendalian disetiap tingkatan bisnis. Hal ini mencakup *review* oleh manajemen puncak, aktivitas pengendalian yang tepat untuk berbagai unit kerja, pengendalian fisik, pengecekan mengenai kepatuhan terhadap limit-limit dan tidak lanjut atas ketidakpatuhan, sistem yang terkait dengan proses persetujuan dan otorisasi serta sistem verifikasi dan rekonsiliasi.
2. Adanya pemisahan tugas yang benar/tepat dan tidak ada penugasan yang berbenturan kepentingan/tanggung jawab. Area yang berpotensi terjadinya benturan kepentingan harus diidentifikasi, diminimalisir dan harus senantiasa dipantau.

Information and Communication

Mencakup perolehan dan penyampaian informasi yang relevan sebagai dasar untuk pengambilan keputusan, termasuk mengkomunikasikan secara detail dan tepat waktu sehingga dapat dilaksanakan secara efektif dan efisien, meliputi:

1. Data finansial, operasional dan kepatuhan yang komprehensif serta informasi pasar mengenai kejadian maupun kondisi yang relevan untuk pengambilan keputusan. Informasi tersebut harus dapat dipercaya, tepat waktu, dapat diakses dan dibuat dalam format yang konsisten.
2. Sistem informasi yang handal yang mencakup seluruh aktivitas Bank yang penting.
3. Saluran komunikasi yang efektif untuk memastikan bahwa seluruh karyawan memahami dan mentaati kebijakan dan

that the delegation of responsibility has been implemented effectively.

4. Establishing appropriate internal control policies and monitoring the adequacy and effectiveness of internal control systems.

Responsibilities of Directors and Senior Management:

To establish high ethical and integrity standards and to develop a culture that emphasizes and demonstrates to all employees about the importance of internal control. Every employee in the organization needs to know each other's role in internal control.

Risk Assessment

Identifying and analyzing the risks faced in objective achievement of the company and determining how a risk should be managed, including an effective internal control system that can identify and study the risks can materially affect the objective achievement of the Bank. The study must cover all risks that the Bank faces in consolidation (including credit risk, liquidity risk, operational risk, legal risk, strategic risk, compliance risk and reputational risk).

Control Activities

includes policies, procedures and practices to ensure that the directors' directives/policies are well executed and consistent, including:

1. Set up a precise control structure, which explains the controlling activity at every business level. This includes reviews by top management, appropriate control activities for a variety of work units, physical control, reduction in compliance with limits and further limits on non-compliance, systems related to approval and authorization processes and verification and reconciliation systems.
2. The separation of the right/right tasks and no assignment in conflict of interest/responsibilities. Areas of potential conflicts of interest must be identified, minimized and must always be monitored.

Information and Communication

Includes obtaining and delivering relevant information as the basis for decision making, including communicating in detail and timely manner so that it can be implemented effectively and efficiently, including:

1. Comprehensive financial, operational and compliance Data as well as market information on events and relevant conditions for decision making. Such information must be trustworthy, timely, accessible and created in a consistent format.
2. Reliable information system that covers all the important Bank activities.
3. Effective communication channels to ensure that all employees understand and adhere to the policies and procedures

prosedur yang terkait dengan tugas dan tanggung jawab masing-masing dan bahwa informasi diterima oleh karyawan yang tepat.

Monitoring

Proses untuk menilai kualitas pengendalian intern yang dilakukan secara berkesinambungan untuk memastikan bahwa pengendalian berjalan sesuai dengan ketentuan, mencakup:

1. Pemantauan yang berkesinambungan terhadap efektivitas pengendalian intern serta pemantauan terhadap risiko-risiko kunci harus merupakan bagian dari aktivitas harian serta harus dievaluasi secara periodik oleh pelaksana bisnis dan audit intern.
2. Pelaksanaan audit yang komprehensif terhadap sistem pengendalian intern oleh auditor intern yang independen, terlatih dan kompeten, yang hasilnya harus dilaporkan langsung kepada Direktur Utama, Komite Audit dan manajemen senior terkait.
3. Identifikasi kekurangsempurnaan dalam pengendalian intern oleh karyawan, pelaksana bisnis ataupun audit intern yang harus segera dilaporkan ke tingkat manajemen dan ditanggapi. Kekurangan yang signifikan harus dilaporkan kepada Manajemen Senior dan Direksi.

Tinjauan atas Efektivitas Sistem Pengendalian Internal

Kelemahan dalam pengendalian intern, baik yang diidentifikasi oleh satuan kerja operasional (*risk taking unit*), SKAI maupun pihak lainnya, segera dilaporkan dan menjadi perhatian pejabat atau Direksi yang berwenang. Kelemahan pengendalian intern yang material juga dilaporkan kepada Dewan Komisaris. Langkah-langkah perbaikan yang dilakukan Bank dalam rangka memperbaiki kelemahan pengendalian intern, antara lain:

1. Setiap laporan mengenai kelemahan dalam pengendalian intern atau tidak efektifnya pengendalian risiko Bank segera ditindaklanjuti oleh Dewan Komisaris, Direksi dan pejabat eksekutif terkait;
2. SKAI melakukan *review* atau langkah pemantauan lainnya yang memadai terhadap kelemahan yang terjadi dan segera melaporkan kepada Direktur Utama, Dewan Komisaris dan Komite Audit, dalam hal masih terdapat kelemahan yang belum diperbaiki atau tindakan korektif yang belum ditindaklanjuti;
3. Untuk menentukan bahwa seluruh kelemahan segera ditindaklanjuti maka harus ada kesadaran dari unit terkait untuk segera mengambil langkah perbaikan. Direksi dan Dewan Komisaris harus menerima laporan secara berkala berupa ikhtisar mengenai hasil identifikasi seluruh permasalahan dalam pengendalian intern.

Berdasarkan evaluasi yang telah dilakukan selama tahun 2021 menunjukkan bahwa sistem pengendalian internal pada bank **bjb** telah memadai.

Sistem Manajemen Risiko

Sistem manajemen risiko yang efektif merupakan salah satu komponen yang penting dalam manajemen bank dan landasan untuk menjalankan organisasi bank dengan sehat, aman dan baik. Sistem manajemen risiko akan mengarahkan aktivitas pada misi dan tujuan Bank yang sudah ditetapkan, yaitu untuk mencapai target laba jangka panjang yang terus meningkat dan berkesinambungan, serta meningkatkan alokasi permodalan secara optimal yang mendukung aktivitas operasional yang sehat. Sistem dimaksud akan membantu manajemen dalam melakukan pemantauan terhadap ketentuan dan hukum yang berlaku,

Statement of The Directors and/or The Board of Commissioners on The Adequacy of The Internal Control System

Internal Audit Unit, the Directors, the Board of Commissioners and the Audit Committee have monitored the overall effectiveness of the implementation of internal control. Internal Audit Unit, the Directors, the Board of Commissioners and the Audit Committee monitor and evaluate the adequacy of the internal control system in relation to changes in internal and external conditions and must increase the capacity of the internal control system so that its effectiveness can be improved. Internal Audit Unit, the Directors, the Board of Commissioners and the Audit Committee consider that the internal control system is adequate.

Risk Management

Basic Risk Management Implementation

In the application of risk management, bank **bjb** is always obedient and obedient to the prevailing regulations and legislation in Indonesia with reference to:

1. OJK regulation No. 4/POJK.03/2016 On Health Level Assessment of Commercial Banks.
2. OJK regulation No. 18/POJK.03/2016 and circular of OJK No. 34/SOJK.03/2016 on The Application of Risk Management for Commercial Banks.
3. Circular letter of OJK No. 34/SEOJK.03/2016 concerning The Implementation of Risk Management for Commercial Banks.
4. OJK regulation No. 38/POJK.03/2017 on The Implementation of Consolidated Risk Management for Banks Controlling for Subsidiaries.
5. Circular letter of OJK No. 43/SEOJK.03/2017 on The Principles of Prudence and Report in Order to Consolidate Risk Management for The Bank Controlling The Subsidiary Company.
6. OJK regulation No. 17/POJK.03/2014 On The Implementation of Integrated Risk Management for Financial Conglomerations.
7. OJK Circular letter No. 14/SEOJK.03/2015 concerning The Implementation of Integrated Risk Management for Financial Conglomerations.

Risk Management System

An effective risk management system is one of the essential components of Bank management and the foundation for running a healthy, safe and wellorganized bank organization. Risk management system will direct the activity to the mission and objectives of the Bank that have been established, namely to achieve the long-term profit target that continues to increase and continuously, and increase the allocation of capital optimally that supports Healthy operational activities. The system will assist management in monitoring the provisions and applicable laws, policies, plans, provisions and internal procedures. In addition, the

kebijakan, rencana, ketentuan serta prosedur internal. Di samping itu, sistem manajemen risiko juga dapat mengurangi risiko sistemik (*systemic risk*) yang dapat merugikan bank baik secara material maupun immaterial. Dalam mewujudkan penerapan manajemen risiko yang efektif, bank **bjb** menerapkan pendekatan *Three Lines of Defense* sebagai mekanisme pertahanan secara berlapis untuk mengelola dan menerapkan kerangka kerja manajemen risiko, yakni:

1. **Pertahanan Tingkat Pertama**

Risk Taking Unit berperan sebagai pertahanan tingkat pertama dan bertanggung jawab untuk mengidentifikasi, mengevaluasi, mengendalikan dan memitigasi risiko dalam aktivitas operasional. *Risk Taking Unit* memiliki tanggung jawab yang utama atas pengelolaan eksposur risiko dalam aktivitas sehari – hari.

2. **Pertahanan Tingkat Kedua**

Satuan Kerja Manajemen Risiko (SKMR) berperan sebagai unit kunci dalam memberikan pertahanan tingkat kedua melalui fungsi pemantauan yang independen. SKMR telah melakukan *review* atas kelengkapan dan keakuratan identifikasi, pengukuran, pemantauan, pengendalian dan pelaporan risiko, serta atas kecukupan skenario mitigasi yang diusulkan oleh unit kerja operasional.

3. **Pertahanan Tingkat Ketiga**

Fungsi Internal Audit melakukan penilaian terhadap kecukupan kebijakan, strategi dan kerangka Manajemen Risiko serta efektivitas pengendalian internal dalam rangka memberikan *assurance* yang independen dan objektif.

risk management system can also reduce systemic risk (caused risk) which can harm the bank either materially or immaterial. In realizing effective implementation of risk management, bank **bjb** adopted the Three Lines of Defense approach as a multi-layered defense mechanism to manage and implement a risk management framework, namely:

1. **First Level defense**

The risk taking Unit acts as a first-rate defense and is responsible for identifying, evaluating, controlling and mitigate risks in operational activity. Risk Taking Unit has the main responsibility for managing risk exposure in daily activities.

2. **Second Level defense**

The Risk Management Unit (SKMR) serves as the key unit in providing second-level defense through an independent monitoring function. SKMR has reviewed the completeness and accuracy of identification, measurement, monitoring, control and risk reporting, and for the adequacy of mitigation scenarios proposed by the Operational working unit.

3. **Third Level defense**

The Internal Audit function performs assessment of policy adequacy, strategy and risk management framework and effectiveness of internal control in order to provide independent and objective assurance.

Penetapan *Risk Appetite*, *Risk Tolerance* dan *Risk Limit*

Risk Appetite, *Risk Tolerance*, dan *Risk Limit* yang telah ditetapkan oleh bank bertujuan untuk menunjang pencapaian strategi bisnis Bank dengan tingkat risiko yang dapat diterima. Dalam implementasinya, akan dilakukan pemantauan secara berkala atas tingkat eksposur risiko aktual terhadap posisi pencapaian strategi bisnis Bank. Adapun aspek tata kelola (*governance*) terdiri dari tiga aspek, antara lain:

1. *Strategic Level*

Strategic Level merupakan jenjang kewenangan yang melekat pada Direksi melalui Komite Manajemen Risiko. Direksi berwenang menentukan selera risiko yang diinginkan (*risk appetite*) selaras dengan strategi bisnis bank. Di samping itu, Direksi juga berwenang untuk memberikan persetujuan atas besaran nilai *Risk Tolerance* dan nilai *Risk Limit* dengan merujuk pada *Risk Appetite* yang telah ditentukan.

2. *Tactical Level*

Pengelolaan *Risk Appetite*, *Risk Tolerance*, dan *Risk Limit* pada jenjang *Tactical Level* merupakan kewenangan Divisi Manajemen Risiko. Mengembangkan metodologi *risk tolerance* untuk setiap jenis risiko secara *bankwide*.

3. *Operational Level*

Operational Level merupakan kewenangan dan dibentuk oleh setiap *Risk Taking Unit* dimana perannya adalah dalam menentukan besaran *Risk Limit* yang dapat diterima dan hasilnya dikoordinasikan dengan Divisi Manajemen Risiko. Besaran *Risk Limit* yang diusulkan, selanjutnya disampaikan kepada Divisi Manajemen Risiko untuk dilakukan *review* terkait metode perhitungan serta dalam rangka melakukan sinkronisasi dengan hasil perhitungan *Risk Tolerance* maupun *Risk Appetite*.

Profil Risiko dan Pengelolaannya

Terdapat 8 jenis risiko yang dihadapi Perseroan dan harus dikelola dengan baik. Kedelapan jenis risiko tersebut disebut *inherent risk* yang meliputi: risiko kredit, risiko likuiditas, risiko pasar, risiko operasional, risiko strategik, risiko kepatuhan, risiko hukum dan risiko reputasi. Adapun penjelasan mengenai risiko-risiko tersebut dan upaya pengelolaannya adalah sebagai berikut:

1. Risiko Kredit

Terkait proses identifikasi, pengukuran, pemantauan, dan pengendalian risiko kredit, bank **bjb** telah melakukan hal-hal sebagai berikut:

- Bank secara berkala melakukan analisa menyeluruh atas aspek internal dan eksternal bank melalui *Root Cause of Credit Risk* (RCCR) yang berisi analisa penyebab penurunan kolektibilitas debitur yang berdampak pada timbulnya *Non Performing Loan* (NPL).
- Bank melakukan perhitungan *Stress Test* Risiko Kredit yang disampaikan kepada Direksi dan Dewan Komisaris. Pelaksanaan *stress test* dilakukan dengan pendekatan

Determination of *Risk Appetite*, *Risk Tolerance* and *Risk Limit*

Risk Appetite, *Risk Tolerance*, and *Risk Limit* that have been set by the bank aims to support the achievement of Bank business strategy with an acceptable level of risk. In the implementation, monitoring will be conducted periodically on the level of actual risk exposure to the position of achievement of the bank's business strategy. Aspects of governance consist of three aspects namely:

1. Strategic Level

The Strategic Level is a level of authority attached to the directors through the Risk Management Committee. The Directors is authorized to determine risk appetite in accordance with the bank's business strategy. In addition, the Directors is also authorized to give approval for the magnitude of Risk Tolerance and Risk Limit value by referring to the specified Risk Appetite.

2. Tactical Level

Risk Limit in the Tactical Level are the authority of the Risks Management division. Developing risk tolerance methodology for each bank wide risk type.

3. Operational Level

Operational Level is the authority and is formed by each Risk Taking Unit where the role is to determine the magnitude of Risk Limit acceptable and the result is coordinated with the risk Management division. The risk Limit is proposed, hereinafter presented to the Risks Management Division for review regarding calculation method and in order to synchronize with Risk Tolerance and Risk Appetite calculation.

Risk Profile and Management

There are 8 (eight) types of risks faced by bank **bjb** and must be managed properly. These eight types of risks are called *inherent risk* which include credit risk, liquidity risk, market risk, operational risk, strategic risk, compliance risk, legal risk and reputational risk. The explanations of these risks and management efforts are as follows:

1. Credit Risk

Regarding the process of identifying, measuring, monitoring, and controlling credit risk, bank **bjb** has carried out the following:

- The bank periodically conducts a thorough analysis of internal and external aspects of the bank through the Root Cause of Credit Risk (RCCR) which contains the analysis of the cause of the borrower's collectibility decrease in the occurrence of Non Performing Loan (NPL).
- The Bank calculates the Credit Risk Stress Test which is submitted to the Directors and the Board of Commissioners. The implementation of stress tests is

portfolio level dan bertujuan untuk menghitung pengaruh kondisi *shock* makro ekonomi terhadap peningkatan NPL secara *bankwide*. Pelaksanaan perhitungan menggunakan *satellite model* yang meliputi baik kredit produktif maupun kredit non-produktif pada seluruh sektor ekonomi. *Satellite model* tersebut merupakan perhitungan regresi *multiple* yang menghubungkan kondisi makro ekonomi sebagai *independent variable* dan NPL sebagai *dependent variable*.

- c. Selanjutnya secara berkala disusun laporan perkembangan eksposur risiko kredit yang disusun dalam rangka mitigasi risiko dan sebagai upaya perbaikan segera sesuai perkembangan tingkat risiko. Pemantauan atas kualitas portofolio kredit yang dilaporkan secara berkala kepada Direksi melalui hal-hal sebagai berikut:
 - *Review* dan evaluasi berkala melalui pelaksanaan *business review* termasuk diantaranya pembahasan mengenai posisi serta kualitas portofolio kredit.
 - Kaji ulang atas potensi risiko dalam aktivitas perkreditan yang dilaporkan secara independen oleh Satuan Kerja Manajemen Risiko.

2. Risiko Pasar

Adapun upaya pengelolaan Risiko Pasar yang telah dilakukan bank **bjb** adalah sebagai berikut:

- a. Bank telah memiliki prosedur dan identifikasi risiko suku bunga banking book yang didukung oleh sistem informasi yang sangat memadai dan adanya pelaporan secara harian mengenai pergerakan nilai tukar, suku bunga, dan informasi pasar lainnya ke Direksi termasuk *over limit*.
- b. Bank telah memiliki *risk appetite*, *risk tolerance* dan *risk limit* untuk parameter risiko pasar yang ditetapkan oleh Dewan Komisaris dan Direksi.
- c. Bank melakukan proses *review* atau validasi model pengukuran risiko pasar yang dilakukan secara berkala melalui *back testing* dimana model pengukurannya masih valid sesuai hasil *back testing*. Adapun mengenai validasi dan *back testing* tersebut disusun dalam bentuk laporan VaR (*Value at Risk*) dan validasi model.
- d. Bank memiliki prosedur pemantauan limit secara harian sebagai standarisasi pemantauan Divisi Manajemen Risiko terhadap aktivitas *Dealing Room Treasury* termasuk tindak lanjut yang akan dilakukan oleh risk taking unit apabila terjadi pelampauan dan dilaporkan kepada Direksi.
- e. Bank melakukan pengendalian risiko pasar melalui *monitoring* terhadap kontrak transaksi dan penilaian kembali kredibilitas *counterparty* secara harian dan dipantau oleh *dedicated person* yang berpengalaman kemudian dalam penetapan *limit counterparty* dilakukan oleh unit kerja lain yang independen dari unit kerja bisnis sehingga proses penetapan limitnya melibatkan 4 eyes *principle*.
- f. Sebagai upaya meningkatkan informasi atas eksposur risiko pasar yang dihadapi bank, unit kerja terkait telah melaporkan eksposur risiko pasar baik secara harian

carried out using a portfolio level approach and aims to calculate the effect of macroeconomic shock conditions on bank-wide NPL increases. The calculation uses a satellite model covering both productive and non-productive loans in all economic sectors. The satellite model is a multiple regression calculation that connects macroeconomic conditions as the independent variable and NPL as the dependent variable.

- c. Further compiled reports on the progress of credit risk exposure that are arranged in order to mitigate risk and as an effort to repair immediately according to the development of risk level. Monitoring of the quality of credit portfolio reported periodically to the directors through the following matters:
 - Periodic Review and evaluation through the implementation of the business Review including the discussion on the position and quality of the credit portfolio.
 - Review of the potential risks in the crediting activity that is reported independently by the risk management Unit.

2. Market Risk

The Market Risk management efforts that have been carried out by bank **bjb** are as follows:

- a. The Bank has had procedures and identification of interest rate banking book which is supported by a very adequate information system and the daily reporting of exchange rate movements, interest rates, and other market information to the Directors including over limit.
- b. The Bank has had risk appetite, risk tolerance and risk limit for the market risk parameters established by the Board of Commissioners and Directors.
- c. The Bank performs a review or validation of the market risk measurement model conducted periodically through the back testing with the size of the model is still valid according to the results of back testing. As for the validation and back testing is compiled in the form of VaR (*Value at Risk*) and model validation.
- d. The Bank has daily limit monitoring procedures as a standardized monitoring of the risk management division of the Dealing Room Treasury activities including follow-up to the risk taking unit in the event of a disappearance and reported to the directors.
- e. The Bank conducts the control of market risk through monitoring of transaction contracts and revaluation of counterparty credibility on a daily basis and monitored by experienced dedicated person later in the determination of counterparty limit Other work units that are independent of the business work unit so that the limitation of the determination process involves 4 (four) Eyes principle.
- f. As an effort to improve the information on market risk exposures faced by banks, related work units have reported market risk exposures either daily (treasury

(*utilisasi Treasury*), mingguan (*treasury utilization report*), bulanan (analisis pengukuran risiko pasar & likuiditas), semesteran (*market risk stress test*), kepada Direksi dan pejabat eksekutif sehingga diharapkan adanya tindak lanjut perbaikan dan proses mitigasi untuk meminimalisir potensi risiko yang akan datang.

- g. Bank telah memiliki Komite ALCO sebagai perangkat organisasi dalam mendukung manajemen risiko pasar yang efektif.
- h. Dalam proses pengukuran, pemantauan yang dilakukan satuan kerja manajemen risiko melalui pelaporan atas aktivitas unit kerja Trisuri masih dilakukan secara manual dan belum tersistem namun demikian mempertimbangkan eksposur transaksi bank yang belum kompleks, potensi risiko yang dihadapi bank masih dapat termitigasi dengan baik.
- i. Terdapat proses *mark to market* secara harian terhadap transaksi *trading* bank untuk mengetahui kerugian/ keuntungan bank dan bank pun memiliki metode dalam proses *mark to market*-nya termasuk perhitungan valuasi model internal serta prosedur *contingency plan* dalam proses *mark to market*-nya apabila terjadi kondisi di luar normal yang dilakukan oleh unit kerja terkait

3. Rasio Likuiditas

Adapun upaya pengelolaan Risiko Likuiditas yang telah dilakukan bank **bjb** adalah sebagai berikut.

1. Bank melakukan analisis terhadap seluruh sumber risiko likuiditas baik dari sisi internal maupun eksternal seperti produk dan aktifitas perbankan yang mempengaruhi sumber penggunaan dana secara komprehensif, kecukupan pendanaan melalui pasar, dsb serta analisis risiko didukung dengan sistem informasi dan kecukupan data yang memadai.
2. Bank telah memiliki *risk appetite*, *risk tolerance* dan *risk limit* untuk parameter risiko pasar yang ditetapkan oleh Dewan Komisaris dan Direksi.
3. Bank telah memiliki alat pengukuran yang dapat mengkuantifikasi dan mengidentifikasi risiko likuiditas secara tepat waktu dan komprehensif berdasarkan indikator internal dan eksternal dalam *early warning indicator* berupa pengukuran untuk mengukur risiko inheren mengenai komposisi pendanaan, rasio likuiditas, proyeksi arus kas, *liquidity gap*, *scenario analysis*, dan *stress testing*.
4. Bank telah mengembangkan *Early Warning Indicator* risiko likuiditas yang merupakan indikator yang digunakan untuk memprediksi potensi krisis likuiditas di masa datang sebagai bentuk identifikasi, pengukuran, dan pemantauan risiko likuiditas secara harian yang bertujuan untuk memitigasi sejak dini apabila ada potensi krisis likuiditas di kemudian hari.
5. Bank melakukan pemantauan limit secara harian seperti limit GWM Primer, Sekunder dan excess reserve dan (AL+NAB)/NCD terhadap *threshold* yang telah ditetapkan

utilization), weekly (*treasury utilization report*), monthly (analysis of market and liquidity risk measurement), semiannual (*market risk stress test*), to the Directors and executive officials so hopefully there is a follow up to improvement and mitigation process to minimize potential risks.

- g. The Bank has had the ALCO committee as an organizational device in support of effective market risk management.
- h. In the process of measuring, monitoring conducted by the Risk Management unit through reporting on the activity of Trisuri work units is still done manually and not yet been installed but consider the exposure of uncomplicated bank transactions, the potential risk faced by banks can still be mitigated properly.
- i. There is a daily mark to market process of bank trading transactions to determine the loss/ profit of banks and banks also have methods in its mark to market process including the calculation of internal model valuation and contingency plan procedures in its mark to market process in case of normal outside conditions carried out by the working unit

3. Liquidity Risk

The Liquidity Risk management efforts that have been carried out by bank **bjb** are as follows.

1. The Bank conducts analysis of all sources of liquidity risk both from internal and external side such as products and banking activities that affect the source of the comprehensive use of funds, adequacy of funding through the market, and others and risk analysis is supported by adequate information systems and adequacy of data.
2. The Bank has had risk appetite, risk tolerance and risk limit for the market risk parameters established by the Board of Commissioners and Directors.
3. The Bank has a measurement tool that can quantify and identify the liquidity risk in a timely and comprehensive manner based on internal and external indicators in the form of an early warning indicator measurement to measure the risk is inherently about funding composition, liquidity ratio, cash flow projection, liquidity gap, scenario analysis, and stress testing.
4. Bank has developed an Early Warning Indicator liquidity risk which is an indicator used to predict potential future liquidity crisis as a form of identification, measurement, and monitoring of liquidity risk on a daily basis that aims to mitigate early when there is potential liquidity crisis in the future.
5. The Bank performs daily limit monitoring such as GWM primary, secondary and excess reserve and (AL + NAB)/ NCD limits to the threshold set by regulators including

oleh regulator termasuk tindak lanjut yang akan dilakukan oleh risk taking unit apabila terjadi pelampauan dan dilaporkan kepada Direksi.

6. Bank telah memiliki prosedur dalam hal rencana pendanaan darurat ketika bank menghadapi kondisi krisis likuiditas (*contingency funding plan/CFP*) serta bank telah melakukan skenario uji coba CFP-framework apabila terjadi krisis likuiditas dikemudian hari.
7. Bank telah melakukan perhitungan Basel III terkait risiko likuiditas yaitu perhitungan *Net Stable Funding Ratio* (NSFR) dan *Liquidity Coverage Ratio* (LCR).

4. Risiko Operasional

Adapun upaya pengelolaan Risiko Operasional yang telah dilakukan bank **bjb** adalah sebagai berikut.

1. Bank melakukan proses pengukuran risiko operasional dilakukan secara berkala melalui perangkat pengukuran risiko operasional diantaranya *risk control self assessment*, *key risk indicator*, laporan data kerugian risiko operasional pada masing-masing unit kerja serta pengukuran profil risiko operasional *bankwide* yang dilakukan secara periodik. Adapun hasil analisa atas penilaian risiko operasional tersebut dilaporkan kepada pihak manajemen yang dilakukan secara berkala seperti pelaporan *monthly report*.
2. *Risk taking unit* senantiasa melakukan *risk assessment* atas pengembangan Produk dan Aktivitas Baru dalam rangka melakukan penerapan manajemen risiko didalamnya;
3. Bank berupaya untuk melakukan penyempurnaan *bussiness process* terutama untuk aktivitas perkreditan. Hal tersebut terlihat dari penerapan model bisnis dengan melibatkan beberapa fungsi seperti *Relationship Manager*, *Relationship Officer* dan *Account Officer* dan telah diakomodir dalam Struktur Organisasi serta terdapat beberapa *review* atas prosedur kerja serta penggunaan sistem dalam rangka mendukung proses manajemen risiko yang handal.
4. Bank senantiasa melakukan peningkatan kualitas SDM khususnya pada aktivitas bisnis utama bank yaitu perkreditan dengan memberikan pendidikan & pelatihan kepada pegawai.
5. Dalam menjaga kepentingan bank dan penegakan disiplin, Bank telah melaksanakan pedoman sanksi disiplin dengan cukup efektif termasuk dalam penerapan sistem sanksi kepegawaian.

5. Risiko Hukum

Bank melalui unit kerja divisi hukum senantiasa melakukan penanganan atas kasus yang terjadi, baik yang dilakukan oleh Bank secara langsung maupun menggunakan jasa konsultan hukum atas permintaan *risk taking unit*. Upaya yang dilakukan Perseroan dalam mengelola Risiko hukum yaitu:

1. Unit kerja hukum melakukan pembinaan dalam bidang hukum secara berkala melalui proses pendampingan perkara hukum, *legal session* kepada *risk taking unit* dengan pembahasan permasalahan-permasalahan hukum

follow-up that will be performed by the risk taking unit in the event of a breach and reported to the Directors.

6. The bank has had procedures in regards to emergency financing plans when the bank faces the liquidity crisis (*contingency funding plan*) as well as the bank has conducted a CFPframework test scenario in case of the later liquidity crisis.
7. Bank has done the calculation of Basel III related to liquidity risk, namely the calculation of *Net Stable Funding Ratio* (NSFR) and *Liquidity Coverage Ratio* (LCR).

4. Operational Risk

The Operational Risk management efforts that have been carried out by bank **bjb** are as follows.

1. The Bank performed the process of measuring operational risk carried out periodically through operational risk measurement tools including risk control self-assessments, key risk indicators, operational risk loss data reports for each work unit as well as periodic bankwide operational risk profile measurements. The results of the analysis on the operational risk assessment were reported to management carried out periodically, such as a monthly report.
2. The risk taking unit always carried out a risk assessment on the development of new products and activities in order to implement risk management in it;
3. The Bank strived to make improvements to the business process, especially for lending activities. This could be seen from the application of a business model that involved several functions such as Relationship Managers, Relationship Officers and Account Officers and had been accommodated in the Organizational Structure and there were several reviews of work procedures and use of systems in order to support a reliable risk management process.
4. The Bank continued to improve the quality of human resources, especially in the main business activity of the bank, namely credit by providing education and training to employees.
5. In safeguarding the interests of the bank and enforcing discipline, the Bank implemented guidelines for disciplinary sanctions quite effectively including the imposition of a system of employment sanctions.

5. Legal Risk

The Bank, through the legal division work unit, always handles cases that occur, both those carried out by the Bank directly or using the services of a legal consultant at the request of the risk-taking unit. Efforts made by the Company in managing legal risk are:

1. Unit of legal work in the field of legal development periodically through the process of mentoring the law, legal session to the risk taking Unit with the discussion of legal issues encountered in the branch office, and

yang dihadapi pada kantor cabang, serta melaksanakan *review* terhadap perjanjian-perjanjian kerjasama yang akan dilaksanakan guna melindungi kepentingan Bank. Namun masih terdapat kelemahan terkait proses *review* perjanjian yang hanya berdasarkan atas permintaan dari risk taking unit.

2. Bank melakukan identifikasi dan pengendalian risiko hukum terhadap produk dan aktivitas baru melalui pengkajian terkait aspek hukum serta menyampaikan informasi dan pelaporan yang berkaitan dengan mitigasi risiko hukum kepada Direksi yang membidangi unit kerja hukum.
3. Terkait dengan pelaksanaan sistem informasi manajemen risiko hukum telah dilaksanakan dengan baik salah satunya adanya laporan secara berkala terkait dengan pemantauan dan pencatatan atas pelaksanaan pendampingan perkara hukum serta penanganan hukum, *update* perkara hukum yang ditangani oleh Divisi Hukum serta laporan setiap triwulan disajikan dalam bentuk profil risiko hukum.

6. Risiko Strategik

Pengelolaan risiko strategik yang dilakukan Perseroan adalah sebagai berikut.

1. Bank secara berkala melakukan pengukuran risiko strategik melalui pemantauan atas *progress report* pencapaian rencana bisnis bank serta melakukan *business review* atas perkembangan bisnis bank.
2. Pencapaian atas bisnis bank tersebut dibahas dan dilaporkan kepada pihak manajemen yang dilakukan secara berkala termasuk kepada komite yang berada di bawah Dewan Komisaris.
3. Bank senantiasa melakukan *monitoring* atas kinerja kantor cabang.
4. Bank melakukan beberapa upaya dan strategi yaitu optimalisasi dalam upaya penyelesaian kredit bermasalah dengan melakukan penagihan, klaim asuransi dan eksekusi agunan, melakukan peningkatan dana CASA.

Tinjauan atas Efektivitas Sistem Manajemen Risiko

Sistem pengukuran risiko yang dipergunakan untuk mengukur eksposur risiko Bank sebagai pedoman untuk melakukan pengendalian dan dilakukan secara berkala. Sistem tersebut paling kurang harus dapat mengukur:

1. Sensitivitas produk/aktivitas terhadap perubahan faktor-faktor yang mempengaruhinya, bank dalam keadaan normal maupun tidak normal.
2. Kecenderungan perubahan faktor-faktor dimaksud berdasarkan fluktuasi yang terjadi dimasa lalu dan korelasinya.
3. Faktor risiko (*Risk Faktor*) secara individual.
4. Eksposur risiko secara keseluruhan (*aggregate*) maupun per risiko, dengan mempertimbangkan keterkaitan antar risiko.
5. Seluruh risiko yang melekat pada seluruh transaksi serta produk perbankan, termasuk produk dan aktivitas baru, dan dapat diintegrasikan dalam sistem informasi manajemen Bank.

Metode pengukuran dapat dilakukan secara kuantitatif dan/atau kualitatif. Metode pengukuran tersebut dapat berupa metode yang ditetapkan oleh Bank Indonesia dalam rangka penilaian risiko dan perhitungan modal (baik berupa metode standar atau metode internal yang dikembangkan sendiri oleh Bank). Dalam rangka mengatasi kelemahan yang dapat timbul atas penggunaan model pengukuran risiko tertentu maka Bank harus melakukan validasi model tersebut. Sistem pengukuran risiko dievaluasi dan disempurnakan secara berkala atau sewaktu-waktu apabila diperlukan untuk memastikan kesesuaian asuransi, akurasi, kewajaran, dan integritas data, serta prosedur yang digunakan untuk mengukur risiko. Dalam melakukan evaluasi atas efektivitas sistem manajemen risiko Perseroan maka satuan kerja manajemen risiko melakukan program pemantauan sebagai berikut:

1. Perseroan memiliki sistem dan prosedur pemantauan antara lain mencakup pemantauan terhadap besarnya eksposur risiko, kepatuhan limit internal dan hasil *stress testing* maupun konsistensi dengan kebijakan dan prosedur yang ditetapkan.
2. Pemantauan dilakukan baik oleh unit pelaksana (*risk taking unit*) maupun oleh Satuan Kerja Manajemen Risiko Hasil pemantauan disajikan dalam laporan berkala yang disampaikan kepada manajemen dalam rangka mitigasi risiko dan tindakan yang diperlukan.
3. Perseroan menyiapkan suatu sistem *back up* dan prosedur yang efektif untuk mencegah terjadinya gangguan (*disruptions*) dalam proses pemantauan risiko, dan melakukan pengecekan serta penilaian kembali secara berkala terhadap sistem *back up* tersebut.

Berdasarkan evaluasi atas efektivitas yang telah dilakukan selama tahun 2021, menunjukkan bahwa sistem manajemen risiko pada bank **bjb** telah memadai.

Overview of The Risk Management Systems Effectiveness

The risk measurement system used to measure the Bank's risk exposure as a guideline for controlling and conducting periodically. The system should be at least measuring:

1. Sensitivity of the product/activity to changes in the factors that affect it, the bank is in normal or abnormal state.
2. The tendency to change the factors referred to by the fluctuations that occurred in the past and its correlate.
3. Risk factors are individually.
4. Overall risk exposure (aggregate) as well as per risk, taking into account the linkage between risks.
5. The entire risk inherent in all transactions and banking products, including new products and activities, and can be integrated in the management information system of the Bank.

The measuring method can be performed quantitatively and/or qualitatively. The measuring method can be a method set by Bank Indonesia in order to risk assessment and capital calculations (either standard method or internal method developed by the Bank). In order to overcome the weaknesses that can arise on the use of a particular risk measurement model, the Bank must validate the model. The risk measurement system is periodically evaluated and refined or at any time when necessary to ensure the suitability of insurance, accuracy, fairness and data integrity, as well as the procedures used to measure risk. In evaluating the effectiveness of the Company risk management system then the risk Management Unit performs the following monitoring program:

1. The Company has monitoring systems and procedures, including monitoring of the magnitude of risk exposure, internal limit compliance and the result of stress testing and consistency with established policies and procedures.
2. Monitoring performed both by the Executive Unit (risk taking unit) as well as by the risk Management work unit monitoring results are presented in periodic reports submitted to the management in order to mitigate the necessary risks and measures.
3. The Company prepares a back-up system and effective procedures to prevent interference (disruptions) in the risk monitoring process, and periodically check and re-valuation of the back-up system.

Based on the evaluation of the effectiveness that has been carried out during 2021, indicating that the risk management system of the bank **bjb** has adequate.

Pernyataan Direksi dan/atau Dewan Komisaris atau Komite Audit atas Kecukupan Sistem Manajemen Risiko

Kode Etik

Kode etik adalah suatu sistem norma, nilai dan juga aturan profesional tertulis yang secara tegas menyatakan perbuatan apa saja yang benar atau salah, perbuatan apa yang harus dilakukan dan perbuatan apa yang harus dihindari. Secara singkatnya definisi kode etik yaitu suatu pola aturan, tata cara, tanda, pedoman etis ketika melakukan suatu kegiatan atau suatu pekerjaan. bank **bjb** memandang penting dan memberikan perhatian yang khusus terhadap penerapan kode etik. Oleh sebab itu Perseroan telah menetapkan *Code of Conduct* yang menjadi pedoman insan bank dalam membangun hubungan dengan para pemangku kepentingan (*stakeholders*).

Di samping itu, kode etik merupakan salah satu perangkat yang ditetapkan Bank dalam menjaga dan meningkatkan integritas seluruh insan **bjb** pada kerangka penerapan *Good Corporate Governance* (GCG) sehingga pengimplementasiannya dapat dilakukan secara konsisten. Dalam rangka menegakkan kode etik, Pejabat eksekutif telah menyampaikan komitmen kepada Direksi melalui penandatanganan pernyataan Integritas yang diperbaharui setiap tahunnya. Melalui upaya ini diharapkan Pejabat eksekutif dapat menjadi *role model* bagi jajaran di bawahnya.

Pokok-Pokok Kode Etik

Direksi melalui Surat Keputusan Direksi Nomor 709/SK/DIRKP/2014 tanggal 7 Oktober 2014 tentang Etika Usaha dan Tata Perilaku (*Code of Conduct*) PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk., kode etik bank **bjb** merupakan pedoman yang menjelaskan etika usaha dan tata perilaku insan bank **bjb** untuk melaksanakan praktik-praktik pengelolaan perusahaan yang baik. Di dalam pedoman tersebut bank **bjb** mengatur mengenai:

Code of Ethics

The code of ethics is a system of norms, values as well as written professional rules that expressly state what actions are right or wrong, what actions must be done and what actions should be avoided. In short, the definition of a code of ethics is a pattern of rules, procedures, signs, ethical guidelines when carrying out an activity or a job. bank **bjb** considers it important and gives special attention to the application of the code of ethics. Therefore, the bank **bjb** has established a Code of Conduct that guides the people of the Company in building relationships with stakeholders.

In addition, the code of ethics is one of the tools established by the Bank in maintaining and enhancing the integrity of all **bjb** people in the framework of implementing Good Corporate Governance (GCG) so that its implementation can be carried out consistently. In order to uphold the code of ethics, the executive officer has conveyed his commitment to the Directors through the signing of an updated Integrity statement every year. Through this effort, it is hoped that executive officers can become role models for the subordinates.

Code of Conduct

Directors through Directors Decree Number 709/SK/DIRKP/2014 dated October 7th, 2014, concerning Business Ethics and Code of Conduct of PT Bank Pembangunan Daerah Jawa Barat and Banten, Tbk., bank **bjb**'s code of ethics is a guideline describing business ethics and bank **bjb** people behavior to implement good corporate management practices. Komite Remunerasi dan Nominasi

Uraian terkait Komite Remunerasi dan Nominasi dijelaskan pada Sub Bab Organ dan Komite di Bawah Dewan Komisaris Bab Tata Kelola Perusahaan dalam Laporan Tahunan ini.

Proses Penyusunan Kebijakan Remunerasi

Proses penyusunan kebijakan Remunerasi yang meliputi:

- 1) Tinjauan mengenai latar belakang dan tujuan kebijakan Remunerasi.

Kebijakan remunerasi disusun dan ditetapkan dengan tujuan mengembangkan kualitas jajaran manajemen dengan tetap memperhatikan ketahanan dan keberlangsungan usaha bank **bjb**.

Kebijakan sistem remunerasi dengan berpedoman pada konsep *Merit System* dan Kinerja Pegawai baik dari sisi penyesuaian remunerasi yang bersifat tetap maupun variabel.

Di sisi remunerasi yang bersifat tetap, strategi dilakukan dengan tetap memperhatikan kemampuan dan skala usaha, *effective best practice* di industri perbankan yang dibandingkan terhadap *market*. Perseroan telah rutin mengikuti setiap tahun survei mengenai *Total Reward Survey* perbankan melalui konsultan independen yang memang profesional dan telah diikuti oleh mayoritas perbankan di Indonesia. Hal ini dilakukan sebagai bahan referensi dan masukan bagi penyesuaian remunerasi di bank **bjb** agar tetap menarik dan kompetitif. Selain itu, bank **bjb** juga selalu memastikan telah memenuhi ketentuan yang berlaku dan berada di atas standar Upah Minimum yang berlaku di wilayah operasional bank **bjb**. Untuk remunerasi yang bersifat variabel, pemberian remunerasi juga memperhatikan faktor risiko dalam kegiatan usaha dan dampak terhadap pendapatan bank **bjb**.

- 2) Pelaksanaan kaji ulang atas kebijakan Remunerasi pada tahun sebelumnya, beserta perbaikannya.
bank **bjb** melakukan kaji ulang atas kebijakan remunerasi secara berkala dengan menyesuaikan pada ketentuan serta *best practice* maupun evaluasi sesuai ketentuan kebijakan dan prosedur yang berlaku. Kaji ulang kebijakan remunerasi dilakukan terhadap Surat Keputusan Direksi No. 1500/SK/DIR-CS/2018 tanggal 14 Desember 2018 tentang Pedoman Penghasilan, Tunjangan dan Fasilitas bagi Dewan Komisaris dan Direksi PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.

Remuneration and Nomination Committee

The description regarding the Remuneration and Nomination Committee is explained in the Sub Chapter of Organs and Committees Under the Board of Commissioners Chapter of Corporate Governance in this Annual Report.

Remuneration Policy Development Process

Remuneration policy formulation process which includes:

- 1) Review of the background and objectives of the Remuneration policy.

The remuneration policy is formulated and determined with the aim of developing the quality of the management while taking into account the resilience and sustainability of bank **bjb**'s business.

The remuneration system policy is guided by the concept of the Merit System and Employee Performance, both in terms of fixed and variable remuneration adjustments.

In terms of fixed remuneration, the strategy is carried out by taking into account the capabilities and business scale, *effective best practice* in the banking industry compared to the market. The Company regularly participates in a survey on the Total Reward Survey of banking through an independent consultant who is professional and has been followed by the majority of banks in Indonesia. This is done as reference material and input for remuneration adjustments at bank **bjb** so that it remains attractive and competitive. In addition, bank **bjb** also always ensures that it has complied with applicable regulations and is above the applicable Minimum Wage standard in the operational area of bank **bjb**. For variable remuneration, remuneration also pays attention to risk factors in business activities and the impact on bank **bjb** pendapatan income.

- 2) The implementation of a review of the Remuneration policy in the previous year, along with its improvements.
bank **bjb** conducts periodic reviews of remuneration policies by adjusting to the provisions and best practices as well as evaluations in accordance with applicable policies and procedures. A review of the remuneration policy was carried out on the Decree of the Directors No. 1500/SK/DIR-CS/2018 dated December 14, 2018 regarding Guidelines for Income, Allowances and Facilities for the Board of Commissioners and Directors of PT Bank Pembangunan Daerah Jawa Barat and Banten, Tbk.

- 3) Mekanisme untuk memastikan bahwa Remunerasi bagi Pegawai di unit kontrol bersifat independen dari unit kerja yang diawasinya.

Untuk memastikan independensi penerapan remunerasi bagi pegawai di unit kontrol, penilaian kinerja di unit kontrol tidak dikaitkan dengan pencapaian target kinerja dari unit kerja yang diawasinya, hal ini dipastikan melalui pemisahan struktur organisasi unit kontrol agar independen, termasuk mengenai persetujuan penetapan *goal setting* kinerja unit kerja maupun pegawai.

Anti-Corruption Program

Programs and Procedures In Overcoming Corruption, Kickbacks, Fraud, Bribery and/ or Gratuity Practices

Anti-Bribery Management System (SMAP)

One way to maintain the Bank's commitment to good governance was to implement the provisions of SNI ISO 37001:2016 Anti-Bribery Management System (SMAP). The implementation of these provisions was a form of bank **bjb**'s commitment to always be clean and with integrity, and free from bribery. The Bank already had SMAP Guidelines ratified through the Decree of the Directors No. 0728/SK/DIR-KAP/2021 dated November 8, 2021.

ORGANIZATION

1. Board of Commissioners
2. Directors
3. Anti-Bribery Compliance Function (FKAP TEAM), which consisted of:
 - a. PPT Compliance & AML Division
 - b. Risk Management Division
 - c. Legal Division
 - d. Internal Audit Unit (SKAI)
4. SMAP Implementing Work Unit
5. Supporting Unit

FACTORS AFFECTING THE IMPLEMENTATION OF SMAP

In the SMAP control process, Company identified internal and external factors through an issue mapping process based on:

1. Size, structure and delegation of decision making.
2. Locations and sectors where the Bank operated or anticipated operations.
3. The nature, scale and complexity of the activities, operations and business models.
4. Entities over which the Bank had control.
5. The entity exercising control over the Bank.
6. The nature and extent of interaction with public officials.
7. Laws and regulations, regulations, contracts and professional obligations and duties.

The Company determined the scope of SMAP implementation based on analysis of internal and external factors, needs and expectations of stakeholders as well as business process considerations.

PENILAIAN RISIKO PENYUAPAN

Perseroan menetapkan metode penilaian risiko penyuapan yang meliputi:

1. Identifikasi risiko penyuapan dilakukan oleh unit kerja dengan supervisi dari pimpinan dari unit kerja masing-masing melalui *self assessment* secara berkala dan/atau pada saat terjadi perubahan terhadap struktur organisasi atau proses bisnis yang mempengaruhi tingkat risiko penyuapan.
2. Penilaian risiko dilakukan oleh unit kerja setiap 1 (satu) tahun sekali sehingga perubahan dan risiko baru dapat dinilai secara tepat.
3. Setiap unit kerja wajib melakukan *self assessment* penilaian risiko penyuapan secara jujur dan dapat mencerminkan kondisi yang riil.
4. Divisi Manajemen Risiko melakukan pemantauan risiko secara keseluruhan berdasarkan hasil pengisian risiko penyuapan masing-masing unit kerja melalui *mapping* risiko penyuapan Bank.
5. Pengendalian risiko dilakukan oleh masing-masing unit kerja sesuai dengan hasil penilaian risiko penyuapan.
6. Evaluasi efektivitas pelaksanaan pengendalian risiko dilakukan melalui Audit Internal SMAP serta rapat tinjauan Direksi dan Dewan Komisaris sebagai salah satu pembahasan efektivitas dalam mengendalikan risiko penyuapan.

Setiap Unit kerja Penerap dan Pendukung menyimpan bukti penilaian risiko untuk memastikan bahwa penilaian risiko penyuapan telah dilaksanakan dan digunakan untuk merancang atau meningkatkan SMAP di Bank. Penilaian secara *self assessment* risiko harus dilakukan minimal 1 (satu) kali dalam 1 (satu) tahun untuk memastikan keefektifan dari rencana pengendalian pada masing-masing risiko.

Kebijakan Gratifikasi

Dalam upaya melakukan pencegahan Korupsi, Kolusi dan Nepotisme (KKN), Perseroan telah membentuk program pengendalian gratifikasi yang sebagaimana tertuang dalam Pedoman Pengendalian Gratifikasi Nomor 0694/SK/DIR-KP/2019 yang memberikan arah serta acuan bagi segenap organisasi Perseroan di dalam menanggulangi praktik saling memberi (penerimaan, penolakan, maupun pemberian) di lingkungan Perseroan sehingga pengelolaan gratifikasi pada Perseroan dapat sesuai dengan prinsip-prinsip tata kelola perusahaan yang baik. Dengan ditetapkannya pedoman ini, Perseroan diharapkan dapat mendorong terlaksananya etika bisnis yang tinggi serta mencegah timbulnya benturan kepentingan, kecurangan serta perilaku penyimpangan lain di lingkungan perseroan.

Perseroan secara berkesinambungan melakukan *monitoring* dan evaluasi program pengendalian gratifikasi sebagai bentuk komitmen bank **bjb** dengan KPK dalam melaksanakan program pengendalian gratifikasi dan perseroan telah melaksanakan sosialisasi yang diselenggarakan dalam bentuk *Training of Trainer* kepada perwakilan level Managerial di Kantor Cabang.

BRIBERY RISK ASSESSMENT

The Company established a bribery risk assessment method which included:

1. Identification of bribery risk was carried out by work units with supervision from the leadership of each work unit through periodic self-assessments and/or when changes occurred to the organizational structure or business processes that affect the level of bribery risk.
2. Risk assessment was carried out by the work unit once every 1 (one) year so that changes and new risks could be assessed appropriately.
3. Each work unit was required to conduct a self-assessment of bribery risk assessment honestly and reflect real conditions.
4. The Risk Management Division monitored overall risk based on the results of filling in the bribery risk of each work unit through mapping the Bank's bribery risk.
5. Risk control was carried out by each work unit in accordance with the results of the bribery risk assessment.
6. Evaluation of the effectiveness of the implementation of risk control was carried out through the SMAP Internal Audit and review meetings of the Directors and the Board of Commissioners as one of the discussions on effectiveness in controlling bribery risk.

Each Implementing and Supporting Unit maintained evidence of risk assessment to ensure that the bribery risk assessment had been carried out and used to design or improve the SMAP in the Bank. Risk self-assessment assessment had to be carried out at least 1 (one) time in 1 (one) year to ensure the effectiveness of the control plan for each risk.

Gratuity Policy

In an effort to prevent Corruption, Collusion and Nepotism (KKN), Company established a gratuity control program as stated in the Gratuity Control Guidelines Number 0694/SK/DIR-KP/2019 which provided direction and reference for all Company organizations in tackling the practice of giving each other (acceptance, rejection, or giving) within the company so that the management of gratuities in the company could be in accordance with the principles of good corporate governance. With the enactment of these guidelines, the Company was expected to be able to encourage the implementation of high business ethics and prevent conflicts of interest, fraud and other irregular behavior within the company.

The Company continuously monitored and evaluated the gratuity control program as a form of bank **bjb**'s commitment to the KPK in implementing the gratuity control program and the company carried out socialization which was held in the form of Training of Trainers to Managerial level representatives at Branch Offices.

Program pengendalian gratifikasi adalah sekumpulan perangkat dan rangkaian kegiatan serta mekanisme pengendalian gratifikasi secara berkesinambungan guna menjaga integritas pegawai dari praktik gratifikasi yang dilarang. Program Pengendalian Gratifikasi merupakan program kerja sama yang dilakukan antara bank **bjb** dengan Komisi Pemberantasan Korupsi (KPK) Indonesia berdasarkan komitmen bersama/kesepakatan kerjasama antara bank **bjb** dengan KPK yang ditandatangani pada 25 Maret 2011. bank **bjb** merupakan bank pertama di Indonesia yang melakukan kerja sama dengan KPK terkait Program Pengendalian Gratifikasi. Adapun penerapan Program Pengendalian Gratifikasi diawali dengan penerapan budaya perusahaan yang didalamnya terdapat tata nilai atau nilai – nilai utama yang menjadi *corporate value* bank **bjb**.

Dalam mewujudkan komitmen Program Pengendalian Gratifikasi maka *corporate value* bank **bjb** dijabarkan dalam bentuk *code of conduct* (etika usaha dan tata perilaku) untuk menjadi acuan perilaku bagi Dewan Komisaris, Direksi dan seluruh pegawai bank **bjb** dalam mengelola perusahaan guna mencapai visi, misi dan tujuan Perseroan. Salah satu etika perilaku yang terdapat pada *code of conduct* yaitu standar etika untuk menghindari benturan kepentingan (penanganan benturan kepentingan/*conflict of interest*) dan penyalahgunaan jabatan serta etika untuk tidak menerima gratifikasi dalam bentuk apapun yang berhubungan dengan jabatan, tugas serta kewenangannya.

Program pengendalian gratifikasi terdiri dari pembuatan perangkat aturan tentang pengendalian gratifikasi, etika usaha dan tata perilaku (*code of conduct*) pembentukan organisasi yang mengelola pengendalian gratifikasi, kegiatan sosialisasi/diseminasi tentang aturan pengendalian gratifikasi dan peningkatan kesadaran individu dan organisasi tentang gratifikasi serta implementasi pengelolaan pelaporan penerimaan gratifikasi yang berkoordinasi dengan pihak KPK.

PENGELOLAAN PENGENDALIAN GRATIFIKASI

Unit Pengendalian Gratifikasi adalah unit yang memiliki kapasitas untuk melaksanakan fungsi pengelolaan gratifikasi di bank **bjb**, baik dalam penyusunan Pedoman pengendalian gratifikasi hingga melakukan koordinasi bersama dengan pihak Komisi Pemberantasan Korupsi (KPK). Unit Pengendalian Gratifikasi bank **bjb** dalam menjalankan fungsi pengelolaan gratifikasi baik pengaduan, penanganan dan penyampaian pelaporan penerimaan/penolakan gratifikasi melalui mekanisme antara lain sebagai berikut:

Pengelolaan Harta Kekayaan Penyelenggara Negara

Sebagai Perseroan yang kegiatan usahanya dilandaskan kepada prinsip kepercayaan, bank **bjb** perlu menjaga serta menumbuhkan integritas seluruh pegawai. Integritas pegawai dapat tercermin dari perilaku yang beretika yang dapat menghindari setiap pegawai dari praktik-praktik yang tidak sesuai dengan nilai-nilai Perseroan. Hal ini perlu dilaksanakan oleh bank **bjb** sebagai upayanya di dalam menjaga pemenuhan hak-hak para Pemangku Kepentingan melalui pelaksanaan proses bisnis yang bersih dan sehat.

Salah satu upaya yang dapat dilaksanakan oleh bank **bjb** di dalam menjaga serta menumbuhkan integritas Pegawai adalah melalui penyampaian Laporan Harta Kekayaan. Upaya tersebut sejalan dengan usaha Pemerintah dalam menumbuhkan integritas pegawai negeri/penyelenggara negara yang diberlakukan hampir di seluruh instansi pemerintahan, BUMN dan BUMD. Sehubungan dengan adanya perubahan pelaporan LHKPN melalui sistem e-lhkpn, bank **bjb** telah melakukan penyesuaian terhadap ketentuan Pedoman LHKPN melalui penetapan Surat Keputusan Direksi Nomor 1155/SK/DIR-KP/2018 tanggal 4 Oktober 2018 tentang Pedoman Laporan Harta Kekayaan Penyelenggara Negara (LHKPN). Pada tahun pelaporan 2020, bank **bjb** menetapkan jumlah Wajib Lapor sebanyak 1.234 orang, dengan tingkat kepatuhan pelaporan LHKPN sebesar 100%.

Management of Country Property Rights

As a company whose business activities are based on the principle of trust, the bank **bjb** needs to maintain and foster the integrity of all employees. Employee integrity can be reflected in ethical behavior that can avoid any employee from practices that are not in line with Company values. This needs to be carried out by the bank **bjb** as an effort to maintain the fulfillment of the rights of the Stakeholders through the implementation of clean and healthy business processes.

One of the efforts that can be carried out by bank **bjb** in maintaining and growing employee integrity is through the submission of a Wealth Report. These efforts align with the Government's efforts to foster the integrity of civil servants/state administrators, which are enforced in almost all government agencies, BUMN and BUMD. In connection with the change in LHKPN reporting through the e-lhkpn system, bank **bjb** has made adjustments to the provisions of the LHKPN Guidelines through the determination of the Decree of the Directors Number 1155/SK/DIR-KP/2018 dated October 4, 2018, concerning Guidelines for Reporting State Administrators Wealth (LHKPN). In the 2020 reporting year, bank **bjb** set the number of Reporting Obligations to be 1,234 people, with a LHKPN reporting compliance rate of 100%.

Rencana Strategis Bank

Uraian terkait Rencana Strategis Bank dijelaskan pada Sub Bab Rencana Strategis Bank pada Bab Analisis dan Pembahasan Manajemen dalam Laporan Tahunan ini.

Penyediaan Dana Besar dan Penyediaan Dana Kepada Pihak Terkait

Penyediaan dana menjadi salah satu kegiatan usaha utama yang dilaksanakan oleh Perseroan untuk menghindari kegagalan usaha Bank sebagai akibat konsentrasi penyediaan dana dan meningkatkan independensi Direksi dan Dewan Komisaris terhadap potensi intervensi dari pihak terkait, Bank menerapkan prinsip kehati-hatian dan manajemen risiko dalam memberikan penyediaan dana, khususnya penyediaan dana kepada pihak terkait dan/atau penyediaan dana besar (*large exposures*) berpedoman pada ketentuan yang mengatur mengenai batas maksimum pemberian kredit bank umum.

Direksi menetapkan kebijakan penyediaan dana, khususnya penyediaan dana besar untuk melakukan pengendalian serta pemantauan risiko di dalam proses penyediaan dana kepada pihak ketiga sehingga risiko yang timbul atas kegiatan penyediaan dana tersebut tidak akan memberikan dampak secara signifikan terhadap Perseroan.

Transparansi Kondisi Keuangan dan Non Keuangan Perusahaan

The Bank's Strategic Plan

The description of the Bank's Strategic Plan had been explained in the Sub-Chapter of the Bank's Strategic Plan in the Management Discussion and Analysis Chapter of this Annual Report.

Provision of Large Funds and Provision of Funds to Related Parties

Provision of funds is one of the main business activities carried out by the Bank to avoid the failure of the Bank's business as a result of the concentration of the provision of funds and increase the independence of the Directors and the Board of Commissioners of potential interventions from related parties. The Bank applies the principle of prudence and risk management in providing funds, particularly the provision of funds to related parties and/or the provision of large exposures based on the provisions governing the maximum lending limit for commercial banks.

The Directors sets the policy for providing funds, especially the provision of large funds to control and monitor risks in the process of providing funds to third parties so that the risks arising from the provision of these funds will not have a significant impact on the Company.

Transparency of Financial and Non-Financial Conditions of the Company

bank **bjb** fulfills transparency and publication obligations of financial and non-financial conditions by applicable provisions through the delivery and publication of information through both print media and company websites. The forms of financial and non-financial transparency meant before are written in the following sentences:

1. Monthly and Quarterly Financial Reports are submitted to the regulator.
2. Monthly and Quarterly Financial Reports are submitted to regulators and published on the Company's website as well as selected national and local print media.
3. The annual bank **bjb** report is prepared under applicable regulations and submitted to the Company's stakeholders and shareholders also published through the website.
4. Corporate Governance Information including the Annual GCG Report and the Annual Integrated Corporate Governance Report and published through the bank **bjb**'s website.
5. Product and Service Information and the bank's office service network are actively informed through the Company's website and social media.
6. Other information that supports information disclosure, financial education, and services to the public is carried out through information media and publications owned by the Company including the implementation of corporate activities.

Penerapan Tata Kelola Terintegrasi

The Implementation of Integrated Governance

Sesuai dengan Peraturan Otoritas Jasa Keuangan Nomor 18/POJK.03/2014 tentang Penerapan Tata Kelola Bagi Konglomerasi Keuangan Tata Kelola Terintegrasi, bank **bjb** termasuk lembaga keuangan yang memiliki kewajiban penerapan tata kelola terintegrasi. Hal tersebut dikarenakan terdapatnya kepemilikan saham beberapa Lembaga Jasa Keuangan oleh bank **bjb**.

Selain hal tersebut, dengan kedudukan bank **bjb** sebagai Lembaga Jasa Keuangan yang Pemegang Saham Pengendalinya adalah Pemerintah Provinsi Jawa Barat, bank **bjb** memiliki keterkaitan dengan Lembaga Jasa Keuangan yang dimiliki oleh Pemerintah Provinsi Jawa Barat. Hal ini menjadikan Perseroan memiliki hubungan pengendalian dengan Lembaga Jasa Keuangan yang dimiliki oleh Pemerintah Provinsi Jawa Barat. Atas dasar inilah Perseroan bersama seluruh Lembaga jasa Keuangan yang memiliki hubungan kepemilikan maupun hubungan pengendalian dapat dikategorikan sebagai suatu Konglomerasi Keuangan.

Sebagai bagian dari Konglomerasi Keuangan tersebut, bank **bjb** berkeinginan untuk dapat berperan aktif di dalam melaksanakan tata kelola terintegrasi sesuai Peraturan Otoritas Jasa Keuangan nomor 18/POJK.03/2014 tentang Penerapan Tata Kelola Bagi Konglomerasi Keuangan. Dengan demikian, pelaksanaan tata kelola yang dilakukan secara terintegrasi tersebut ke depannya dapat mewujudkan suatu konglomerasi keuangan yang sehat yang dapat berpartisipasi di dalam menciptakan sektor jasa keuangan yang tumbuh secara berkelanjutan dan stabil.

Berdasarkan surat Nomor 539/1030/Inves&BUMD tanggal 2 Maret 2015 perihal Penunjukan bank **bjb** Selaku Entitas Utama dan surat nomor 539/1495/Inves&BUMD tanggal 27 Maret 2015 perihal Penunjukan bank **bjb** Selaku Entitas Utama, Bank ditunjuk selaku Entitas Utama bagi seluruh Lembaga Jasa Keuangan yang dimiliki dan/atau dikendalikan oleh Pemerintah Provinsi Jawa Barat. Beberapa upaya yang telah dilakukan oleh Bank terkait implementasi Peraturan Otoritas Jasa Keuangan Nomor 18/POJK.02/2014 tersebut adalah sebagai berikut:

1. Pembentukan Satuan Kerja

Berdasarkan Surat Keputusan Direksi Nomor 0376/SK/DIR-PST/2021 tanggal 10 Mei 2021 tentang Deskripsi Jabatan, diatur mengenai hal-hal sebagai berikut:

- Pelaksanaan Fungsi Manajemen Risiko Terintegrasi pada konglomerasi keuangan bank **bjb** dilaksanakan oleh Divisi Manajemen Risiko Grup Manajemen Risiko Terintegrasi.

In accordance with the Financial Services Authority Regulation number 18/POJK.03/2014 concerning the implementation of Governance for the Integrated Conglomerate, bank **bjb** belongs to the financial institution that has the obligation to implement integrated governance. That is because there are shares in several Financial Services Institutions by the bank **bjb**.

Furthermore, as a Financial Services Institution whose controlling shareholder is the West Java Provincial Government, bank **bjb** has a relationship with the Financial Services Institution owned by the West Java Provincial Government. Therefore, the Company has a controlling relationship with the Financial Services owned by the Government of West Java Province. Based on this, the Company and all financial service institutions that have ownership and control relationships can be categorized as a Financial Conglomerate.

As a part of the Financial Conglomerate, the bank **bjb** is willing to be able to play an active role in implementing integrated governance in accordance with Financial Services Authority Regulation number 18/POJK.03/2014 concerning The Implementation of Governance for the Integrated Conglomerates. Thus, the implementation of governance carried out in an integrated manner in the future can create a healthy financial conglomerate that can participate in creating a financial service sector that grows in a sustainable and stable manner.

Based on the letter No. 539/1030/Inves&BUMD dated March 2nd, 2015 concerning the Appointment of the bank **bjb** as the Main Entity and letter No.539/1495/Inves&BUMD dated March 27th, 2015 regarding the appointment of the bank **bjb** as the Main Entity, the Bank is appointed as the Main Entity for all Financial Services Institution owned and/or controlled by the Government of West Java Province. Penerapan Pedoman Tata Kelola Perusahaan Terbuka

Application of Guidelines Open Corporate Governance

Sesuai dengan Surat Edaran Otoritas Jasa Keuangan No. 32/SEOJK.04/2015 tentang Pedoman Tata Kelola Perusahaan Terbuka, Pedoman Tata Kelola mencakup 5 (lima) aspek, 8 (delapan) prinsip dan 25 (dua puluh lima) rekomendasi penerapan aspek dan prinsip tata kelola perusahaan yang baik. Rekomendasi penerapan aspek dan prinsip tata kelola perusahaan yang baik dalam Pedoman Tata Kelola adalah standar penerapan aspek dan prinsip tata kelola perusahaan yang baik yang harus diterapkan Perseroan untuk mengimplementasikan prinsip tata kelola. Adapun uraian penerapannya, dapat disampaikan, sebagai berikut.

Following the Financial Services Authority Circular No. 32/SEOJK.04/2015 concerning Guidelines for the Governance of Public Companies, the Governance Guidelines cover 5 (five) aspects, 8 (eight) principles, and 25 (twenty-five) recommendations for the implementation of aspects and principles of good corporate governance. Recommendations for applying aspects and principles of good corporate governance in the Governance Guidelines are standards for implementing aspects and principles of good corporate governance that the Company must apply to implement the principles of governance. As for the description of its application, it can be submitted as follows.

No	Aspek; Prinsip; Rekomendasi Aspect; Principle; Recommendation	Comply or Explain Comply or Explain
A.	ASPEK 1: HUBUNGAN PERUSAHAAN TERBUKA DENGAN PEMEGANG SAHAM DALAM MENJAMIN HAK-HAK PEMEGANG SAHAM. ASPECT 1: PUBLIC COMPANY RELATIONS WITH SHAREHOLDERS IN GUARANTEEING SHAREHOLDER RIGHTS.	
A.1.	Prinsip 1: Meningkatkan Nilai Penyelenggaraan Rapat Umum Pemegang Saham (RUPS). Principle 1: Increasing the Value of Organizing a General Meeting of Shareholders (GMS).	
A.1.1.	Rekomendasi 1: Perusahaan Terbuka memiliki cara atau prosedur teknis pengumpulan suara (<i>voting</i>) baik secara terbuka maupun tertutup yang mengedepankan independensi, dan kepentingan pemegang saham. Penjelasan: Setiap saham dengan hak suara yang dikeluarkan mempunyai satu hak suara (<i>one share one vote</i>). Pemegang saham dapat menggunakan hak suaranya pada saat pengambilan keputusan, terutama dalam pengambilan keputusan dengan cara pengumpulan suara (<i>voting</i>). Namun demikian, mekanisme pengambilan keputusan dengan cara pengumpulan suara (<i>voting</i>) baik secara terbuka maupun tertutup belum diatur secara rinci. Perusahaan Terbuka direkomendasikan mempunyai prosedur pengambilan suara dalam pengambilan keputusan atas suatu mata acara RUPS. Adapun prosedur pengambilan suara (<i>voting</i>) tersebut harus menjaga independensi ataupun kebebasan pemegang saham. Sebagai contoh, dalam pengumpulan suara (<i>voting</i>) secara terbuka dilakukan dengan cara mengangkat tangan sesuai dengan instruksi pilihan yang ditawarkan oleh pimpinan RUPS. Sedangkan, dalam pengumpulan suara (<i>voting</i>) secara tertutup dilakukan pada keputusan yang membutuhkan kerahasiaan ataupun atas permintaan pemegang saham, dengan cara menggunakan kartu suara ataupun dengan penggunaan <i>electronic voting</i>. Recommendation 1: A Public Company had a technical method or procedure for voting, both openly and privately, that prioritized independence and the interests of shareholders. Explanation: Each share with voting rights issued had one vote (<i>one share one vote</i>). Shareholders could exercise their voting rights when making decisions, especially in making decisions by voting. However, the decision-making mechanism by means of voting, both openly and privately, had not been regulated in detail. Public companies were recommended to have voting procedures in making decisions on a GMS agenda. The voting procedure had to maintain the independence or freedom of shareholders. For example, in open voting, it was done by raising hands in accordance with the choice instructions offered by the chairman of the GMS. Meanwhile, closed voting was carried out on decisions that require confidentiality or at the request of shareholders, by using a voting card or by using <i>electronic voting</i>.	Comply Bank telah memiliki tata cara pengumpulan suara (<i>voting</i>) baik secara terbuka maupun tertutup dalam Rapat Umum Pemegang Saham yang diatur pada Anggaran Dasar Perseroan. Comply The Bank has voting procedures both openly and closedly at the General Meeting of Shareholders which is set out in the Company's Articles of Association.
A.1.2.	Rekomendasi 2: Seluruh anggota Direksi dan anggota Dewan Komisaris Perusahaan Terbuka hadir dalam RUPS Tahunan. Penjelasan: Kehadiran seluruh anggota Direksi dan anggota Dewan Komisaris Perusahaan Terbuka bertujuan agar setiap anggota Direksi dan anggota Dewan Komisaris dapat memperhatikan, menjelaskan, dan menjawab secara langsung permasalahan yang terjadi atau pertanyaan yang diajukan oleh pemegang saham terkait mata acara dalam RUPS. Recommendation 2: All members of the Directors and members of the Board of Commissioners of a Public Company attended the Annual GMS. Explanation: The presence of all members of the Directors and members of the Board of Commissioners of a Public Company was intended so that each member of the Directors and member of the Board of Commissioners could pay attention, explain, and answer directly the problems that occurred or questions raised by shareholders related to the agenda at the GMS.	Comply Seluruh anggota Direksi dan anggota Dewan Komisaris hadir pada penyelenggaraan RUPS Tahun Buku 2020 yang diselenggarakan pada bulan April 2021. B.2.3.	Rekomendasi 10: Dewan Komisaris mempunyai kebijakan terkait pengunduran diri anggota Dewan Komisaris apabila terlibat dalam kejahatan keuangan. Penjelasan: Kebijakan pengunduran diri anggota Dewan Komisaris yang terlibat dalam kejahatan keuangan merupakan kebijakan yang dapat meningkatkan kepercayaan para pemangku kepentingan terhadap Perusahaan Terbuka, sehingga integritas perusahaan akan tetap terjaga. Kebijakan ini diperlukan untuk membantu kelancaran proses hukum dan agar proses hukum tersebut tidak mengganggu jalannya kegiatan usaha. Selain itu, dari sisi moralitas, kebijakan ini membangun budaya beretika di lingkungan Perusahaan Terbuka. Kebijakan tersebut dapat tercakup dalam Pedoman ataupun Kode Etik yang berlaku bagi Dewan Komisaris. Selanjutnya, yang dimaksud dengan terlibat dalam kejahatan keuangan merupakan adanya status terpidana terhadap anggota Dewan Komisaris dari pihak yang berwenang. Kejahatan keuangan dimaksud seperti manipulasi dan berbagai bentuk penggelapan dalam kegiatan jasa keuangan serta Tindakan Pidana Pencucian Uang sebagaimana dimaksud dalam Undang-Undang Nomor 8 Tahun 2010 tentang Pencegahan dan Pemberantasan Tindak Pidana Pencucian Uang. Recommendation 10: The Board of Commissioners has a policy regarding the resignation of members of the Board of Commissioners if they are involved in financial crimes. Explanation: The policy of resigning members of the Board of Commissioners who are involved in financial crimes is a policy that can increase the confidence of stakeholders in a Public Company, so that the integrity of the company will be maintained. This policy is needed to help smooth the legal process and so that the legal process does not interfere with the running of business activities. In addition, from a morality point of view, this policy builds an ethical culture within the Public Company. These policies can be included in the Guidelines or Code of Ethics applicable to the Board of Commissioners. Furthermore, what is meant by being involved in a financial crime is the convict status of a member of the Board of Commissioners from the authorized party. The financial crimes referred to are manipulation and various forms of embezzlement in financial service activities as well as the Criminal Action of Money Laundering as referred to in Law Number 8 of 2010 concerning Prevention and Eradication of the Crime of Money Laundering. D.1.2.	Rekomendasi 19: Perusahaan Terbuka memiliki kebijakan anti korupsi dan anti <i>fraud</i>. Penjelasan: Kebijakan anti korupsi bermanfaat untuk memastikan agar kegiatan usaha Perusahaan Terbuka dilakukan secara legal, prudent, dan sesuai dengan prinsip-prinsip tata kelola yang baik. Kebijakan tersebut dapat merupakan bagian dalam kode etik, ataupun dalam bentuk tersendiri. Dalam kebijakan tersebut dapat meliputi antara lain mengenai program dan prosedur yang dilakukan dalam mengatasi praktik korupsi, balas jasa (<i>kickbacks</i>), <i>fraud</i>, suap dan/atau gratifikasi dalam Perusahaan Terbuka. Lingkup dari kebijakan tersebut harus menggambarkan pencegahan Perusahaan Terbuka terhadap segala praktik korupsi baik memberi atau menerima dari pihak lain. Recommendation 19: The Public Company has an anti-corruption and anti-fraud policy. Explanation: The anti-corruption policy is useful to ensure that the business activities of the Public Company are carried out legally, prudently, and in accordance with the principles of good governance. The policy can be part of the code of ethics, or in a separate form. The policy may include, among others, the programs and procedures carried out in overcoming the practice of corruption, kickbacks, fraud, bribery and/or gratuities in a Public Company. The scope of the policy must describe the prevention of the Public Company against all corrupt practices, both giving and receiving from other parties.	Comply Perseroan telah menetapkan pedoman pengendalian gratifikasi dan pedoman pelaporan LHKPN dalam rangka upaya pencegahan anti korupsi dan anti <i>fraud</i> yang tertuang dalam Surat Keputusan Direksi Nomor 1155/SK/DIR-KP/2018 tanggal 4 Oktober 2018 tentang Pedoman Laporan Harta Kekayaan Penyelenggara Negara (LHKPN) dan Seputusan Direksi Nomor 0694/SK/DIR-KP/2019 tanggal 20 Juni 2019 Tentang Pedoman Pengendalian Gratifikasi. Comply The Company has established guidelines for controlling gratification and guidelines for reporting LHKPN in the context of anti-corruption and anti-fraud prevention efforts as stated in the Decree of the Directors Number 1155/SK/DIR-KP/2018 dated October 4, 2018, concerning Guidelines for Reporting on State Administrators Wealth (LHKPN) and Decision of the Directors Number 0694/SK/DIR-KP/2019 dated June 20, 2019, concerning Guidelines for Gratification Control.
D.1.3.	Rekomendasi 20: Perusahaan Terbuka memiliki kebijakan tentang seleksi dan peningkatan kemampuan pemasok atau vendor. Penjelasan: Kebijakan tentang seleksi pemasok atau vendor bermanfaat untuk memastikan agar Perusahaan Terbuka memperoleh barang atau jasa yang diperlukan dengan harga yang kompetitif dan kualitas yang baik. Sedangkan kebijakan peningkatan kemampuan pemasok atau vendor bermanfaat untuk memastikan bahwa rantai pasokan (<i>supply chain</i>) berjalan dengan efisien dan efektif. Kemampuan pemasok atau vendor dalam memasok/memenuhi barang atau jasa yang dibutuhkan perusahaan akan mempengaruhi kualitas output perusahaan. Dengan demikian, pelaksanaan kebijakan-kebijakan tersebut dapat menjamin kontinuitas pasokan, baik dari segi kuantitas maupun kualitas yang dibutuhkan Perusahaan Terbuka. Adapun cakupan kebijakan ini meliputi kriteria dalam pemilihan pemasok atau vendor, mekanisme pengadaan yang transparan, upaya peningkatan kemampuan pemasok atau vendor, dan pemenuhan hak-hak yang berkaitan dengan pemasok atau vendor. Perseroan memiliki kebijakan terkait pengadaan barang dan jasa yang berisi tentang seleksi dan peningkatan kemampuan pemasok atau vendor yang tertuang dalam standar Pedoman Procurement. Recommendation 20: The Public Company has a policy regarding the selection and capacity building of suppliers or vendors. Explanation: The policy regarding the selection of suppliers or vendors is useful to ensure that the Public Company obtains the goods or services needed at competitive prices and of good quality. Meanwhile, the policy of increasing the ability of suppliers or vendors is useful to ensure that the supply chain runs efficiently and effectively. The ability of suppliers or vendors to supply/fulfill the goods or services needed by the company will affect the quality of the company's output. Thus, the implementation of these policies can ensure continuity of supply, both in terms of quantity and quality required by the Public Company. The scope of this policy includes criteria for selecting suppliers or vendors, transparent procurement mechanisms, efforts to increase the capacity of suppliers or vendors, and fulfillment of rights related to suppliers or vendors. The Company has a policy related to the procurement of goods and services which contains the selection and improvement of supplier or vendor capabilities as stated in the standard Procurement Guidelines. Faktor negatif aspek *governance process* adalah:

1. Kebijakan, sistem, dan prosedur Bank belum sepenuhnya dilakukan pengkinian secara berkala dengan konsisten. Hal tersebut dikarenakan dalam pelaksanaannya mengutamakan skala prioritas dari kebutuhan Bank;
2. Pelaksanaan supervisi/pengawasan atasan terhadap pegawai yang menjadi kewenangannya dalam hal melaksanakan fungsi dan tugas masing-masing pegawai kiranya perlu ditingkatkan guna mencegah adanya pelanggaran-pelanggaran terhadap ketentuan internal maupun eksternal.

C. *Governance Outcome*

Faktor positif aspek *governance outcome* adalah:

1. Direksi telah mempertanggungjawabkan pelaksanaan tugasnya kepada pemegang saham melalui Rapat Umum Pemegang Saham (RUPS) dan seluruh pelaksanaan tugas dan tanggung jawab Direksi untuk tahun buku 2020 telah diterima oleh RUPS;

Laporan Auditor Independen/ Independent Auditor's Report

Pemegang Saham, Dewan Komisaris dan Direksi/
The Stockholders, Board of Commissioners, and Directors

PT Bank Pembangunan Daerah Jawa Barat & Banten Tbk

Kami telah mengaudit laporan keuangan konsolidasian PT Bank Pembangunan Daerah Jawa Barat & Banten Tbk dan entitas anaknya terlampir, yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2021, serta laporan laba rugi dan penghasilan komprehensif lain, laporan perubahan ekuitas, dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, dan suatu ikhtisar kebijakan akuntansi signifikan dan informasi penjelasan lainnya.

Tanggung jawab manajemen atas laporan keuangan

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Tanggung jawab auditor

Tanggung jawab kami adalah untuk menyatakan suatu opini atas laporan keuangan konsolidasian tersebut berdasarkan audit kami. Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Standar tersebut mengharuskan kami untuk mematuhi ketentuan etika serta merencanakan dan melaksanakan audit untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian tersebut bebas dari kesalahan penyajian material.

We have audited the accompanying consolidated financial statements of PT Bank Pembangunan Daerah Jawa Barat & Banten Tbk and its subsidiaries, which comprise the consolidated statement of financial position as of December 31, 2021, and the consolidated statements of profit or loss and other comprehensive income, changes in equity, and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of such consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on such consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether such consolidated financial statements are free from material misstatement.

THE POWER OF BEING UNDERSTOOD
AUDIT | TAX | CONSULTING

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang angka-angka dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Opini

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian PT Bank Pembangunan Daerah Jawa Barat & Banten Tbk dan entitas anaknya tanggal 31 Desember 2021, serta kinerja keuangan dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Bank Pembangunan Daerah Jawa Barat & Banten Tbk and its subsidiaries as of December 31, 2021, and their consolidated financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

1. Informasi Umum

a. Pendirian dan informasi umum Bank

PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk ("Bank") didirikan berdasarkan Peraturan Pemerintah No. 33 tahun 1960 tentang penentuan perusahaan milik Belanda di Indonesia yang dikenakan nasionalisasi. Salah satu perusahaan milik Belanda yang berkedudukan di Bandung yaitu N.V. Denis (*De Eerste Nederlandsche Indische Shareholding*) terkena ketentuan tersebut dan diserahkan kepada Pemerintah Daerah Provinsi Daerah Tingkat I Jawa Barat. Bank telah mulai beroperasi secara komersial pada tanggal 20 Mei 1961.

Sebagai tindak lanjut dari Peraturan Pemerintah No. 33 tahun 1960, Pemerintah Daerah Provinsi Daerah Tingkat I Jawa Barat mendirikan Bank Karya Pembangunan, dengan Akta Notaris Noezar No. 152 tanggal 21 Maret 1961 dan No. 184 tanggal 13 Mei 1961 yang kemudian dikukuhkan dengan Surat Keputusan Gubernur Provinsi Jawa Barat No. 7/GKDN/BPD/61 tanggal 20 Mei 1961 dengan nama PD Bank Karya Pembangunan Daerah Jawa Barat. Berdasarkan Peraturan Daerah Provinsi Jawa Barat No. 11/PD-DPRD/72 tanggal 27 Juni 1972, kedudukan hukum PD Bank Karya Pembangunan Daerah Jawa Barat dikukuhkan sebagai Perusahaan Daerah yang berusaha di bidang perbankan. Selanjutnya, melalui Peraturan Daerah Provinsi Jawa Barat No. 1/DP-40/PD/1978 tanggal 27 Juni 1978, nama PD Bank Karya Pembangunan Daerah Jawa Barat diubah menjadi Bank Pembangunan Daerah Jawa Barat. Bank Pembangunan Daerah Jawa Barat mendapat sebutan "Bank Jabar" dan logo baru berdasarkan Peraturan Daerah No. 11 tahun 1995.

Berdasarkan Surat Keputusan Direksi Bank Indonesia No. 25/84/KEP/DIR tanggal 2 November 1992, Bank memperoleh status sebagai bank devisa.

Penyesuaian bentuk badan hukum Bank menjadi Perseroan Terbatas dinyatakan dalam Akta Notaris No. 4 tanggal 8 April 1999 yang dibuat di hadapan Notaris Popy Kuntari Sutresna, S.H., M. Hum., yang telah mendapatkan pengesahan dari Menteri Kehakiman dengan Surat Keputusan No. C2-7103.HT.01.01.TH.99 tanggal 16 April 1999 dan diumumkan dalam Berita Negara Republik Indonesia No. 39 tanggal 14 Mei 1999.

1. General Information

a. Establishment and general information about the Bank

PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk (the "Bank") was established based on the Government Regulation No. 33 year 1960 regarding the nationalization of a Dutch-owned company domiciled in Indonesia. The regulation applied to a Dutch - owned company, N.V. Denis (De Eerste Nederlandsche Indische Shareholding), which was then handed over to the Regional Government of West Java Province Level I. The Bank started its commercial operations on May 20, 1961.

Following the Government Regulation No. 33 year 1960, the Regional Government of West Java Province Level I established Bank Karya Pembangunan, as covered by Notarial Deeds No. 152 dated March 21, 1961 and No. 184 dated May 13, 1961 of Noezar which was approved based on Decision Letter of the Governor of West Java Province No. 7/GKDN/BPD/61 dated May 20, 1961, using the name of PD Bank Karya Pembangunan Daerah Jawa Barat. Based on Provincial Government Regulation No. 11/PD-DPRD/72 dated June 27, 1972 of West Java Province, the legal status of PD Bank Karya Pembangunan Daerah Jawa Barat was changed to become a Regional Enterprise engaged in a banking business. Subsequently, based on Provincial Government Regulation No. 1/DP-40/PD/1978 dated June 27, 1978 of West Java Province, PD Bank Karya Pembangunan Daerah Jawa Barat changed its name to Bank Pembangunan Daerah Jawa Barat. Bank Pembangunan Daerah Jawa Barat obtained its trade name of "Bank Jabar" and a new logo based on Provincial Government Regulation No. 11 year 1995.

Based on the Decision Letter No. 25/84/KEP/DIR dated November 2, 1992 of the Directors of Bank Indonesia, the Bank obtained the status of a foreign exchange bank.

The change in the Bank's legal status to a Limited Liability Corporation was stated under Notarial Deed No. 4 dated April 8, 1999 of Popy Kuntari Sutresna, S.H., M. Hum., which was approved by the Minister of Justice in its Decision Letter No. C2-7103.HT.01.01.TH.99 dated April 16, 1999 and was published in the State Gazette No. 39 dated May 14, 1999 of the Republic of Indonesia.

347/BL/2012 tanggal 25 Juni 2012 tentang
"Penyajian dan Pengungkapan Laporan Keuangan
Emiten atau Perusahaan Publik".

Laporan keuangan BJBS disajikan sesuai dengan PSAK 101 (Revisi 2016), "Penyajian Laporan Keuangan Syariah", PSAK 102 (Revisi 2016), "Akuntansi Murabahah", PSAK 104, "Akuntansi Istishna", PSAK 105, "Akuntansi Mudharabah", PSAK 106 (Revisi 2016), "Akuntansi Musyarakah", dan PSAK 107, "Akuntansi Ijarah", PSAK 110 (Revisi 2015) tentang "Akuntansi Sukuk" dan mempertimbangkan Pedoman Akuntansi Perbankan Syariah Indonesia ("PAPSI" Revisi 2013) yang diterbitkan atas kerjasama IAI dengan Bank Indonesia.

Laporan keuangan konsolidasian telah disajikan berdasarkan nilai historis, kecuali untuk beberapa akun yang dinilai menggunakan dasar pengukuran lain sebagaimana dijelaskan pada kebijakan akuntansi dari akun tersebut. Laporan keuangan konsolidasian disusun dengan dasar akrual, kecuali pendapatan dari istishna dan bagi hasil dari pembiayaan mudharabah dan musyarakah serta laporan arus kas konsolidasian.

Laporan arus kas konsolidasian disusun menggunakan metode langsung dan arus kas dikelompokkan atas dasar aktivitas operasi, investasi dan pendanaan. Kas dan setara kas terdiri dari kas, giro pada Bank Indonesia dan giro pada bank lain, penempatan pada Bank Indonesia dan bank lain yang jatuh tempo dalam waktu 3 (tiga) bulan sejak tanggal perolehan, sepanjang tidak digunakan sebagai jaminan atas pinjaman yang diterima serta tidak dibatasi penggunaannya.

Mata uang penyajian yang digunakan dalam laporan keuangan konsolidasian adalah Rupiah, yang merupakan mata uang fungsional. Angka-angka yang disajikan dalam laporan keuangan, kecuali bila dinyatakan secara khusus adalah dibulatkan dalam jutaan Rupiah.

b. Prinsip konsolidasian

Laporan keuangan konsolidasian mencakup laporan keuangan Bank dan entitas anak seperti disebutkan pada Catatan 1.g.

Entitas anak adalah entitas yang dikendalikan oleh Bank, yakni Bank terekspos, atau memiliki hak atas imbal hasil variable dari keterlibatannya dengan entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kemampuan kini untuk mengarahkan aktivitas relevan dari entitas (kekuasaan atas *investee*).

Keberadaan dan dampak dari hak suara potensial dimana Bank memiliki kemampuan praktis untuk melaksanakan (yakni hak substantif) dipertimbangkan

"Guidelines on Financial Statements Presentations
and Disclosures for Issuers or Public Companies".

The financial statements of BJBS have been presented in conformity with SFAS 101 (Revised 2016), "Sharia Financial Statements Presentation", SFAS 102 (Revised 2016), "Accounting for Murabahah", SFAS 104, "Accounting for Istishna", SFAS 105, "Accounting for Mudharabah", SFAS 106 (Revised 2016), "Accounting for Musyarakah", and SFAS 107, "Accounting for Ijarah", SFAS 110 (Revised 2015) "Accounting for Sukuk" and considering the Accounting Guidelines for Indonesian Sharia Banks ("PAPSI" Revised 2013) issued by Bank Indonesia in cooperation with IAI.

The consolidated financial statements have been prepared on a historical cost basis, except for some accounts that were assessed using another measurement basis as explained in the accounting policies of the account. The consolidated financial statements have been prepared on accrual basis, except for the revenue from istishna and the profit sharing from the mudharabah and musyarakah financing and the consolidated statement of cash flow.

The consolidated statement of cash flows has been prepared using the direct method and the cash flows have been classified based on operating, investing, and financing activities. Cash and cash equivalents consist of cash, current accounts with Bank Indonesia and other banks, placements with Bank Indonesia and other banks maturing within 3 (three) months or less from the acquisition date, provided they are not used as collateral for borrowings nor restricted.

The presentation currency used in the consolidated financial statements is Indonesian Rupiah, which is the Bank and its subsidiaries' functional currency. Unless otherwise stated, all figures presented in the consolidated financial statements are rounded off to millions of Rupiah.

b. Principles of consolidation

The consolidated financial statements incorporate the financial statements of the Bank and its subsidiaries as described in Note 1.g.

A subsidiary is an entity controlled by the Bank, the Bank is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its current ability to direct the entity's relevant activities (power over the investee).

The existence and effect of substantive potential voting rights that the Bank has the practical ability to exercise (ie substantive rights) are considered

saat menilai apakah Bank mengendalikan entitas lain.

when assessing whether the Bank controls another entity.

Laporan keuangan Bank dan entitas anak mencakup hasil usaha, arus kas, aset dan liabilitas dari Bank dan seluruh entitas anak yang, secara langsung dan tidak langsung, dikendalikan oleh Bank. Entitas anak dikonsolidasikan sejak tanggal efektif akuisisi, yaitu tanggal dimana Bank dan entitas anak secara efektif memperoleh pengendalian atas bisnis yang diakuisisi, sampai tanggal pengendalian berakhir.

The Bank and its subsidiaries' financial statements incorporate the results, cash flows, assets, and liabilities of the Bank and all of its directly and indirectly controlled subsidiaries. Subsidiaries are consolidated from the effective date of acquisition, which is the date on which the Bank effectively obtains control of the acquired business, until that control ceases.

Entitas induk menyusun laporan keuangan konsolidasian dengan menggunakan kebijakan akuntansi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Seluruh transaksi, saldo, penghasilan, beban, dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam kelompok usaha dieliminasi secara penuh.

A parent prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumstances. All intra-group transactions, balances, income, expenses, and cash flows relating to transactions between entities of the group are eliminated in full.

Bank dan entitas anak mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit. Bank dan entitas anak menyajikan kepentingan non-pengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

The Bank and its subsidiaries attributed the profit or loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results in the non-controlling interests having a deficit balance. The Bank and its subsidiaries presents non-controlling interest in equity in the consolidated statement of financial position, separately from the equity owners of the parent.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian adalah transaksi ekuitas (yaitu transaksi dengan pemilik dalam kapasitasnya sebagai pemilik). Ketika proporsi ekuitas yang dimiliki oleh kepentingan non-pengendali berubah, Bank dan entitas anak menyesuaikan jumlah tercatat kepentingan pengendali dan kepentingan non-pengendali untuk mencerminkan perubahan kepemilikan relatifnya dalam entitas anak. Selisih antara jumlah tercatat kepentingan non-pengendali yang disesuaikan dan nilai wajar dari jumlah yang diterima atau dibayarkan diakui langsung dalam ekuitas dan diatribusikan pada pemilik dari entitas induk.

Changes in the parent's ownership interest in a subsidiary that do not result in loss of control are equity transactions (ie transactions with owners in their capacity as owners). When the proportion of equity held by non-controlling interest change, the Bank and its subsidiaries adjusted the carrying amounts of the controlling interest and non-controlling interest to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent.

Jika Bank dan entitas anak kehilangan pengendalian, maka Bank dan entitas anak akan:

If the Bank and its subsidiaries loses control, so Bank and its subsidiaries will:

- a) Menghentikan pengakuan aset (termasuk goodwill) dan liabilitas entitas anak pada jumlah tercatatnya ketika pengendalian hilang;
- b) Mengakui nilai wajar pembayaran yang diterima (jika ada) dari transaksi, peristiwa, atau keadaan yang mengakibatkan hilangnya pengendalian;
- c) Mengakui sisa investasi pada entitas anak terdahulu pada nilai wajarnya pada tanggal hilangnya pengendalian;
- d) Mereklasifikasi ke laba rugi, atau mengalihkan secara langsung ke saldo laba jika disyaratkan oleh SAK lain, jumlah yang diakui dalam

- (a) Derecognise the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost;
- (b) Recognise the fair value of the consideration received (if any) from the transaction, event or circumstances that resulted in the loss of control;
- (c) Recognise any investment retained in the former subsidiary at fair value at the date when control is lost;
- (d) Reclassify to profit or loss, or transfer directly to retained earnings if required by other FAS, the amount recognized in other

c. Penjabaran mata uang asing

Transaksi dalam mata uang asing dijabarkan ke mata uang rupiah dengan menggunakan kurs yang berlaku pada tanggal transaksi. Pada tanggal laporan posisi keuangan konsolidasian, aset dan liabilitas moneter dalam mata uang asing dijabarkan dengan menggunakan kurs yang berlaku pada tanggal laporan posisi keuangan konsolidasian.

Keuntungan dan kerugian selisih kurs yang timbul dari transaksi dalam mata uang asing dan dari penjabaran aset dan liabilitas moneter dalam mata uang asing diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan.

Laba atau rugi kurs valuta asing atas aset dan liabilitas moneter merupakan selisih antara biaya perolehan diamortisasi dalam Rupiah pada awal tahun, disesuaikan dengan tingkat suku bunga efektif dan pembayaran selama tahun berjalan, dan biaya perolehan diamortisasi dalam valuta asing yang dijabarkan ke dalam Rupiah dengan menggunakan kurs pada akhir tahun.

Aset dan liabilitas non-moneter dalam mata uang asing dijabarkan dengan menggunakan kurs pada tanggal transaksi.

Berikut ini adalah kurs mata uang asing utama yang digunakan untuk penjabaran dalam rupiah pada 31 Desember 2021 dan 2020 yang menggunakan kurs tengah berdasarkan *Reuters* (pukul 16.00 Waktu Indonesia Barat) (dalam Rupiah penuh).

comprehensive income in relation to the subsidiary;

- (e) Recognise any resulting difference as a gain or loss attributable to the parent.

c. Foreign currency translation

Transactions denominated in foreign currencies are converted into rupiah at the exchange rates prevailing at the dates of the transactions. At the consolidated statement of financial position, monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates prevailing at such date.

Exchange gains and losses arising from transactions denominated in foreign currencies and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of profit and loss and other comprehensive income for the current year.

The foreign currency gains or losses on monetary assets and liabilities are the difference between amortized cost in Rupiah at the beginning of the year, adjusted for effective interest rate and payments during the year, and the amortized cost in foreign currency translated into Rupiah using the exchange rate at the end of the year.

Non-monetary assets and liabilities denominated in foreign currencies are translated using the exchange rates prevailing at the transaction date.

d. Aset dan liabilitas keuangan

Aset keuangan Bank dan entitas anak terdiri dari kas, giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, tagihan derivatif, surat-surat berharga, efek-efek yang dibeli dengan janji dijual kembali, wesel ekspor dan tagihan lainnya, kredit yang diberikan dan pembiayaan syariah, tagihan akseptasi, penyertaan saham, bunga yang masih harus diterima, dan aset lain-lain (setoran jaminan).

Liabilitas keuangan Bank dan entitas anak terdiri dari liabilitas segera, simpanan nasabah, simpanan dari bank lain, liabilitas derivatif, efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi, efek hutang yang diterbitkan, pinjaman yang diterima, bunga yang masih harus dibayar, liabilitas lain-lain.

Bank dan entitas anak, menerapkan PSAK 60 (Revisi 2016), "Instrumen Keuangan: Pengungkapan". Penerapan PSAK ini tidak menimbulkan pengaruh yang signifikan terhadap pelaporan keuangan dan pengungkapan dalam laporan keuangan konsolidasian.

Bank dan entitas anak menerapkan PSAK 68, "Pengukuran Nilai Wajar". Penerapan PSAK ini mendefinisikan nilai wajar, menetapkan dalam satu pernyataan, suatu kerangka pengukuran nilai wajar dan mensyaratkan pengungkapan mengenai pengukuran dan hierarki nilai wajar.

Bank dan entitas anak selain BJBS menerapkan PSAK 71, "Instrumen Keuangan" efektif sejak tanggal 1 Januari 2020, yang menggantikan PSAK 55, "Instrumen Keuangan: Pengakuan dan Pengukuran".

(i) Klasifikasi

Bank dan entitas anak mengklasifikasikan aset keuangannya berdasarkan kategori sebagai berikut pada saat pengakuan awal:

1. Aset keuangan yang diukur pada nilai wajar melalui laba rugi;
2. Aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain;
3. Aset keuangan yang diukur pada biaya perolehan diamortisasi.

Model bisnis merefleksikan bagaimana kelompok aset keuangan dikelola untuk mencapai tujuan bisnis tertentu.

Bank dan entitas anak melakukan pengujian karakteristik arus kas kontraktual dari aset keuangan yang dikelola untuk mengetahui karakteristik arus kas kontraktual berasal hanya dari pembayaran pokok dan bunga dari jumlah pokok terutang (*Solely*

Payment of Principal and Interest atau *Pass SPPI*) yang konsisten dengan pengaturan pinjaman dasar (*Basic Lending Agreement*). Dalam melakukan penilaian, Bank dan entitas anak mempertimbangkan:

- Imbalan untuk nilai waktu dari uang;
- *Leverage*;
- Variabilitas pada waktu dan jumlah arus kas;
- Instrumen yang terkait secara kontraktual;
- Pembayaran dipercepat;
- Ketentuan kontrak tidak sah dan *de minimis*.

Aset keuangan diukur pada biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

- Aset keuangan yang dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual; dan
- Arus kas kontraktual tersebut semata dari pembayaran pokok dan bunga (SPPI).

Aset keuangan diukur pada nilai wajar melalui penghasilan komprehensif lain (FVTOCI) jika kedua kondisi berikut:

- Aset keuangan yang dikelola untuk mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
- Arus kas kontraktual tersebut semata dari pembayaran pokok dan bunga (SPPI).

Aset keuangan diklasifikasikan pada nilai wajar melalui laba rugi (FVTPL) jika tidak memenuhi kondisi yang disyaratkan untuk diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

Pada saat pengakuan awal, Bank dan entitas anak dapat membuat pilihan yang tidak dapat dibatalkan untuk menyajikan instrumen ekuitas yang bukan dimiliki untuk diperdagangkan pada nilai wajar melalui penghasilan komprehensif lain.

Liabilitas keuangan diklasifikasikan ke dalam kategori sebagai berikut pada saat pengakuan awal:

- I. Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi, yang memiliki 2 (dua) sub-klasifikasi, yaitu liabilitas keuangan yang ditetapkan demikian pada saat pengakuan awal dan diklasifikasikan dalam kelompok diperdagangkan;
- II. Liabilitas keuangan lain. Liabilitas keuangan lainnya merupakan liabilitas keuangan yang tidak dimiliki untuk dijual atau ditentukan sebagai nilai wajar melalui laba rugi saat pengakuan liabilitas.

(ii) Pengakuan awal

- Pembelian atau penjualan aset keuangan yang memerlukan penyerahan aset dalam kurun waktu yang telah ditetapkan oleh peraturan dan kebiasaan yang berlaku di pasar (pembelian secara reguler) diakui pada tanggal penyelesaian, seperti tanggal perusahaan berkomitmen untuk membeli atau menjual aset.
- Aset keuangan dan liabilitas keuangan pada awalnya diukur pada nilai wajarnya. Dalam hal aset keuangan atau liabilitas keuangan tidak diukur pada nilai wajar melalui laporan laba rugi, nilai wajar tersebut ditambah biaya transaksi yang dapat diatribusikan secara langsung. Pengukuran aset keuangan dan liabilitas keuangan setelah pengakuan awal tergantung pada klasifikasinya.

Biaya transaksi hanya meliputi biaya-biaya yang dapat diatribusikan secara langsung untuk perolehan suatu aset keuangan atau penerbitan suatu liabilitas keuangan dan merupakan biaya tambahan yang tidak akan terjadi apabila instrumen keuangan tersebut tidak diperoleh atau diterbitkan. Untuk aset keuangan, biaya transaksi ditambahkan pada

(ii) Initial recognition

- Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way purchases) are recognized on the settlement date, i.e., the date that the companies commit to purchase or sell the assets.
- Financial assets and liabilities are initially recognized at fair value. For those financial assets and liabilities not measured at fair value through profit and loss, plus directly attributable transaction costs. The subsequent measurement of financial assets and liabilities depends on their classification.

Transaction costs only include costs that are directly attributable to the acquisition of a financial asset or issuance of a financial liability and an additional charge that would not occur if the instrument is not acquired or issued. For financial assets, transaction costs are added to the amount recognized in the initial recognition of the asset, while for financial

jumlah yang diakui pada awal pengakuan aset, sedangkan untuk liabilitas keuangan, biaya transaksi dikurangkan dari jumlah utang yang diakui pada pengakuan awal liabilitas. Biaya transaksi tersebut diamortisasi selama umur instrumen berdasarkan metode suku bunga efektif dan dicatat sebagai bagian dari pendapatan bunga untuk biaya transaksi sehubungan dengan aset keuangan atau sebagai bagian dari beban bunga untuk biaya transaksi sehubungan dengan liabilitas keuangan.

Bank dan entitas anak, pada pengakuan awal, dapat menetapkan aset keuangan dan liabilitas keuangan tertentu sebagai nilai wajar melalui laba rugi (opsi nilai wajar). Opsi nilai wajar dapat digunakan hanya bila memenuhi ketentuan sebagai berikut:

- penetapan sebagai opsi nilai wajar mengurangi atau mengeliminasi ketidak-konsistenan pengukuran dan pengakuan (*accounting mismatch*) yang dapat timbul;
- aset keuangan dan liabilitas keuangan merupakan bagian dari portofolio instrumen keuangan yang risikonya dikelola dan dilaporkan kepada manajemen kunci berdasarkan nilai wajar; atau
- aset keuangan dan liabilitas keuangan terdiri dari kontrak utama dan derivatif melekat yang harus dipisahkan, tetapi tidak dapat mengukur derivatif melekat secara terpisah.

(iii) Pengukuran setelah pengakuan awal

Aset keuangan dalam kelompok aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan aset keuangan dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi diukur pada nilai wajarnya.

Aset keuangan kelompok biaya perolehan diamortisasi dan liabilitas keuangan lainnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif.

(iv) Penghentian pengakuan

- a. Aset keuangan dihentikan pengakuannya jika:
- Hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau
 - Bank dan entitas anak mentransfer hak untuk menerima arus kas yang berasal dari aset keuangan atau menanggung liabilitas untuk membayarkan arus kas yang diterima tersebut secara penuh tanpa

liabilities, transaction costs are deducted from the amount of debt recognized on initial recognition of a liability. The transaction costs are amortized over the terms of the instrument based on the effective interest rate method and recorded as part of interest income for transaction costs related to the financial asset or as part of interest expense for transaction costs related to financial liabilities.

The Bank and its subsidiaries, upon initial recognition, may designate certain financial assets and liabilities, at fair value through profit or loss (fair value option). The fair value option is only applied when the following conditions are met:

- *the application of the fair value option reduces or eliminates an accounting mismatch that would otherwise arise;*
- *the financial assets and liabilities are part of a portfolio of financial instruments, the risks of which are managed and reported to key management on a fair value basis; or*
- *the financial assets and liabilities consist of a host contract and an embedded derivative that must be bifurcated, but unable to measure the embedded derivative separately.*

(iii) Subsequent measurement

Financial assets at fair value through other comprehensive income and financial assets and financial liabilities at fair value through profit or loss are measured at fair value.

Financial assets classified as amortized cost and other financial liabilities measured at amortized cost using the effective interest rate method.

(iv) Derecognition

- a. *Financial assets are derecognized when:*
- *The contractual rights to receive cash flows from the financial assets have expired; or*
 - *The Bank and its subsidiaries have transferred its rights to receive cash flows from the financial assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party*

penundaan berarti kepada pihak ketiga di bawah kesepakatan pelepasan (*pass-through arrangement*); dan

- Antara (a) Bank dan entitas anak telah mentransfer secara substansial seluruh risiko dan manfaat atas aset, atau (b) Bank dan entitas anak tidak mentransfer maupun tidak memiliki secara substansial seluruh risiko dan manfaat atas aset, namun telah mentransfer kendali atas aset.

Ketika Bank dan entitas anak telah mentransfer hak untuk menerima arus kas dari aset atau di bawah kesepakatan pelepasan (*pass-through arrangement*), dan tidak mentransfer serta tidak mempertahankan secara substansial seluruh risiko dan manfaat atas aset dan masih memiliki pengendalian atas aset, aset diakui sebesar keterlibatan Bank dan entitas anak yang berkelanjutan atas aset tersebut.

Kredit yang diberikan atau aset keuangan lain dihapusbukukan ketika tidak terdapat prospek yang realistis mengenai pengembalian kredit dalam waktu dekat atau hubungan normal dengan debitur telah berakhir. Kredit yang tidak dapat dilunasi dihapusbukukan dengan mendebit cadangan kerugian penurunan nilai.

- b. Liabilitas keuangan dihentikan pengakuannya jika liabilitas keuangan tersebut berakhir, yaitu ketika liabilitas yang ditetapkan dalam kontrak dilepaskan atau dibatalkan atau kadaluwarsa.

Jika suatu liabilitas keuangan yang ada digantikan dengan yang lain oleh pemberi pinjaman yang sama pada keadaan yang secara substansial berbeda, atau berdasarkan suatu liabilitas yang ada yang secara substansial telah diubah, seperti pertukaran atau modifikasi yang diperlakukan sebagai penghentian pengakuan liabilitas awal dan pengakuan liabilitas baru, dan perbedaan nilai tercatat masing-masing diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

and

- Either (a) the Bank and its subsidiaries has transferred substantially all the risks and rewards of the asset, or (b) the Bank and its subsidiaries has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Bank and its subsidiaries has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Bank and its subsidiaries' continuing involvement in the asset.

Loans or other financial assets are written off when there is no realistic prospect of collection in the near future or the normal relationship with the borrowers has ceased to exist. When a loan is deemed uncollectible, it is written off against the related allowance for impairment losses.

- b. Financial liabilities are derecognized when they are extinguished, i.e. liabilities stated in the contract are released or cancelled or have expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the consolidated statement of profit and loss and other comprehensive income.

(vii) Saling hapus

Aset keuangan dan liabilitas keuangan dilakukan saling hapus dan nilai bersihnya disajikan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, Bank dan entitas anak memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut dan adanya maksud untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

Pendapatan dan beban disajikan dalam jumlah bersih hanya jika diperkenankan oleh Standar Akuntansi Keuangan.

(viii) Pengukuran biaya diamortisasi

Biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan adalah jumlah aset keuangan atau liabilitas keuangan yang diukur pada saat pengakuan awal dikurangi pembayaran pokok pinjaman, ditambah atau dikurangi amortisasi kumulatif menggunakan metode suku bunga efektif yang dihitung dari selisih antara nilai pengakuan awal dan nilai jatuh temponya, dan dikurangi penurunan nilai.

(ix) Pengukuran nilai wajar

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

classification through profit or loss is recorded at fair value. Unrealized gains or losses are reclassified to profit or loss.

Reclassification of financial assets from fair value classifications through other comprehensive income to the amortized cost classification is recorded at carrying value. Unrealized gains or losses is removed from equity and adjusted against the fair value.

Reclassifications on financial assets from fair value classification through profit or loss to fair value classification through other comprehensive income are recorded at fair value.

Reclassification of financial assets from fair value classification through profit or loss to amortized cost classification is recorded at fair value.

(vii) Offsetting

Financial assets and liabilities are off-set and the net amount is presented in the consolidated statement of financial position when, and only when, the Bank and its subsidiaries have a legal right to off-set the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the Financial Accounting Standards.

(viii) Amortized cost measurement

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest rate method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

(ix) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell an asset or paid to transfer a liability takes place either:

- di pasar utama untuk aset dan liabilitas tersebut; atau
- jika tidak terdapat pasar utama, dipasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomik terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomik dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Bank dan entitas anak menggunakan teknik penilaian yang sesuai dalam keadaan dan dimana data yang memadai tersedia untuk mengukur nilai wajar, memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Pada saat nilai wajar dari *unlisted equity instruments* tidak dapat ditentukan dengan handal, instrumen tersebut dinilai sebesar biaya perolehan dikurangi dengan penurunan nilai. Nilai wajar atas pinjaman yang diberikan dan piutang, serta liabilitas kepada bank dan nasabah ditentukan menggunakan nilai berdasarkan arus kas kontraktual, dengan mempertimbangkan kualitas kredit, likuiditas, dan biaya.

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan konsolidasian dapat dikategorikan pada level hierarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

- Level 1: harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran;
- Level 2: input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung;
- Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

Untuk aset dan liabilitas yang diakui pada laporan keuangan konsolidasian secara berulang, Bank dan entitas anak menentukan apakah terjadi transfer antara level di dalam

- *in the principal market for the assets and liabilities; or*
- *in the absence of a principal market, in the most advantageous market for the asset or liability.*

The fair value of an asset or a liability is measured using the assumptions that market participants would use when determining the price of the asset and liability assuming that market participants act in their own economic best interest.

A fair value measurement of non-financial assets considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to other market participants that would use the asset in its highest and best use.

The Bank and its subsidiaries use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

In cases when the fair value of unlisted equity instruments cannot be determined reliably, the instruments are carried at cost less impairment value. The fair value for loans and receivables as well as liabilities to banks and customers are determined using a present value model on the basis of contractually agreed cash flows, taking into account credit quality, liquidity and costs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are classified within fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole:

- *Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities accessible at the measurement date;*
- *Level 2: inputs other than quoted prices included in level 1 for the asset and liability, which is directly or indirectly observable;*
- *Level 3: unobservable inputs for the asset and liability.*

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, Bank and its subsidiaries determine whether transfers have occurred

hierarki dengan cara mengevaluasi kategori (berdasarkan input level terendah yang signifikan dalam pengukuran nilai wajar) setiap akhir periode pelaporan.

Untuk tujuan pengungkapan nilai wajar, Bank dan entitas anak telah menentukan kelas aset dan liabilitas berdasarkan sifat, karakteristik, risiko aset dan liabilitas, dan level hierarki nilai wajar (Catatan 40).

(x) Aset Keuangan Sukuk

Pada saat pengakuan awal, Bank dan entitas anak menentukan klasifikasi investasi pada sukuk sebagai diukur pada biaya perolehan atau diukur pada nilai wajar.

Investasi pada sukuk ijarah dan sukuk mudharabah setelah pengakuan awal, diukur sebagai berikut:

a. Diukur pada biaya perolehan

- Investasi tersebut dimiliki dalam suatu model usaha yang bertujuan utama untuk memperoleh arus kas kontraktual dan terdapat persyaratan kontraktual dalam menentukan tanggal tertentu atas pembayaran pokok dan atau hasilnya;
- Biaya perolehan sukuk termasuk biaya transaksi;
- Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk;
- Rugi penurunan nilai diakui jika jumlah terpulihkan lebih kecil dari jumlah tercatat dan disajikan sebagai rugi penurunan nilai di dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

b. Diukur pada nilai wajar melalui laba rugi

- Nilai wajar ditentukan dengan mengacu pada urutan sebagai berikut:
 - Kuotasi harga di pasar aktif;
 - Harga yang terjadi dari transaksi terkini, apabila tidak ada kuotasi harga di pasar aktif;
 - Nilai wajar instrumen sejenis, apabila tidak ada kuotasi harga di pasar aktif dan tidak ada harga yang terjadi dari transaksi terkini.
- Biaya perolehan sukuk tidak termasuk biaya transaksi;

between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the fair value disclosures purposes, Bank and its subsidiaries has determined classes of assets and liabilities based on the nature, characteristics, risks of the asset and liability, and the level of the fair value hierarchy (Note 40).

(x) Sukuk Financial Asset

At initial recognition, Bank and its subsidiaries determines the classification of investments in sukuk either measured at cost or fair value.

After the initial recognition, investment in ijarah sukuk and mudharabah sukuk is measured as follows:

a. Measured at cost

- The investment is held in a business model whereby the primary goal is to obtain contractual cash flows and has contractual terms in determining the specific date of principal payments and or the results;
- Sukuk acquisition cost includes transaction cost;
- The difference between the acquisition cost and the nominal value is amortized on a straight-line basis over the period of the sukuk;
- Impairment loss is recognized if the recoverable amount is less than the carrying amount and is presented as an impairment loss in the consolidated statement of profit or loss and other comprehensive income.

b. Measured at fair value through profit or loss

- The fair value is determined with reference to the following order:
 - Quoted price in active market;
 - Price from the current transaction, if there is no available price quotations in an active market;
 - Fair value of similar instrument, if there is no available price quotations in an active market and no price from the current transaction.
- Sukuk acquisition cost does not include transaction cost;

k. Loans

Loans represent the lending of money or equivalent receivables under contracts with borrowers, where the borrowers are required to repay their debts with interest after a specified period of time.

Loans are initially measured at fair value plus transaction cost that are directly attributable and additional cost to obtain the financial assets. Subsequently measured at their amortized cost using the effective interest rate method, net of allowance for impairment losses.

Kredit yang diberikan diklasifikasikan sebagai biaya perolehan yang telah diamortisasi. Kredit yang diberikan dalam pinjaman sindikasi ataupun penerusan kredit dinyatakan sebesar pokok kredit sesuai dengan porsi risiko yang ditanggung oleh Bank dan entitas anak.

Kredit yang direstrukturisasi disajikan sebesar nilai yang lebih rendah antara nilai tercatat kredit pada tanggal restrukturisasi atau nilai tunai penerimaan kas masa depan setelah restrukturisasi. Kerugian akibat selisih antara nilai tercatat kredit pada tanggal restrukturisasi dengan nilai tunai penerimaan kas masa depan setelah restrukturisasi diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Setelah restrukturisasi, semua penerimaan kas masa depan yang ditetapkan dalam persyaratan baru dicatat sebagai pengembalian pokok kredit yang diberikan dan pendapatan bunga sesuai dengan syarat-syarat restrukturisasi.

Kredit yang diberikan dihapusbukukan ketika tidak terdapat prospek yang realistis mengenai pengembalian kredit atau hubungan antara Bank dan entitas anak dengan debitur telah berakhir. Kredit yang tidak dapat dilunasi dihapusbukukan dengan mendebit cadangan kerugian penurunan nilai.

Lihat Catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

I. Pembiayaan/piutang syariah

Pembiayaan/piutang berdasarkan prinsip syariah adalah penyediaan uang atau tagihan yang dapat disamakan dengan itu, yang timbul dari transaksi berdasarkan prinsip jual beli dan bagi hasil antara Bank dan entitas anak dengan pihak lain selama jangka waktu tertentu.

Piutang tersebut meliputi piutang murabahah, piutang istishna dan qardh, untuk pembiayaan meliputi pembiayaan mudharabah dan pembiayaan musyarakah.

Murabahah adalah akad jual beli antara nasabah dengan Bank dan entitas anak, dimana Bank dan entitas anak membiayai kebutuhan investasi dan modal kerja nasabah yang dijual dengan harga pokok ditambah dengan keuntungan yang diketahui dan disepakati bersama. Pembayaran atas pembiayaan ini dilakukan dengan cara mengangsur dalam jangka waktu yang ditentukan.

Piutang murabahah pada awalnya diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung dan merupakan biaya tambahan untuk memperoleh aset keuangan tersebut dan setelah pengakuan awal diukur pada biaya perolehan diamortisasi menggunakan metode margin efektif dikurangi dengan cadangan kerugian penurunan nilai.

Loans are classified as amortized cost. Loans under syndication or channeling are stated at the principal amount equal to the risk portion assumed by the Bank and its subsidiaries.

Restructured loans are stated at the lower of carrying value on the date of restructuring or value of the future cash receipts after the restructuring. Losses resulting from the difference between the carrying value on the date of restructuring the present value of future cash receipts after the restructuring is recognized in the consolidated statement of profit or loss and other comprehensive income. After the restructuring, all future cash receipts specified by the new terms are recorded as a return of principal loans and interest income in accordance with the terms of the restructuring.

Loans are written off when there is no realistic prospect of collection or when the Bank and its subsidiaries relationship with the borrowers has ended. Loans that cannot be repaid are written-off by debiting the allowance for impairment losses.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

I. Sharia financing/receivables

Sharia financing/receivables is receivables from providing funds or other similar form of receivables arising from transactions carried out based on sale or purchase arrangements and profit sharing between Bank and its subsidiaries and other parties for a certain period of time.

Such receivables consist of receivables arising from murabahah transactions, istishna transactions dan qardh transactions, for financing consist of mudharabah financing and musyarakah financing.

Murabahah is a sale or purchase contract between the customer and Bank and its subsidiaries, whereby Bank and its subsidiaries finances the investment and working capital needs of the customer sold with a principal price plus a certain margin that is mutually informed and agreed upon. Repayment on this financing is made in installments within a specified period.

Murabahah receivables initially measured at fair value plus directly attributable transaction cost and is an additional cost to obtain the respective financial assets, and after the initial recognition murabahah receivables are measured at amortized cost using the effective margin method less any allowance for impairment losses.

m. Identifikasi dan pengukuran penurunan nilai atas aset keuangan

Bank dan entitas anak mengakui penyisihan kerugian kredit ekspektasian pada instrumen keuangan yang tidak diukur pada nilai wajar melalui laba rugi.

Tidak ada penyisihan kerugian kredit ekspektasian pada investasi instrumen ekuitas.

Bank dan entitas anak mengukur cadangan kerugian sejumlah kerugian kredit ekspektasian sepanjang umurnya, kecuali untuk hal berikut, diukur sejumlah kerugian kredit ekspektasian 12 bulan:

- i. Instrumen utang yang memiliki risiko kredit rendah pada tanggal pelaporan; dan
- ii. Instrumen keuangan lainnya yang risiko kreditnya tidak meningkat secara signifikan sejak pengakuan awal.

Bank dan entitas anak menganggap instrumen utang memiliki risiko kredit yang rendah ketika peringkat risiko kreditnya setara dengan definisi *investment grade* yang dipahami secara global.

Kerugian kredit ekspektasian 12 bulan adalah bagian dari kerugian kredit ekspektasian sepanjang umurnya yang merepresentasikan kerugian kredit ekspektasian yang timbul dari peristiwa gagal bayar instrumen keuangan yang mungkin terjadi dalam 12 bulan setelah tanggal pelaporan.

Pengukuran kerugian kredit ekspektasian

Kerugian kredit ekspektasian adalah estimasi probabilitas tertimbang dari kerugian kredit yang diukur sebagai berikut:

- i. aset keuangan yang tidak memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini dari seluruh kekurangan kas (yaitu selisih antara arus kas yang terutang kepada Bank dan entitas anak sesuai dengan kontrak dan arus kas yang diperkirakan akan diterima oleh Bank dan entitas anak);
- ii. aset keuangan yang memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara jumlah tercatat bruto dan nilai kini arus kas masa depan yang diestimasi;
- iii. komitmen pinjaman yang belum ditarik, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini jumlah arus kas jika komitmen ditarik dan arus kas yang diperkirakan akan diterima oleh Bank dan entitas anak;
- iv. kontrak jaminan keuangan, kerugian kredit ekspektasian diukur sebesar selisih antara pembayaran yang diperkirakan untuk mengganti pemegang atas kerugian kredit yang terjadi dikurangi jumlah yang diperkirakan dapat dipulihkan.

m. Identification and measurement of impairment for financial assets

The Bank and its subsidiaries recognize the allowance for expected credit losses on financial instruments that are not measured at fair value through profit or loss.

There is no allowance for expected credit losses on investment in equity instruments.

The Bank and its subsidiaries measure the allowance for losses for the lifetime of an expected credit losses, except for the following, which are measured according to 12 months expected credit losses:

- i. Debt instruments that have low credit risk at the reporting date; and
- ii. Other financial instruments for which credit risk has not increased significantly since initial recognition.

The Bank and its subsidiaries consider debt instruments to have low credit risk when the credit risk rating is at par with the globally understood definition of investment grade.

The 12-month expected credit loss is part of the expected credit loss throughout its lifetime that represents an expected credit loss arising from a default on financial instruments that might occur within 12 months after reporting date.

Measurement of expected credit losses

Expected credit loss is an estimate of the weighted probability of a credit loss measured as follows:

- i. financial assets that do not deteriorate at the reporting date, the expected credit loss is measured at the difference between the present value of all cash shortages (i.e. the difference between the cash flows owed to the Bank and its subsidiaries in accordance with the contract and the cash flows expected to be received by the Bank and its subsidiaries);
- ii. financial assets that deteriorate at the reporting date, the expected credit loss is measured at the difference between the gross carrying amount and the present value of estimated future cash flows;
- iii. for undisbursed loan commitments, expected credit losses are measured at the difference between the present value of the amount of cash flow if the commitments is withdrawn and the cash flow expected to be received by the Bank and its subsidiaries;
- iv. for financial guarantee contracts, expected credit losses are measured at the difference between the estimated payments to replace the holder for the credit losses incurred less the amount estimated to be recoverable.

Aset keuangan yang direstrukturasasi

Jika ketentuan aset keuangan dinegosiasikan ulang atau dimodifikasi atau aset keuangan yang ada diganti dengan yang baru karena kesulitan keuangan peminjam, maka dilakukan penilaian apakah aset keuangan yang ada harus dihentikan pengakuannya dan kerugian kredit ekspektasian diukur sebagai berikut:

- i. Jika restrukturisasi tidak mengakibatkan penghentian pengakuan aset yang ada, maka arus kas yang diperkirakan yang timbul dari aset keuangan yang dimodifikasi dimasukkan dalam perhitungan kekurangan kas dari aset yang ada;
- ii. Jika restrukturisasi akan menghasilkan penghentian pengakuan aset yang ada, maka nilai wajar aset baru diperlakukan sebagai arus kas akhir dari aset keuangan yang ada pada saat penghentian pengakuannya. Jumlah ini dimasukkan dalam perhitungan kekurangan kas dari aset keuangan yang ada yang didiskontokan dari tanggal penghentian pengakuan ke tanggal pelaporan menggunakan suku bunga efektif awal dari aset keuangan yang ada.

Aset keuangan yang memburuk

Pada setiap tanggal pelaporan, Bank dan entitas anak menilai apakah aset keuangan yang dicatat pada biaya perolehan diamortisasi dan aset keuangan instrumen utang yang dicatat pada nilai wajar melalui penghasilan komprehensif lain mengalami penurunan nilai kredit (memburuk). Aset keuangan memburuk ketika satu atau lebih peristiwa yang memiliki dampak merugikan atas estimasi arus kas masa depan dari aset keuangan telah terjadi.

Bukti objektif bahwa aset keuangan mengalami penurunan nilai meliputi wanprestasi atau tunggakan pembayaran oleh debitur, restrukturisasi kredit atau tagihan oleh Bank dan entitas anak dengan persyaratan yang tidak mungkin diberikan jika debitur tidak mengalami kesulitan keuangan, indikasi bahwa debitur atau penerbit akan dinyatakan pailit, hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan, atau data yang dapat diobservasi lainnya yang terkait dengan kelompok aset keuangan seperti memburuknya status pembayaran debitur atau penerbit dalam kelompok tersebut, atau kondisi ekonomi yang berkorelasi dengan wanprestasi atas aset dalam kelompok tersebut.

Restructured financial assets

If the terms of the financial assets are renegotiated or modified or the existing financial assets are replaced with new ones due to the borrower's financial difficulties, an assessment is made whether recognition of existing financial assets must be derecognized and expected credit losses measured as follows:

- i. *If the restructuring does not result in the termination of recognition of existing assets, then the estimated cash flows arising from the modified financial assets are included in the calculation of cash shortages of existing assets;*
- ii. *If the restructuring will result in a derecognition of the existing assets, the fair value of the new asset is treated as the final cash flow of the existing financial assets at the time of derecognition. This amount is included in the calculation of cash shortages from existing financial assets which are discounted from the date of derecognition to the reporting date using the initial effective interest rate of the existing financial assets.*

Credit-impaired financial assets

At each reporting date, the Bank and its subsidiaries assesses whether the financial assets recorded at amortized cost and the financial assets of debt instruments which are recorded at fair value through other comprehensive income are credit impaired (worsening). Financial assets deteriorate when one or more events that have an adverse effect on the estimated future cash flows of the financial assets have occurred.

Objective evidence that financial assets are impaired can include default or payment arrears by a borrower, restructuring of a loan or receivable by the Bank and its subsidiaries on terms that the Bank and its subsidiaries would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security due to financial difficulties, or other observable data relating to a Bank and its subsidiaries of assets such as adverse changes in the payment status of borrowers or issuers in the Bank and its subsidiaries, or economic conditions that correlate with defaults in the Bank and its subsidiaries.

Aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk (*Purchased or originated credit impaired financial assets – POCI*)

Aset keuangan dikategorikan sebagai POCI apabila terdapat bukti objektif penurunan nilai pada saat pengakuan awal. Pada saat pengakuan awal, tidak ada penyisihan kerugian kredit yang diakui karena harga pembelian atau nilainya telah termasuk estimasi kerugian kredit sepanjang umurnya. Selanjutnya, perubahan kerugian kredit sepanjang umurnya, apakah positif atau negatif, diakui dalam laporan laba rugi sebagai bagian dari cadangan kerugian penurunan nilai.

Penyajian penyisihan kerugian kredit ekspektasian dalam laporan posisi keuangan konsolidasian

Penyisihan kerugian kredit ekspektasian disajikan dalam laporan posisi keuangan konsolidasian sebagai berikut:

- i. Aset keuangan yang diukur pada biaya perolehan diamortisasi, penyisihan kerugian kredit ekspektasian disajikan sebagai pengurang dari jumlah tercatat bruto aset;
- ii. Komitmen pinjaman dan kontrak jaminan keuangan, penyisihan kerugian kredit ekspektasian disajikan sebagai provisi;
- iii. Instrumen utang yang diukur pada nilai wajar melalui penghasilan komprehensif lain, penyisihan kerugian kredit ekspektasian tidak diakui dalam laporan posisi keuangan konsolidasian karena jumlah tercatat dari aset-aset ini adalah nilai wajarnya. Namun demikian penyisihan kerugian kredit ekspektasian diungkapkan dan diakui dalam penghasilan komprehensif lain.

Purchased or originated credit impaired financial assets – POCI

Financial assets are categorized as POCI if there is objective evidence of impairment at initial recognition. At initial recognition, no allowance for credit losses is recognized because the purchase price or value has included lifetime estimated credit losses. Furthermore, changes in lifetime credit losses, whether positive or negative, are recognized in the statement of profit or loss as part of the allowance for impairment losses.

Presentation of allowance for expected credit losses in the consolidated statements of financial position

Allowance for expected credit losses is presented in the consolidated statement of financial positions as follows:

- i. Financial assets measured at amortized cost, allowance for expected credit losses is presented as a deduction from the gross carrying amount of the asset;
- ii. Loan commitments and financial guarantee contracts, allowance for expected credit losses is presented as a provision;
- iii. Debt instruments measured at fair value through other comprehensive income, allowance for expected credit losses are not recognized in the consolidated statement of financial position because the carrying amounts of these assets are at their fair values. However, allowance for expected credit losses is disclosed and recognized in other comprehensive income.

Recoveries of written-off financial assets

When a loan is uncollectible, it is written off against the related allowance for impairment loss. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined.

The recoveries of written-off financial assets in the current year are credited by adjusting the allowance for impairment losses accounts. Recoveries of written-off financial assets from previous years are recorded as operational income other than interest income.

The Bank and its subsidiaries use the fair value of collateral as the basis for the future cash flow if one of the following conditions is met:

1. Loans are collateral dependent, i.e., if the source of loans repayment is only from collateral;

2. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan perjanjian legal pengikatan agunan.

Kerugian penurunan nilai atas aset keuangan yang dicatat pada biaya perolehan diamortisasi diukur sebesar selisih antara nilai tercatat aset keuangan dengan nilai kini estimasi arus kas masa datang yang didiskonto menggunakan suku bunga efektif awal dari aset keuangan tersebut. Jika kredit yang diberikan atau surat-surat berharga dimiliki hingga jatuh tempo memiliki suku bunga variabel, maka tingkat diskonto yang digunakan untuk mengukur setiap kerugian penurunan nilai adalah suku bunga efektif terkini.

Sebagai panduan praktis, Bank dan entitas anak dapat mengukur penurunan nilai berdasarkan nilai wajar instrumen dengan menggunakan harga pasar yang dapat diobservasi, dimana perhitungan nilai kini dari estimasi arus kas masa datang atas aset keuangan dengan agunan (*collateralized financial asset*) mencerminkan arus kas yang dapat dihasilkan dari pengambilalihan agunan dikurangi biaya-biaya untuk memperoleh dan menjual agunan, terlepas apakah pengambilalihan tersebut berpeluang terjadi atau tidak.

Kerugian penurunan nilai yang terjadi diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan dicatat pada akun "Cadangan kerugian penurunan nilai" sebagai pengurang terhadap aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Pendapatan bunga atas aset keuangan yang mengalami penurunan nilai tetap diakui atas dasar suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam pengukuran kerugian penurunan nilai.

Ketika peristiwa yang terjadi setelah tanggal laporan posisi keuangan konsolidasian menyebabkan jumlah kerugian penurunan nilai berkurang, kerugian penurunan nilai yang sebelumnya diakui harus dipulihkan dan pemulihan tersebut diakui dalam laba rugi pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Untuk aset keuangan yang tersedia untuk dijual, pada setiap tanggal laporan posisi keuangan konsolidasian, Bank dan entitas anak mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Penurunan yang signifikan atau penurunan jangka panjang atas nilai wajar investasi dalam instrumen ekuitas dibawah biaya perolehannya merupakan bukti objektif terjadinya penurunan nilai dan menyebabkan pengakuan kerugian penurunan nilai. Kerugian penurunan nilai atas efek-efek yang tersedia untuk dijual diakui dengan mengeluarkan kerugian kumulatif yang telah

2. Foreclosure of collateral is most likely to occur and supported by legally binding collateral agreement.

Impairment losses on financial assets carried at amortized cost are measured as the difference between the carrying amount of the financial assets and present value of estimated future cash flows discounted at the financial assets original effective interest rate. If loans or held-to-maturity marketable securities have variable interest rate, the discount rate used to measure loss on impairment is the current effective interest rate.

As a practical guidance, the Bank and its subsidiaries can measure the impairment based on the instrument's fair value by using observable market price, where the calculation of present value of estimated future cash flows on collateralized financial assets reflects the generated cash flow from the foreclosure of collateral net of costs to acquire and sell the collateral, regardless whether such acquisition occurs or not.

Impairment losses are recognized in the consolidated statement of profit or loss and other comprehensive income and reflected in an "Allowance for impairment losses" account as a deduction from financial assets carried at amortized cost.

Interest income on the impaired financial assets continues to be recognized using the rate of interest used to discount the future cash flow for the purpose of measuring the impairment loss.

When subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss in the consolidated statements of profit or loss and other comprehensive income.

For financial assets classified as available for sale, Bank and its subsidiaries assess on each consolidated statement of financial position reporting date whether there is objective evidence that a financial asset or a Bank and its subsidiaries of financial assets is impaired. In the case of equity instruments, a significant or prolonged decline in the fair value of the equity instruments below its cost is an objective evidence of impairment resulting in the recognition of an impairment loss. diakui secara langsung dalam ekuitas ke dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Jumlah kerugian kumulatif yang dikeluarkan dari ekuitas dan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian merupakan selisih antara biaya perolehan (setelah dikurangi dengan nilai pelunasan pokok dan amortisasi) dengan nilai wajar kini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Kerugian penurunan nilai yang diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian atas investasi instrumen ekuitas yang diklasifikasikan sebagai instrumen ekuitas yang tersedia untuk dijual tidak boleh dipulihkan melalui pembalikan atas penurunan nilai sebelumnya pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian pada tahun berjalan.

Jika pada periode berikutnya, nilai wajar surat-surat berharga yang diklasifikasikan dalam kelompok tersedia untuk dijual yang mengalami penurunan nilai meningkat dan peningkatan tersebut dapat secara objektif dihubungkan dengan peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, maka kerugian penurunan nilai tersebut harus dipulihkan dan pemulihan tersebut diakui pada tahun terjadinya.

Jika persyaratan kredit yang diberikan, piutang atau surat-surat berharga yang dimiliki hingga jatuh tempo dinegosiasi ulang atau dimodifikasi karena debitur atau penerbit mengalami kesulitan keuangan, maka penurunan nilai diukur dengan suku bunga efektif awal yang digunakan sebelum persyaratan diubah.

Jumlah pemulihan aset keuangan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian pada tahun berjalan.

Penerimaan kembali atas aset keuangan yang telah dihapusbukan dicatat sebagai pendapatan operasional lainnya.

Sehubungan dengan kepatuhan terhadap Otoritas Jasa Keuangan (OJK), Bank dan entitas anak menerapkan Peraturan Otoritas Jasa Keuangan (POJK) No.40/POJK.03/2019 tanggal 19 Desember 2019 tentang "Penilaian Kualitas Aset Bank Umum".

in equity to the consolidated statement of profit or loss and other comprehensive income.

The cumulative loss that has been removed from equity and recognized in the consolidated statement of profit or loss and other comprehensive income is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognized in the consolidated statement of profit or loss and other comprehensive income.

Impairment losses recognized in the consolidated statement of profit or loss and other comprehensive income on available for sale equity instruments should not be recovered through a reversal of a previously recognized impairment loss in the current year consolidated statement of profit or loss and other comprehensive income.

If in a subsequent period, the fair value of an impaired available-for-sale marketable securities increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of profit or loss and other comprehensive income, the impairment loss is reversed, with the amount of reversal recognized in the year it occurred.

If the term on loans receivable or held-to-maturity marketable securities are renegotiated or modified since the debtor or issuer has financial difficulties, the impairment is measured with the original effective interest rate used before the modification of terms.

If in the next period, the amount of allowance for impairment losses is decreased and the decreased can be objectively related to an event that occurred after the recognition of the impairment losses (i.e. upgrade of debtor's or issuer's collectibility credit rating), the impairment losses that was previously recognized has to be reversed, by adjusting the allowance account. The reversal amount of financial assets is recognized in the current year consolidated statement of profit or loss and other comprehensive income.

Bank and its subsidiaries applies the Financial Services Authority (POJK) No.19/POJK.03/2018 dated September 20, 2018 regarding "Amendments to the Financial Services Authority Regulation (POJK) No.16/POJK.03.2014 concerning Asset Assessment for Sharia Commercial Banks and Sharia Business Units". Assessment prior to January 1, 2015 is using PBI No.13/13/PBI/2011 dated March 24, 2011 regarding "Asset Quality Rating for Sharia Bank and Sharia Business Units".

The minimum allowance to be provided in accordance with Bank Indonesia Regulation (PBI) is as follows:

- a. 1% of earning assets classified as Current, excluding placements with Bank Indonesia, Government Bonds, other debt instruments issued by the Government of the Republic of Indonesia and earning assets secured by cash collateral;
- b. 5% of earning assets classified as Special Mention, net of deductible collateral;
- c. 15% of earning assets classified as Sub-standard, net of deductible collateral;
- d. 50% of earning assets classified as Doubtful, net of deductible collateral; and
- e. 100% of earning assets classified as Loss, net of deductible collateral.

The criterias for assessment of the value of collateral that can be deducted in the calculation of allowance for impairment losses are based on Bank Indonesia Regulations (PBI).

n. Acceptance receivable and payable

Acceptance receivables and acceptance payable are Letter of Credit (L/C) transactions accepted by accepting bank. Acceptance receivables are classified as financial assets measured at amortised cost. Acceptance liabilities are classified financial liabilities measured at amortised cost.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

o. Investment in shares

Investment in shares represent investments in non-publicly listed companies engaged in the financial services industry that not through capital market held for long term purposes.

Associated companies are all entities over which the Bank and its subsidiaries has significant influence but does not have control. Generally, the Bank and its subsidiaries' shareholding is between 20% and 50% of the voting rights. Investment in associates is recorded for under the equity method and are initially recognized at cost and adjusted for

metode ekuitas dan pada awalnya dicatat sebesar harga perolehan dan disesuaikan dengan bagian Bank dan entitas anak atas laba atau rugi neto perusahaan asosiasi sesuai dengan jumlah persentase kepemilikan dan dikurangi dengan penerimaan dividen sejak tanggal akuisisi.

Untuk penyertaan saham dengan persentase kepemilikan di bawah 20%. Dengan metode ini, penyertaan saham dicatat sebesar biaya perolehan dikurangi dengan cadangan kerugian penurunan nilai, dan tidak memiliki pengaruh yang signifikan. Pendapatan dividen diakui pada saat keputusan pembagian dividen diumumkan.

Lihat Catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

p. Aset tetap, aset hak guna dan liabilitas sewa

Aset tetap awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan supaya aset tersebut siap digunakan sesuai dengan maksud manajemen.

Setelah pengakuan awal, aset tetap dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Tanah awalnya dinyatakan sebesar biaya perolehan dan tidak disusutkan. Setelah pengakuan awal, tanah diukur pada nilai wajar pada tanggal revaluasi dikurangi akumulasi rugi penurunan nilai setelah tanggal revaluasi. Penilaian terhadap tanah dilakukan oleh penilai yang memiliki kualifikasi profesional, dan dilakukan secara berkala untuk memastikan bahwa jumlah tercatat tanah tidak berbeda secara material dengan jumlah yang ditentukan dengan menggunakan nilai wajarnya pada akhir periode pelaporan.

Kenaikan nilai tercatat yang timbul dari revaluasi dicatat sebagai "Surplus Revaluasi Aset Tetap", dan disajikan dalam penghasilan komprehensif lain. Namun, kenaikan tersebut diakui dalam laba rugi hingga sebesar jumlah penurunan nilai aset yang sama akibat revaluasi yang pernah dilakukan sebelumnya dalam laba rugi. Penurunan nilai tercatat yang timbul dari revaluasi diakui dalam laba rugi.

Revaluasi akan dilakukan dengan keteraturan yang cukup reguler untuk memastikan bahwa jumlah tercatat tidak berbeda secara material dari jumlah yang ditentukan dengan menggunakan nilai wajar pada akhir periode pelaporan. Jika perubahan nilai wajar tidak berbeda secara signifikan, aset tersebut akan direvaluasi paling kurang setiap 3 (tiga) atau 5 (lima) tahun sekali.

the Bank and its subsidiaries' share in net profit or loss of the associated companies less dividends received after the acquisition date.

Investments in shares with an ownership interest below 20%. Under this method, investments in shares are carried at cost less allowance for impairment losses and have no significant influence. Dividend income is recognized when the decision to distribute the dividend is declared.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

p. Fixed assets, right-of-use assets, and lease liability

Fixed assets are initially recognized at cost, which comprises its purchase price and any costs directly attributable in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, fixed assets are carried at cost less any subsequent accumulated depreciation and impairment losses.

Land is initially recognized at cost and not depreciated. Subsequent to initial recognition, land is measured at fair value at the revaluation date less any subsequent accumulated impairment losses. Valuation of land are performed by appraisers with professional qualification and is done in regular basis to ensure that the carrying amount does not differ materially from its fair value at the end of reporting period.

Increase in the carrying amount arising from revaluation is recorded in "Revaluation Surplus of Fixed Assets" and presented in other comprehensive income. However, the increase is recognized in profit or loss, up to the amount of impairment of the same assets due to revaluation previously recognised in profit or loss. A decrease in carrying value arising as a result of a revaluation should be recognised in profit or loss.

Revaluation is carried out with fairly regular regularity to ensure that the carrying amount does not differ materially from the amount determined using the fair value at the end of the reporting period. If the changes in fair value is insignificant, the asset will be revaluated at least between 3 (three) or 5 (five) years.

Aset tetap yang diperoleh dalam pertukaran aset nonmoneter atau kombinasi aset moneter dan nonmoneter diukur dalam nilai wajar, kecuali:

- (i) transaksi pertukaran tidak memiliki substansi komersial, atau
- (ii) nilai wajar dari aset yang diterima dan diserahkan tidak dapat diukur secara andal.

Penyusutan aset dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus, berdasarkan taksiran masa manfaat ekonomis aset tetap yang bersangkutan, sebagai berikut:

	<u>Tahun/Years</u>	
Bangunan	20	Buildings
Kendaraan	4 - 8	Vehicles
Perlengkapan	4 - 8	Office equipment

Pada setiap akhir tahun buku, manajemen melakukan pengkajian ulang atas nilai residu, masa manfaat dan metode penyusutan dan disesuaikan secara prospektif, jika diperlukan.

Jumlah tercatat komponen dari suatu aset tetap dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomis masa depan yang diekspektasikan dari penggunaan maupun pelepasannya.

Keuntungan atau kerugian yang timbul dari penghentian pengakuan tersebut dimasukkan ke dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian untuk tahun penghentian pengakuan tersebut dilakukan.

Beban pemeliharaan dan perbaikan dibebankan pada operasi pada saat terjadinya. Beban pemugaran dan penambahan dalam jumlah besar dikapitalisasi kepada jumlah tercatat aset tetap terkait bila besar kemungkinan manfaat ekonomi masa depan menjadi lebih besar dari standar kinerja awal yang ditetapkan sebelumnya dan disusutkan sepanjang sisa masa manfaat aset tetap terkait.

Aset hak guna dan liabilitas sewa

PSAK 73 memperkenalkan model akuntansi penyewa tunggal dan mensyaratkan penyewa untuk mengakui aset dan liabilitas untuk semua sewa dengan pengecualian sewa jangka pendek dan aset dengan nilai rendah. Penyewa diharuskan untuk mengakui aset hak-guna yang mewakili haknya untuk menggunakan aset sewaan dan liabilitas sewa yang mewakili kewajibannya untuk melakukan pembayaran sewa. PSAK 73 secara substansial masih menggunakan persyaratan akuntansi atas pesewa (*lessor*) sesuai PSAK 30 "Sewa". Oleh

Fixed assets acquired in exchange for a non-monetary asset or for a combination of monetary and non-monetary assets are measured at fair values, unless:

- (i) the exchange transaction lacks commercial substance, or*
- (ii) the fair value of neither the assets received, nor the assets given up can be measured reliably.*

Depreciation of an asset starts when it is available for use and is computed using the straight-line method, based on the estimated useful lives of the assets, as follows:

At the year end, management conducts a re-assessment of the residual value, useful life and depreciation method and adjusted prospectively, if needed.

The carrying amount of an item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal.

Any gain or loss arising from the derecognition of the asset is directly included in the consolidated statement of profit or loss and other comprehensive income when the item is derecognized.

Repairs and maintenance is charged to the profit or loss as incurred. The cost of major renovation and restoration is capitalized to the carrying amount of the related fixed assets when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset and is depreciated over the remaining useful life of the related asset.

Right-of-use assets and lease liabilities

SFAS 73 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with the exemptions of short-term leases and the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. SFAS 73 substantially carries forward the lessor accounting requirements in SFAS 30 "Leases". Accordingly, a lessor continues to

karena itu, penyewa masih akan menggunakan klasifikasi sewa dalam sewa operasi atau pembiayaan, dan perlakuan atas kedua tipe sewa tersebut.

Dampak penerapan PSAK 73 adalah Bank dan entitas anak sebagai penyewa atas kontrak sewa properti dan kendaraan. Bank dan entitas anak telah memilih *simplified approach* dalam melakukan transisi dan tidak melakukan penyajian kembali untuk informasi komparatif. Dengan demikian, informasi komparatif tetap dilaporkan sesuai dengan PSAK 30, "Sewa".

Kebijakan sewa

Bank dan entitas anak mengakui liabilitas sewa, sebagai pembayaran sewa yang tersisa termasuk atas opsi perpanjangan dimana perpanjangan hampir dapat dipastikan, didiskontokan menggunakan tingkat bunga pinjaman inkremental pada tanggal penerapan awal. Sedangkan aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa, dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset.

Beban keuangan dicatat dalam laporan laba rugi konsolidasian. Aset sewa (disajikan sebagai bagian aset tetap) disusutkan selama jangka waktu yang lebih pendek antara umur manfaat aset sewa dan periode masa sewa, jika tidak ada kepastian yang memadai bahwa Bank dan entitas anak akan mendapatkan hak kepemilikan pada akhir masa sewa.

Aset dalam penyelesaian

Aset tetap dalam penyelesaian dicatat sebesar biaya perolehan, yang mencakup kapitalisasi beban pinjaman dan biaya-biaya lainnya yang terjadi sehubungan dengan pendanaan aset tetap dalam penyelesaian tersebut. Akumulasi biaya perolehan akan direklasifikasi ke akun "Aset Tetap" yang bersangkutan pada saat aset tetap tersebut telah selesai dikerjakan dan siap untuk digunakan. Aset tetap dalam penyelesaian tidak disusutkan karena belum tersedia untuk digunakan.

Biaya pengurusan legal hak atas tanah dalam bentuk Hak Guna Usaha ("HGU"), Hak Guna Bangunan ("HGB") dan Hak Pakai ("HP") ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan tanah pada akun "Aset Tetap". Biaya pengurusan perpanjangan atau pembaruan legal hak atas tanah diakui sebagai aset tidak berwujud dan diamortisasi sepanjang umur hak hukum atau umur ekonomi tanah, mana yang lebih pendek.

classify its leases as operating leases or finance leases, and to account for those two types of leases differently.

The impact of SFAS 73 at the Bank and its subsidiaries is where the Bank and its subsidiaries is a lessee in property and vehicle lease contracts. The Bank and its subsidiaries has elected the simplified approach of transition and did not restate comparative information. Therefore, the comparative information continues to be reported under SFAS 30, "Leases".

Leases policy

The Bank and its subsidiaries recognised a lease liability, being the remaining lease payments including extensions options where renewal is reasonably certain, discounted using the incremental borrowing rate at the date of initial application. Meanwhile, rights of use assets include the amount of lease liabilities recognized, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease, less rental incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset.

Finance expense is recorded in the statement of income consolidated. Leased assets (presented under fixed assets) are depreciated over the shorter of the estimated useful life of the assets and the lease term, if there is no reasonable certainty that Bank and its subsidiaries will obtain ownership by the end of the lease term.

Construction in progress

Constructions in-progress are stated at cost, including capitalized borrowing costs and other charges incurred in connection with the financing of construction in progress. The accumulated costs will be reclassified to the appropriate "Premises and Equipment" account when the construction is completed and available for intended use. Construction in progress are not depreciated as these are not yet available for use.

The legal cost of land rights in the form of Business Usage Rights ("Hak Guna Usaha" or "HGU"), Building Usage Right ("Hak Guna Bangunan" or "HGB") and Usage Rights ("Hak Pakai" or "HP") when the land was initially acquired are recognized as part of the cost of the land under the "Fixed Assets". The extension or the legal renewal costs of land rights were recognized as intangible assets and were amortized over the shorter of the rights' legal life or land's economic life.

q. Penurunan nilai aset non-keuangan

Pada setiap akhir tahun periode pelaporan, Bank dan entitas anak menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Bank dan entitas anak akan membuat estimasi atas jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau Unit Penghasil Kas (UPK) dikurangi biaya untuk menjual dan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain.

Jika nilai tercatat aset lebih besar daripada nilai terpulihkannya, maka aset tersebut dianggap mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar nilai terpulihkannya. Rugi penurunan nilai dari operasi yang berkelanjutan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian sebagai "rugi penurunan nilai".

Dalam menghitung nilai pakai, estimasi arus kas masa depan neto didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini atas nilai waktu uang dan risiko spesifik aset.

Dalam menentukan nilai wajar dikurangi biaya pelepasan, mengacu pada PSAK 68: "Pengukuran Nilai Wajar" (Catatan 2d).

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian sesuai dengan kategori biaya yang konsisten dengan fungsi aset yang diturunkan nilainya.

r. Beban dibayar dimuka

Biaya dibayar dimuka diamortisasi selama masa manfaat dengan menggunakan metode garis lurus (*straight-line method*).

s. Aset lain-lain

Aset lain-lain terdiri dari biaya dibayar dimuka, kliring dalam penyelesaian, uang muka dan lain-lain.

Aset lain-lain disajikan sebesar nilai tercatat setelah dikurangi dengan cadangan kerugian penurunan nilai.

Pada setiap tanggal laporan posisi keuangan konsolidasian, Bank dan entitas anak melakukan penelaahan terhadap nilai yang dapat diperoleh kembali atas aset non-keuangan untuk menentukan apakah terdapat indikasi penurunan nilai sebagaimana dijelaskan dalam Catatan 2q.

q. Impairment of non-financial assets

At the end of each reporting year the Bank and its subsidiaries assesses at each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, Bank and its subsidiaries makes an estimate of the asset's recoverable amount.

The recoverable amount determined for an individual asset is the higher of an asset's fair value or Cash Generating Unit (CGU) less costs to sell and its value in use, unless the asset does not generate cash inflows that are largely independent of those from other assets or Bank and its subsidiaries of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses of continuing operations are recognized in the consolidated statement of profit or loss and other comprehensive income as "impairment losses".

In assessing the value in use, the estimated net future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

In determining fair value less costs of disposal, refer to SFAS 68: "Fair Value Measurements" (Note 2d).

Impairment losses of continuing operations, if any, are recognized in the consolidated statements of profit or loss and other comprehensive income under expense categories that are consistent with the functions of the impaired assets.

r. Prepaid expenses

Prepaid expenses are amortized over the useful life using the straight-line method.

s. Other assets

Other assets include prepaid expenses, clearing in progress, advances and others.

Other assets are stated at the carrying amounts less allowance for impairment losses.

At the consolidated statement of financial position date, the Bank and its subsidiaries evaluate the recoverable amount of its non-financial assets to determine whether there is any indication of impairment as discussed in Note 2q.

t. Liabilitas segera

Liabilitas segera dicatat pada saat timbulnya liabilitas atau diterimanya perintah pemindahbukuan, baik dari nasabah maupun dari bank lain.

Liabilitas segera dicatat berdasarkan biaya perolehan diamortisasi dan diklasifikasikan sebagai liabilitas keuangan lainnya.

Lihat Catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

u. Simpanan nasabah, simpanan nasabah syariah dan dana syirkah temporer

Giro merupakan simpanan nasabah yang dapat digunakan sebagai alat pembayaran, yang penarikannya dapat dilakukan setiap saat melalui cek, atau dengan cara pemindahbukuan dengan bilyet giro atau sarana perintah pembayaran lainnya. Giro dinyatakan sebesar nilai liabilitas kepada pemegang giro.

Tabungan merupakan simpanan nasabah yang penarikannya hanya dapat dilakukan menurut syarat tertentu yang disepakati. Tabungan dinyatakan sebesar nilai liabilitas kepada pemilik tabungan.

Deposito berjangka merupakan simpanan nasabah yang penarikannya hanya dapat dilakukan pada waktu tertentu sesuai dengan perjanjian dengan penyimpan. Deposito berjangka dinyatakan sebesar nilai nominal yang tercantum dalam bilyet deposito atau yang diperjanjikan.

Giro dan tabungan wadiah merupakan giro dan tabungan wadiah *adh-dhamanah* yakni titipan dana dalam bentuk giro dan tabungan pihak lain dimana pemilik dana bisa mendapatkan pendapatan bonus. Giro wadiah dinyatakan sebesar titipan pemegang giro BJBS.

Dana syirkah temporer adalah dana yang diterima oleh BJBS. BJBS mempunyai hak untuk mengelola dan menginvestasikan dana, baik sesuai dengan kebijakan BJBS atau kebijakan pembatasan dari pemilik dana, dengan keuntungan dibagikan sesuai dengan kesepakatan. Dana syirkah temporer dinyatakan sebesar nilai nominal sesuai dengan perjanjian antara pemegang dana syirkah temporer bank.

Hubungan antara BJBS dan pemilik dana syirkah temporer merupakan hubungan kemitraan berdasarkan akad *mudharabah*.

Dana syirkah temporer tidak dapat digolongkan sebagai liabilitas. Hal ini karena BJBS tidak mempunyai liabilitas ketika mengalami kerugian, untuk mengembalikan jumlah dana awal dari pemilik dana kecuali akibat kelalaian atau wanprestasi BJBS.

u. Deposits from customers, sharia deposits from customers and temporary syirkah fund

Current accounts represent customers' funds which can be used as payment instruments, that can be withdrawn by the depositors at any time through cheque, or transfers between accounts using cheque and other orders of payment or transfer. These current accounts are stated at the amount due to the current account holder.

Savings accounts represent customers' funds, which can only be withdrawn by the depositors under agreed conditions. Savings account are stated at the amount due to the account holders.

Time deposits represent customers' funds, which can only be withdrawn by the depositors at specific maturities according to the deposit agreements. Time deposits are stated at the nominal amount provided in the certificates of deposits or at the amount stated in the agreement.

*Wadiah current and saving account is a wadiah *adh-dhamanah* funds deposits in the form of current and saving account on which the customer may receive bonus income. Wadiah current accounts are stated at the amount due to the account holder of the deposit BJBS.*

Temporary syirkah funds represent investment received by the BJBS. The BJBS has the right to manage and invest funds in accordance with either the BJBS' policy or restriction policy by the depositors with the agreed profit sharing. Temporary syirkah funds are stated at the nominal amount as agreed by the temporary syirkah funds holder.

*Relationship between the BJBS and the owner of temporary syirkah funds are partnership based on *mudharabah* agreement.*

Temporary syirkah funds can not be classified as liability because BJBS has no obligation to return the fund to the owner when BJBS has loss, unless there is negligence or default by the BJBS.

Dana syirkah temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dana tidak mempunyai hak kepemilikan yang sama dengan pemegang saham seperti hak *voting* dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset non-investasi.

Dana syirkah temporer merupakan salah satu unsur laporan posisi keuangan konsolidasian, hal tersebut sesuai dengan prinsip syariah yang memberikan hak kepada BJBS untuk mengelola dana, termasuk untuk mencampur dana dimaksud dengan dana lainnya.

Pemilik dana syirkah temporer memperoleh bagian atas keuntungan sesuai kesepakatan dan menerima kerugian berdasarkan jumlah dana dari masing-masing pihak. Pembagian hasil dana syirkah temporer dapat dilakukan dengan konsep bagi hasil atau bagi untung.

v. Simpanan dari bank lain

Simpanan nasabah diklasifikasikan sebagai liabilitas keuangan lainnya dan diukur pada biaya perolehan diamortisasi menggunakan suku bunga efektif, kecuali simpanan yang didasarkan pada prinsip perbankan syariah dan dana syirkah temporer yang dinyatakan sebesar kewajiban BJBS kepada nasabah. Biaya tambahan yang dapat diatribusikan secara langsung kepada perolehan simpanan nasabah, dikurangkan dari jumlah simpanan yang diterima.

Simpanan dari bank lain terdiri dari liabilitas terhadap bank lain dalam bentuk giro, tabungan, *interbank call money*, *deposit on call* dan deposito berjangka.

Di dalam simpanan dari bank lain termasuk simpanan syariah dalam bentuk giro wadiah.

Simpanan dari bank lain diklasifikasikan sebagai liabilitas keuangan dan diukur pada biaya perolehan diamortisasi menggunakan suku bunga efektif kecuali simpanan syariah yang dinyatakan sebesar nilai liabilitas Bank dan entitas anak kepada nasabah.

Biaya tambahan yang dapat diatribusikan secara langsung dengan perolehan simpanan dari bank lain dikurangkan dari total simpanan yang diterima.

Konvensional

Pendapatan dan beban bunga diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian dengan menggunakan metode suku bunga efektif.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari aset keuangan atau liabilitas keuangan (atau, jika lebih tepat, digunakan periode yang lebih singkat) untuk memperoleh nilai tercatat bersih dari aset keuangan atau liabilitas keuangan.

Pada saat menghitung suku bunga efektif, Bank dan entitas anak mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrument keuangan tersebut, tetapi tidak mempertimbangkan kerugian kredit di masa mendatang.

Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga setelahnya diakui berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

any discount or premium related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

x. Borrowings

Borrowings are funds received by the Bank and its subsidiaries from Bank Indonesia, the Government and other financing institutions with payment obligation based on borrowing agreements.

Borrowings are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

y. Interest income, interest expense and sharia profit sharing

Conventional

Interest income and expenses are recognized in the consolidated statement of profit or loss and other comprehensive income using the effective interest method.

The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial assets or liabilities (or, where appropriate, a shorter period) to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, Bank and its subsidiaries estimates future cash flows considering all contractual terms of the financial instruments except future credit losses.

This calculation includes all commissions, provision fees and other forms received by the parties in the contract that are inseparable from the effective interest rate, transaction costs and all other premiums or discounts.

If a financial asset or group of similar financial assets has been impaired as a result of an impairment loss, the subsequent interest income is recognized based on the interest rate used to discount future cash flows in calculating the impairment loss.

Syariah

Pendapatan operasi syariah utama terdiri dari pendapatan dari transaksi murabahah dan istishna, pendapatan bagi hasil dari pembiayaan mudharabah dan musyarakah, pendapatan dari transaksi ijarah muntahiyah bittamlik dan pendapatan lainnya.

Pendapatan dari transaksi ijarah murabahah dan istishna diakui dengan menggunakan metode akrual. Pendapatan bagi hasil dari pembiayaan mudharabah dan musyarakah diakui dalam periode terjadinya hak bagi hasil. Beban berdasarkan prinsip syariah terdiri dari beban bagi hasil mudharabah dan beban bonus wadiah.

Pendapatan atas piutang murabahah menggunakan metode setara tingkat imbal hasil efektif (margin efektif).

Margin efektif adalah margin yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari piutang murabahah. Pada saat menghitung margin efektif, BJBS mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, tetapi tidak mempertimbangkan kerugian piutang di masa mendatang.

Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari margin efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

z. Pendapatan provisi dan komisi

Pendapatan provisi dan komisi yang berkaitan langsung dengan kegiatan pinjaman, atau pendapatan provisi dan komisi yang berhubungan dengan jangka waktu tertentu, diamortisasi sesuai dengan jangka waktu kontrak menggunakan metode suku bunga efektif dan diklasifikasikan sebagai bagian dari pendapatan bunga pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Pendapatan provisi dan komisi yang tidak berkaitan dengan kegiatan pemberian kredit atau suatu jangka waktu dan/atau terkait dengan pemberian suatu jasa, diakui sebagai pendapatan pada saat terjadinya transaksi dan dicatat pada akun pendapatan operasional lainnya.

aa. Sewa operasi

Kontrak sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat kepemilikan aset tetap berada ditangan perusahaan sewa-menyewa (*lessor*), maka sewa tersebut diklasifikasikan sebagai sewa operasi. Pembayaran sewa operasi dibebankan ke laporan laba rugi dan

Sharia

The main sharia operating income consists of income from murabahah and istishna transactions, income from revenue sharing of mudharabah and musyarakah financing, income from ijarah muntahiyah bittamlik and other income.

Income from ijarah murabahah and istishna revenue sharing is recognized using the accrual method. Income from mudharabah and musyarakah financing are recognized in the period in which the revenue sharing rights occur. Expenses based on Sharia principles consist of mudharabah profit sharing expense and wadiah bonus expense.

Income from murabahah receivables using the effective rate of return method (effective margin).

Effective margin is the margin that precisely discounts the estimated future cash payments or receipts through the expected life of the murabahah receivables. When calculating the effective margin, BJBS estimates the future cash flows considering all contractual terms of the financial instrument, but does not consider the loss of receivables in the future.

This calculation includes all commissions, provision fees and other forms accepted by the parties in the contract that are an inseparable part of the effective margin, transaction costs and all other premiums or discounts.

z. Fees and commission

Fees and commissions directly related to lending activities, or fee and commission which relates to a specific period, is amortized over the term of the contract using the effective interest method and classified as part of interest income in the consolidated statement of profit or loss and other comprehensive income.

Fees and commissions that are not related to the lending activity or a period of time and/or associated with the service provided, are recognized as revenue at the time of the transaction and recorded under other operating income.

aa. Operating lease

Leases, which do not transfer substantially all the risks and rewards of ownership are retained by the lessor, are classified as operating leases. Payments made under operating leases are charged to the consolidated statement of profit or loss and other comprehensive income

penghasilan komprehensif lain konsolidasian menggunakan metode garis lurus selama masa sewa.

bb. Pajak penghasilan

Bank dan entitas anak menerapkan PSAK 46 (Revisi 2014), "Pajak Penghasilan".

Beban pajak tahun berjalan ditetapkan berdasarkan taksiran penghasilan kena pajak tahun berjalan. Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer aset dan liabilitas antara pelaporan komersial dan pajak pada setiap tanggal pelaporan.

Aset pajak tangguhan diakui menggunakan metode posisi keuangan untuk seluruh perbedaan temporer yang boleh dikurangkan dan saldo rugi fiskal yang belum dikompensasikan, sepanjang besar kemungkinan perbedaan temporer yang boleh dikurangkan dan saldo rugi fiskal yang belum digunakan tersebut dapat dimanfaatkan untuk mengurangi laba fiskal pada masa yang akan datang.

Jumlah tercatat aset pajak tangguhan ditelaah pada setiap tanggal neraca dan nilai tercatat aset pajak tangguhan tersebut diturunkan apabila tidak lagi terdapat kemungkinan besar bahwa laba fiskal yang memadai akan tersedia untuk mengkompensasi sebagian atau semua manfaat aset pajak tangguhan.

Aset dan kewajiban pajak tangguhan diukur berdasarkan tarif pajak yang akan berlaku pada tahun saat aset direalisasikan atau liabilitas diselesaikan berdasarkan peraturan perpajakan yang berlaku atau yang telah secara substantif telah diberlakukan pada tanggal laporan posisi keuangan konsolidasian.

Pengaruh pajak terkait dengan penyisihan untuk dan/atau pembalikan seluruh perbedaan temporer selama tahun berjalan, termasuk pengaruh perubahan tarif pajak, diakui sebagai "Manfaat/ (Beban) Pajak Penghasilan, Tangguhan" dan termasuk dalam laba atau rugi neto tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Perubahan terhadap liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan atau banding oleh Bank dan entitas anak, pada saat telah ada keputusan atas banding dan atau keberatan tersebut.

Untuk setiap entitas yang dikonsolidasi, pengaruh pajak atas perbedaan temporer dan akumulasi rugi pajak, yang masing-masing dapat berupa aset atau liabilitas, disajikan dalam jumlah neto untuk masing-masing entitas tersebut.

on a straight-line method over the period of the lease.

bb. Income tax

Bank and its subsidiaries adopted SFAS 46 (Revised 2014), "Income Taxes".

Current tax expense is provided based on the estimated taxable income for the current year. Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date.

Deferred tax assets are recognized, using the statement of financial position method, for all deductible temporary differences and carry forward of unused tax losses to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences and carry forward of unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to compensate all or part of the benefit of the deferred tax assets.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied to the year when the asset is realized or the liability is settled based on tax laws that have been enacted or substantively enacted as of the consolidated statement financial position date.

The related tax effects of the provisions for and/or reversals of all temporary differences during the year, including the effect of change in tax rates, are recognized as "Income Tax Benefit (Expense), Deferred" and included in the determination of net profit or loss for the year, except to the extent that they relate to items previously charged or credited to equity.

Amendment to tax obligation is recorded when an assessment letter is received or, if objected to or appealed against by the Bank and its subsidiaries, when the result of such appeal or objection is determined.

For each of the consolidated entity, the tax effects on temporary differences and tax loss carry forward, which can individually be either asset or liability, are shown at the applicable net amounts.

cc. Imbalan kerja

Bank dan entitas anak menerapkan PSAK 24 (Revisi 2013), "Imbalan Kerja".

Imbalan kerja jangka pendek

Imbalan kerja jangka pendek seperti upah, iuran jaminan sosial, cuti jangka pendek, bonus dan imbalan non-moneter lainnya diakui selama periode jasa diberikan. Imbalan kerja jangka pendek dihitung sebesar jumlah yang tidak didiskontokan.

Program pensiun iuran pasti

Iuran kepada dana pensiun sebesar persentase tertentu gaji pegawai yang menjadi peserta program pensiun iuran pasti Bank dan entitas anak, dicadangkan dan diakui sebagai biaya ketika jasa telah diberikan oleh pegawai-pegawai tersebut. Pembayaran dikurangkan dari utang iuran. Iuran terutang dihitung berdasarkan jumlah yang tidak didiskontokan.

Program imbalan pasti dan imbalan kerja jangka panjang lainnya

Imbalan pasca-kerja dicadangkan dan diakui sebagai biaya ketika jasa telah diberikan oleh pegawai yang menjadi peserta program pensiun Bank dan entitas anak. Imbalan kerja ditentukan berdasarkan peraturan Bank dan entitas anak dan persyaratan minimum Undang-undang Tenaga Kerja No. 13/2003, mana yang lebih tinggi.

Imbalan pasca-kerja dan imbalan kerja jangka panjang lainnya secara aktuaris ditentukan berdasarkan metode *Projected Unit Credit*.

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto, yang diakui sebagai penghasilan komprehensif lain, terdiri atas:

- (i) Keuntungan dan kerugian aktuarial;
- (ii) Imbal hasil atas aset program tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset);
- (iii) Setiap perubahan dampak batas aset, tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset).

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto, yang diakui sebagai penghasilan komprehensif lain tidak direklasifikasi ke laba rugi pada periode berikutnya.

- Amendments SFAS 25: Accounting Policies, Changes in Accounting Estimates and Errors regarding Definition of Accounting Estimates; and
- Amendments SFAS 46: Income Tax regarding Deferred Tax related to Assets and Liabilities arising from a Single Transaction.

New standards and amendment to standard which effective for periods beginning on or after January 1, 2025, with early adoption is permitted, are as follows:

- SFAS 74: Insurance Contract; and
- Amendments SFAS 74: Insurance Contract regarding Initial Application of SFAS 74 and SFAS 71 – Comparative Information.

Hingga tanggal laporan keuangan konsolidasian ini diotorisasi, Bank dan entitas anak masih melakukan evaluasi atas dampak potensial dari penerapan standar baru, amandemen standar dan interpretasi standar tersebut.

Until the date of the consolidated financial statements is authorized, the Bank and its subsidiaries is still evaluating the potential impact of the adoption of new standards, amendments to standards and interpretations of these standards.

II. Provisi

Provisi diakui jika Bank dan entitas anak memiliki liabilitas kini (baik bersifat hukum maupun bersifat konstruktif) yang sebagai akibat peristiwa masa lalu, besar kemungkinannya penyelesaian liabilitas tersebut akan mengakibatkan arus keluar sumber daya yang mengandung manfaat ekonomi dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

II. Provisions

Provisions are recognized when the Bank and its subsidiaries have a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisi ditelaah pada setiap tanggal pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

mm. Cadangan kerugian penurunan nilai aset non-produktif dan komitmen dan kontinjensi

Sesuai dengan POJK No.40/POJK.03/2019 tanggal 19 Desember 2019, Bank dan entitas anak tidak diwajibkan lagi untuk membentuk cadangan kerugian penurunan nilai atas aset nonproduktif dan transaksi rekening administratif (komitmen dan kontinjensi), namun Bank dan entitas anak tetap harus menghitung cadangan kerugian penurunan nilai mengacu pada Pernyataan Standar Akuntansi Keuangan yang berlaku.

mm. Allowance for impairment losses on non-earning assets and commitments and contingencies

In accordance with POJK No.40/POJK.03/2019 dated December 19, 2019, the Bank and its subsidiaries is not required to provide an allowance for impairment losses on non-earning assets and administrative account transactions (commitments and contingencies), but the Bank and its subsidiaries should still calculate the allowance for impairment losses in accordance with the Statement of Financial Accounting Standards.

Atas aset non-produktif, manajemen Bank dan entitas anak menentukan cadangan kerugian penurunan nilai pada nilai yang lebih rendah antara nilai tercatat dan nilai wajar setelah dikurangi biaya pelepasan.

For non-earning assets, the management of Bank and its subsidiaries determine the impairment losses at the lower amount between the carrying value and fair value after deducting cost of disposal.

Atas komitmen dan kontinjensi yang memiliki risiko kredit, manajemen Bank dan entitas anak menentukan cadangan kerugian penurunan nilai berdasarkan selisih antara nilai tercatat dan nilai kini atas pembayaran kewajiban yang diharapkan akan terjadi (ketika pembayaran atas jaminan tersebut menjadi *probable*).

For commitments and contingencies with credit risk, Bank and its subsidiaries' management determine the impairment losses based on the difference between the carrying amount and the present value of the payment obligations that are expected to occur (when payment under the guarantee has become probable).

nn. Peristiwa setelah periode pelaporan

Setiap peristiwa setelah akhir periode yang menyebabkan tambahan informasi mengenai posisi keuangan Bank dan entitas anak (*adjusting event*) akan disesuaikan dalam laporan keuangan konsolidasian. Peristiwa setelah akhir periode yang bukan merupakan *adjusting events*, jika ada, akan diungkapkan ketika memiliki dampak material terhadap laporan keuangan konsolidasian.

nn. Events after the reporting period

Any event after the end of the period that causes additional information regarding the financial position of the Bank and its subsidiaries (adjusting event) will be adjusted in the consolidated financial statements. Events after the end of the period which are not adjusting events, if any, will be disclosed when it has a material impact on the consolidated financial statements.

3. Pertimbangan, Estimasi dan Asumsi Akuntansi yang Signifikan

Penyusunan laporan keuangan konsolidasian mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi pada akhir periode pelaporan.

Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode pelaporan berikutnya.

Pertimbangan

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Usaha yang berkelanjutan

Manajemen telah melakukan penilaian atas kemampuan Bank dan entitas anak untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank dan entitas anak memiliki sumber daya untuk melanjutkan usahanya di masa mendatang.

Selain itu, aset dan liabilitas tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank dan entitas anak untuk melanjutkan usahanya. Oleh karena itu, laporan keuangan konsolidasian telah disusun atas dasar usaha yang berkelanjutan.

Klasifikasi aset dan liabilitas keuangan

Manajemen menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan bila definisi yang ditetapkan PSAK 71 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi seperti diungkapkan pada Catatan 2d.

3. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the consolidated financial statement requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amounts of the asset and liability affected in future periods.

Judgments

The following judgments are made by management in the process of applying the accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

Going concern

The management has made an assessment of the Bank and its subsidiaries' abilities to continue as a going concern and is satisfied that the Bank and its subsidiaries have the resources to continue its business for the foreseeable future.

Furthermore, the management is not aware of any material uncertainties that may cast significant doubt to the Bank and its subsidiaries' abilities to continue as a going concern. Therefore, the consolidated financial statement continues to be prepared on the going concern basis.

Classification of financial assets and financial liabilities

The Management determine the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in SFAS 71. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the accounting policies disclosed in Note 2d.

Nilai wajar atas dan liabilitas keuangan

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan konsolidasian dapat dikategorikan pada level hierarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

- Level 1: harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang dapat diakses pada tanggal pengukuran;
- Level 2: input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung;
- Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

Aset keuangan yang tidak memiliki harga pasar

Bank dan entitas anak mengklasifikasikan aset keuangan dengan mengevaluasi, antara lain, apakah nilai tersebut dikutip atau tidak di pasar aktif. Termasuk dalam evaluasi pada apakah aset keuangan yang dikutip di pasar aktif adalah penentuan apakah harga pasar dapat segera dan secara teratur tersedia, dan apakah mereka mewakili harga aktual dan teratur terjadi transaksi pasar secara *arms-length*.

Kontinjensi

Ketika Bank dan entitas anak sedang terlibat dalam proses hukum, perkiraan biaya kemungkinan bagi penyelesaian klaim telah dikembangkan melalui konsultasi dengan bantuan konsultan hukum Bank dan entitas anak didasarkan pada analisis hasil yang potensial.

Manajemen Bank dan entitas anak tidak berkeyakinan bahwa hasil dari hal ini akan mempengaruhi hasil usaha. Besar kemungkinan, bagaimanapun, bahwa hasil operasi di masa depan dapat secara material terpengaruh oleh perubahan dalam estimasi atau efektivitas dari strategi yang terkait dengan hal tersebut.

Estimasi dan asumsi

Asumsi dan estimasi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko untuk dapat menyebabkan penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun berikutnya diungkapkan di bawah ini. Bank dan entitas anak mendasarkan asumsi dan estimasi yang digunakan pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun.

Fair value of financial instruments

All assets and liabilities in which fair value is measured or disclosed in the consolidated financial statements can be classified in fair value hierarchy levels, based on the lowest level of input that is significant on the overall fair value measurement:

- Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities accessible at the measurement date;
- Level 2: inputs other than quoted prices included in Level 1 for the assets and liabilities, which is directly or indirectly observable;
- Level 3: unobservable inputs for the assets and liabilities.

Financial assets not quoted in an active market

The Bank and its subsidiaries classify financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether quoted prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

Contingencies

When the Bank and its subsidiaries are currently involved in legal proceedings, the estimate of the probable cost for the resolution of claims determined in consultation with the aid of the legal counsel of the Bank and its subsidiaries based upon an analysis of potential results.

Management of the Bank and its subsidiaries does not believe that the outcome of this matter will affect the results of operations. It is probable, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Estimates and assumptions

The key estimates and assumptions concerning the future and other key sources of estimating uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Bank and its subsidiaries based their assumptions and estimates on parameters available when the consolidated financial statements were prepared.

Asumsi dan situasi mengenai perkembangan masa depan dapat berubah akibat perubahan pasar atau situasi yang timbul di luar kendali Bank dan entitas anak. Perubahan tersebut dicerminkan dalam asumsi yang digunakan pada saat terjadinya.

Cadangan kerugian penurunan nilai aset keuangan

Kondisi spesifik *counterparty* yang mengalami penurunan nilai dalam pembentukan cadangan kerugian atas aset keuangan dievaluasi secara individu berdasarkan estimasi terbaik manajemen atas nilai kini arus kas yang diharapkan akan diterima. Dalam mengestimasi arus kas tersebut, manajemen membuat pertimbangan tentang situasi keuangan *counterparty* dan nilai realisasi bersih dari setiap agunan. Setiap aset yang mengalami penurunan nilai dinilai sesuai dengan manfaat yang ada, dan strategi penyelesaian serta estimasi arus kas yang diperkirakan dapat diterima.

Bank dan entitas anak menelaah portofolio pinjaman dan piutang setiap tahun untuk menilai penurunan nilai dengan memperbaharui provisi yang dibentuk selama periode yang diperlukan berdasarkan analisis berkelanjutan dan pemantauan terhadap rekening individual oleh petugas kredit.

Dalam menentukan apakah penurunan nilai harus dibentuk dalam laporan laba rugi komprehensif konsolidasian, Bank dan entitas anak membuat penilaian, apakah terdapat data yang dapat diobservasi yang menunjukkan bahwa terdapat penurunan yang dapat diukur dalam laporan perkiraan arus kas masa depan dari portofolio pinjaman sebelum penurunan tersebut dapat diidentifikasi secara individual dalam portofolio tersebut.

Bukti seperti ini dapat termasuk data yang dapat diobservasi yang menunjukkan bahwa telah terjadi perubahan yang merugikan pada status pembayaran kelompok debitur, atau kondisi ekonomi nasional atau lokal yang berkorelasi dengan wanprestasi atas aset dalam kelompok. Bank dan entitas anak menggunakan perkiraan dalam menentukan jumlah dan waktu dari arus kas masa depan ketika menentukan tingkat penyisihan yang diperlukan. Estimasi tersebut didasarkan pada asumsi mengenai sejumlah faktor dan hasil aktual yang dapat berbeda, yang mengakibatkan perubahan terhadap jumlah penyisihan di masa yang akan datang.

Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Bank and its subsidiaries. Such changes are reflected in the assumptions when they occur.

Allowance for impairment losses of financial assets

In the calculation of allowance for impairment losses of financial assets, the specific condition of impaired counterparty is individually evaluated based on management's best estimate of the present value of the expected cash flows to be received. In estimating these cash flows, management makes judgements about the counterparty's financial situation and the net realizable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimated cash flows considered recoverable.

The Bank and its subsidiaries reviews its loan portfolio and receivables to assess impairment on an annual basis with updating provisions made during the intervals as necessary based on the continuing analysis and monitoring of individual accounts by credit officers.

In determining whether an impairment loss should be recorded in the consolidated statements of comprehensive income, the Bank and its subsidiaries make judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio.

This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a Bank and its subsidiaries, or national or local economic conditions that correlate with defaults on assets in the Bank and its subsidiaries. The Bank and its subsidiaries use estimates in the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting to future changes in the allowance.

Penurunan nilai untuk surat berharga

Bank dan entitas anak menentukan bahwa surat berharga memiliki kriteria penurunan nilai yang sama dengan aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Umur ekonomis dari aset tetap

Bank dan entitas anak memperkirakan masa manfaat aset tetap berdasarkan periode dimana aset diharapkan akan tersedia untuk digunakan. Masa manfaat ekonomis aset tetap ditinjau secara berkala dan diperbarui jika memiliki ekspektasi yang berbeda dari perkiraan sebelumnya, karena kerusakan secara fisik dan teknis, atau keusangan secara komersial dan legal atau batasan lainnya atas penggunaan aset tersebut. Selain hal tersebut, estimasi masa manfaat dari aset tetap didasarkan pada penilaian secara kolektif dengan menggunakan praktik industri, teknik evaluasi internal dan pengalaman dengan aset serupa.

Tetap dimungkinkan, bagaimanapun, bahwa hasil masa depan dapat secara material dipengaruhi oleh perubahan estimasi yang disebabkan oleh perubahan faktor-faktor tersebut di atas.

Jumlah dan saat pencatatan biaya untuk setiap periode akan dipengaruhi oleh perubahan dari faktor dan keadaan saat pencatatan. Pengurangan taksiran masa manfaat dari aset tetap akan meningkatkan beban operasional yang diakui.

Penurunan nilai aset non-keuangan

Bank dan entitas anak mengevaluasi penurunan nilai aset apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset tidak dapat dipulihkan kembali.

Faktor-faktor penting yang dapat menyebabkan penelaahan penurunan nilai adalah sebagai berikut:

- kinerja yang rendah secara signifikan jika dibandingkan dengan ekspektasi dari hasil operasi historis maupun proyeksi hasil operasi di masa yang akan datang;
- perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- industri atau tren ekonomi yang secara signifikan bernilai negatif.

Impairment of marketable securities

The Bank and its subsidiaries determine that securities are impaired based on the same criteria as financial assets carried at amortized cost.

Useful lives of premises and equipment

The Bank and its subsidiaries estimate the useful lives of premises and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of premises and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, estimation of the useful lives of premises and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets.

It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above.

The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of premises and equipment would increase the recorded operating expenses.

Impairment of non-financial assets

The Bank and its subsidiaries assess impairment on assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The factors that which could trigger an impairment review include the following:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- significant negative industry or economic trends.

Bank dan entitas anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai yang dapat dipulihkan. Jumlah terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurang biaya untuk menjual dengan nilai pakai aset (atau unit penghasil kas).

Jumlah terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

Pengakuan aset pajak tangguhan

Aset pajak tangguhan diakui untuk seluruh saldo rugi fiskal yang belum digunakan sejauh terdapat kemungkinan bahwa saldo rugi tersebut dapat dikompensasikan terhadap penghasilan kena pajak di masa yang akan datang. Pertimbangan manajemen yang signifikan diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan saat dan jumlah penghasilan kena pajak di masa mendatang seiring dengan strategi perencanaan pajak.

Bank dan entitas anak menelaah aset pajak tangguhan pada setiap tanggal laporan posisi keuangan konsolidasian dan mengurangi jumlah tercatat dalam hal tidak adanya lagi kemungkinan bahwa penghasilan kena pajak yang cukup akan tersedia untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan.

Pertimbangan signifikan diperlukan dalam menentukan provisi perpajakan

Bank dan entitas anak menentukan provisi perpajakan berdasarkan estimasi atas kemungkinan adanya tambahan beban pajak. Jika hasil akhir dari hal ini berbeda dengan jumlah yang dicatat semula, maka perbedaan tersebut akan berdampak terhadap laba/rugi.

Nilai kini atas kewajiban imbalan pasca kerja dan imbalan jangka panjang lainnya

Biaya atas kewajiban imbalan pasca kerja dan imbalan jangka panjang lainnya ditentukan dengan perhitungan aktuaris. Perhitungan aktuaris melibatkan penggunaan asumsi mengenai tingkat diskonto, tingkat pengembalian yang diharapkan dari aset, kenaikan gaji di masa depan, tingkat kematian dan tingkat kecacatan. Karena program tersebut memiliki sifat jangka panjang, maka perkiraan tersebut memiliki ketidakpastian yang signifikan.

The Bank and its subsidiaries recognize an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of an asset's (or Cash Generating Unit's) fair value less costs to sell and its value in use.

Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash generating unit to which the asset belongs.

Recognition of deferred tax assets

Deferred tax assets are recognized for all unused tax losses and credits to the extent that it is probable that taxable income will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

The Bank and its subsidiaries review their deferred tax assets at each consolidated statement of financial position date and reduce the carrying amount to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized.

Significant judgement is required in determining the provision for taxes

The Bank and its subsidiaries provides for tax provision based on estimates whether the additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the profit/loss.

Present value of post employment and other long term employment benefits

The cost of post employment and other long term employment benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and disability rate. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

- b. Berdasarkan kolektibilitas
Seluruh wesel ekspor dan tagihan lainnya
diklasifikasikan lancar pada tanggal 31 Desember
2021 dan 2020.

Manajemen berpendapat bahwa jumlah cadangan
kerugian penurunan nilai tidak diperlukan pada
tanggal 31 Desember 2021 dan 2020, karena
manajemen berkeyakinan bahwa wesel ekspor dan
tagihan lainnya dapat ditagih.

- b. *By collectibility*

Tabel di bawah ini menyajikan instrumen keuangan yang diakui pada nilai wajar berdasarkan hirarki yang digunakan untuk menentukan dan mengungkapkan nilai wajar dari instrumen keuangan:

- Tingkat 1: dikutip dari harga pasar aktif untuk aset atau liabilitas keuangan yang identik;
- Tingkat 2: yang melibatkan input selain dari harga pasar aktif yang dikutip yang termasuk dalam tingkat 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung (seperti harga) atau tidak langsung (turunan dari harga);
- Tingkat 3: input untuk aset dan liabilitas yang tidak didasarkan pada data yang dapat diobservasi di pasar (input yang tidak dapat diobservasi).

The tables below shows the financial instruments recognized at fair value based on the hierarchy used in determining and disclosing the fair value of financial instruments:

- Level 1: Quoted (unadjusted) prices in active markets for identical financial assets or liabilities;
- Level 2: Those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);
- Level 3: Those with inputs for the asset or liability that are not based on observable market data (unobservable inputs).

- (i) Nilai wajar aset dan kewajiban keuangan tertentu, kecuali kredit yang diberikan, surat-surat berharga, dan efek hutang yang diterbitkan, dan pinjaman yang diterima mendekati nilai tercatatnya karena mempunyai jangka waktu jatuh tempo yang singkat.

Estimasi nilai wajar terhadap aset keuangan tertentu ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa.

Estimasi nilai wajar terhadap kewajiban keuangan tertentu yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa.

- (ii) The fair values of certain financial assets and liabilities, except for loans, marketable securities, marketable securities issued, and borrowings, approximate their carrying values due to their short-term maturities.

The estimated fair values of certain financial assets are determined based on discounted cash flows using money market interest rates for instruments with similar credit risk and remaining maturities.

The estimated fair values of certain financial obligations which are not quoted in an active market are determined based on discounted cash flows using interest rates of instruments with similar remaining maturities.

- (ii) Kredit yang diberikan
Portofolio kredit secara umum terdiri dari kredit yang diberikan dengan suku bunga mengambang dan kredit yang diberikan dengan suku bunga tetap. Kredit yang diberikan dinyatakan biaya perolehan yang diamortisasi. Nilai wajar dari kredit yang diberikan menunjukkan nilai diskon dari perkiraan arus kas masa depan yang diharapkan akan diterima dengan menggunakan suku bunga pasar.

Nilai tercatat dari kredit yang diberikan dengan suku bunga mengambang dan pinjaman jangka pendek dengan suku bunga tetap adalah perkiraan yang layak atas nilai wajarnya.

- (iii) Surat-surat berharga
Nilai wajar untuk surat-surat berharga biaya perolehan yang diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dengan menggunakan metode penilaian internal.

- (iv) Efek hutang yang diterbitkan dan pinjaman yang diterima
Nilai wajar agregat dihitung berdasarkan model diskonto arus kas menggunakan tingkat suku bunga pasar untuk sisa periode jatuh temponya.

- (ii) Loans
The credit portfolio generally consists of loans with floating interest rates and short term loan with fixed interest rate. Loans are stated at amortized cost. The fair value of loans shows the estimated value of discounted future cash flows expected to be received using current market interest rates.

Carrying value of loans with floating interest rates and short-term loans with fixed interest rate are the reasonable estimate of fair values.

- (iii) Marketable securities
The fair value for marketable securities at amortised cost is determined based on market price or quoted price of broker/dealer. If this information is not available, fair value is estimated using quoted market prices of securities with similar credit maturity and yield characteristics or using internal valuation model.

- (iv) Debt securities issued and borrowings
The aggregate fair value is calculated based on discounted cash flow model using current market rate for the remaining period to maturity.

40. Imbalan Pasca Kerja dan Imbalan Jangka Panjang Lainnya

Bank dan entitas anak memberikan imbalan pasca kerja dan imbalan jangka panjang lainnya kepada para karyawannya yang memenuhi syarat yang terdiri dari program pensiun manfaat pasti, Tunjangan Hari Tua (THT), Penghargaan Masa Kerja (PMK), Masa Persiapan Pensiun (MPP) dan Cuti Besar.

Program pensiun manfaat pasti Bank untuk karyawan Bank yang diangkat sebelum tahun 2008 dikelola oleh Dana Pensiun Karyawan Bank Jabar, sedangkan untuk karyawan yang diangkat sejak tahun 2008 dikelola oleh DPLK Bank Jabar Banten. Program dana pensiun iuran manfaat yang terakhir ditetapkan berdasarkan Surat Keputusan Direksi No.0434/SK/DIR-HCA/2020 6 Juli 2020 tentang peraturan Dana Pensiun dari Dana Pensiun Bank Pembangunan Daerah Jawa Barat dan Banten yang telah disahkan dengan Keputusan Dewan Komisiner OJK No. Kep-154/NB.1/2020 tanggal 30 September 2020 tentang pengesahan atas peraturan Dana pensiun dari Dana pensiun Bank Pembangunan Daerah Jawa Barat dan Banten.

Program Tunjangan Hari Tua dikelola oleh Yayasan Kesejahteraan Pegawai Bank Jabar (YKP). Kontribusi pegawai adalah sebesar 5,00% dari penghasilan dasar pensiun (PhDP) karyawan dan sisa dana yang diperlukan untuk mendanai program tersebut dikontribusi oleh Bank. Imbalan THT berupa pembayaran jumlah *lump-sum* yang diberikan kepada karyawan yang memasuki usia pensiun atau berhenti bekerja oleh sebab lain yang diatur dalam Surat Keputusan Direksi No. 150/SK/DIR-SDM/1999 tanggal 1 Desember 1999 yang terakhir diubah dengan Surat Keputusan Direksi No. 03/SK/DIR-SDM/2011 tanggal 3 Januari 2011 tentang Peraturan Tunjangan Hari Tua PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk.

Program Penghargaan Masa Kerja dikelola sendiri oleh Bank dan entitas anak dan diatur berdasarkan Surat Keputusan Direksi Nomor 0500/SK/DIR-HCA/2021 tanggal 14 Juli 2021 tentang Perubahan atas Surat Keputusan Direksi Nomor 0303/SK/DIR-HCA/2021 tanggal 15 April 2021 tentang Standar Operasional dan Prosedur Pengelolaan Penghasilan dan Fasilitas Kepegawaian. Imbalan PMK berupa pembayaran yang jumlahnya sebesar 2 kali penghasilan dan 3 kali penghasilan yang besarnya ditentukan dari *single salary* kepada pegawai dengan masa kerja 15 tahun dan 25 tahun dengan syarat hasil penilaian kinerja dua tahun terakhir berpredikat baik.

Program Masa Persiapan Pensiun dikelola sendiri oleh Bank dan merupakan program imbalan kerja bagi karyawan yang akan memasuki masa pensiun.

Berdasarkan Addendum Perjanjian Kerjasama No. 077/PKS/DIR-HC/2017 fasilitas Masa Persiapan Pensiun yang sebelumnya diberikan menjadi dihapuskan, dengan ketentuan khusus bahwa kepada pegawai yang berusia 50 (lima puluh) tahun atau lebih tetap diberikan Masa Persiapan Pensiun selama 12 (dua belas) bulan sejak pegawai memasuki usia 54 (lima puluh empat) tahun. Namun untuk pegawai yang menginginkan tetap bekerja, dapat mengajukan permohonan kepada Bank untuk tidak melaksanakan Masa Persiapan Pensiun.

memastikan kemungkinan kerugian dari tidak dibayarnya pinjaman yang diberikan menjadi seminimal mungkin, baik untuk debitur individual maupun secara keseluruhan.

Sistem dan prosedur kredit Bank dan entitas anak telah dibakukan untuk menjamin diterapkannya kebijakan dan pelaksanaan pemberian pinjaman secara konsisten. Untuk kredit produktif, Bank dan entitas anak menggunakan model *Internal Credit Risk Rating* untuk menganalisis risiko bisnis dan finansial dari debitur secara objektif dan memberikan *rating* kepada nasabahnya. Selain itu, Bank dan entitas anak juga menggunakan *Credit Risk Capital Allocation and Pricing* untuk mengkuantifikasi risiko kredit dan menentukan harga yang sesuai berdasarkan risiko kredit.

Untuk kredit konsumtif maupun produktif, Bank dan entitas anak menggunakan model *Internal Credit Scoring* untuk menganalisis dan menghitung risiko dari pemberian kredit kepada konsumen.

Dalam rangka menerapkan prinsip pemberian kredit yang sehat, Bank dan entitas anak menerapkan prinsip *Four Eyes* (pengambilan keputusan kredit yang dilakukan oleh dua orang atau lebih) pada setiap kantor cabang dengan penggunaan *Credit Scoring* dan *Credit Reviewer*.

Berikut ini adalah rasio kredit bermasalah/*non-performing loans* (NPL) tidak termasuk pembiayaan syariah dan rasio kualitas aset produktif Bank dan entitas anak (konsolidasian):

	31 Desember/ December 31, 2021	31 Desember/ December 31, 2020	
Rasio NPL-bruto	1,32%	1,44%	NPL ratio - gross
Rasio NPL-neto	0,47%	0,44%	NPL ratio - net
Rasio kualitas aset produktif (tidak diaudit)	0,95%	1.05%	Earnings assets quality ratio (unaudited)

Rasio kualitas aset produktif merupakan rasio aset yang diklasifikasikan sebagai *non-performing* dibandingkan dengan jumlah aset produktif.

Sistem pengelolaan manajemen risiko kredit Bank dan entitas anak telah dibakukan dalam suatu ketentuan dan dikaji secara periodik.

- (i) Analisis eksposur maksimum terhadap risiko kredit setelah memperhitungkan dampak agunan dan mitigasi risiko kredit lainnya:

Nilai tercatat dari aset keuangan Bank selain kredit yang diberikan dan efek-efek yang dibeli dengan janji dijual kembali menggambarkan eksposur maksimum atas risiko kredit.

potential losses from default loans are minimized, both for individual borrowers and the overall portfolio.

The Bank and its subsidiaries' credit system and procedures have been formalized to ensure consistent implementation and policy in credit approval. For productive loans, the Bank uses the Internal Credit Risk Rating model to analyze the business and financial risks of debtors objectively and to give ratings to debtors. In addition, the Bank and its subsidiaries also use Credit Risk Capital Allocation and Pricing in quantifying credit risk and determining the appropriate pricing.

For both consumer loans and productive loans, the Bank and its subsidiaries uses the internal Credit Scoring model to analyze and calculate the credit risk for consumer.

To implement a healthy credit granting process, the Bank and its subsidiaries apply the Four Eyes Principle (credit decision-making by two persons or more) at each branch office by using Credit Scoring and Credit Reviewer.

The following are the non-performing loans (NPL) ratios not include sharia financing and the earnings asset quality ratio of the Bank and its subsidiaries (consolidated):

Earnings asset quality ratio is the ratio of assets classified as non-performing to total earning assets.

The Bank and its subsidiaries credit risk management system has been standardized in the Bank's Guidelines (PP) and reviewed periodically.

- (i) *Analysis on maximum exposures against credit risks after considering the impact of collateral and other credit risks mitigation:*

The carrying value of the Bank's financial assets other than loans and marketable securities purchased under agreement to resell represents its maximum exposure to credit risk.

Bank menetapkan jenis dan nilai agunan yang dijamin sesuai skema kredit dan perkiraan tingkat risiko kredit dari *counterparty* sebagai *second way out* yang ditetapkan. Jenis dari agunan terdiri dari:

- Physical collateral*, berupa tanah dan bangunan;
- Financial collateral*, berupa simpanan (tabungan, giro dan deposito), surat berharga, dan lain-lain;
- Lainnya berupa garansi, lembaga penjamin, dan lain-lain.

The Bank determined the type and value of collateral according to the loan scheme as well as estimated credit risk level from the counterparty as a determined second way out. The types of collateral are as follows:

- Physical collateral*, such as land and buildings;
- Financial collateral*, such as third party funds (saving deposits, current accounts, and time deposits), securities, etc;
- Others, such as guarantees, guarantee institution, etc.

Pemberian kredit yang dilaksanakan oleh Bank diatur dalam kebijakan dan prosedur perkreditan dimana untuk setiap jenis atau skema kredit telah ditentukan agunan minimal yang harus dipenuhi.

The loan granting conducted by the Bank is stipulated in the loan policy and procedure in which every loan type or scheme has minimum determinable collaterals that should be fulfilled.

Untuk segmen kredit komersial, sesuai ketentuan perkreditan wajib dijamin oleh agunan yang memadai. Agunan dapat berupa *physical collateral*, *financial collateral* atau lainnya berupa tagihan usaha atau garansi. Untuk seluruh agunan khususnya *physical collateral* akan dilakukan taksasi yang akan dipergunakan dalam menentukan kecukupan nilai agunan (*coverage ratio*).

For commercial loans segment, according to the loan policy has to be collateralized adequately. The collaterals can be physical collateral, financial collateral or others such as accounts receivable or guarantees. All collaterals particularly for physical collateral will be assessed in which the collateral's liquidation value will be use in determining the coverage ratio.

Selain aspek agunan untuk meminimalkan risiko kredit, pemberian kredit oleh Bank selalu dilakukan berdasarkan evaluasi dan analisis kelayakan sehingga kemampuan pengembalian kredit (*first way out*) dapat dipastikan.

In addition collateral aspect to minimize credit risk, loan granting is conducted based on evaluation and feasibility analysis so that the loan repayment ability (*first way out*) can be ascertained.

Adanya keharusan bagi debitur untuk memenuhi agunan yang dipersyaratkan, evaluasi atas kelayakan kredit, pengikatan kredit secara legal dan prosedur *pre screening* akan menurunkan eksposur risiko kredit Bank ke tingkat yang layak dan dapat diterima.

The necessity for debtors to comply with collaterals requirement, loan feasibility evaluation, notarial agreement and pre screening procedures will decrease the Bank's credit risk exposure to the acceptable level.

46. Risiko Nilai Tukar

Risiko nilai tukar timbul sebagai kerugian yang ditimbulkan oleh posisi terbuka neto valuta asing pada sisi aktiva, sisi pasiva ataupun rekening administratif akibat perubahan nilai tukar valuta asing. Kegiatan perdagangan mata uang asing meliputi transaksi nilai tukar valuta asing *spot*, *forward*, *swap*, *interest rate swap* dan *cross currency swap*.

Penerapan manajemen risiko nilai tukar yang dijalankan oleh Bank dan entitas anak adalah dengan melakukan pengukuran, pemantauan, dan pengendalian risiko nilai tukar secara berkala baik secara *bankwide* maupun parsial. Secara *bankwide*, bank melakukan pengukuran risiko nilai tukar melalui simulasi *value at risk* (*var*) dengan berbagai metode (*Variance Covariance & Historical*) yang disesuaikan dengan karakteristik transaksi.

Pemantauan risiko nilai tukar dilakukan melalui pemantauan Posisi Devisa Neto (PDN) dan sebagai bentuk pengendalian risiko nilai tukar, bank membuat limit internal PDN baik untuk neraca maupun secara keseluruhan sebagai bentuk *risk tolerance* bank dalam menghadapi risiko nilai tukar. Sedangkan, penerapan manajemen risiko nilai tukar bank secara parsial pada aktivitas tresuri adalah melalui pengukuran & pengendalian *budget loss limit & open position* untuk setiap transaksi nilai tukar dan sebagai bentuk pemantauan risiko nilai tukar, bank melakukan pelaporan transaksi tresuri sesuai dengan ketentuan secara periodik untuk memastikan bahwa *exposure* yang timbul oleh pergerakan nilai tukar berada pada batas yang telah ditentukan oleh ketentuan internal Bank dan sesuai dengan ketentuan regulasi Bank Indonesia.

46. Foreign Exchange Risk

Foreign exchange risk arises as losses arising from net open positions of foreign exchange on assets, liabilities or administrative accounts due to changes in foreign exchange rates. Foreign exchange trading activities include *spot*, *forward*, *swap*, *interest rate swaps* and *foreign exchange transactions cross currency swap*.

Implementation of forex risk management in the Bank and its subsidiaries through a measurement, monitoring, and controlling of foreign exchange risk periodically both partial and comprehensive. Comprehensively, bank measure foreign exchange risk through value at risk simulation with several methods (*Variance Covariance & Historical*) and adjusted to characteristic of transactions.

Bank monitor foreign exchange risk through monitoring of Net Open Position (NOP) and intraday and for a foreign exchange risk control, bank establish internal limit of NOP both on balance sheet and overall as risk tolerance to foreign exchange risk. Meanwhile, implementation of forex risk management partially on treasury activities is performed through measurement & control of budget loss limit & open position for every transaction and for monitoring, bank create Treasury transactions Report periodically to ensure that exposure arise from foreign exchange risk is at the limit which has been specified by the internal bank dan Bank Indonesia Regulations.

47. Risiko Likuiditas

Risiko akibat ketidakmampuan Bank dan entitas anak untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank dan entitas anak. Besar kecilnya risiko likuiditas ditentukan antara lain:

- Kecermatan dalam perencanaan arus kas atau arus dana berdasarkan prediksi pembiayaan dan prediksi pertumbuhan dana, termasuk mencermati tingkat fluktuasi dana;
- Ketepatan dalam mengatur struktur dana termasuk kecukupan dana;
- Ketersediaan aset yang siap dikonversikan menjadi kas;
- Kemampuan menciptakan akses ke pasar antar bank atau sumber dana lainnya, termasuk fasilitas *lender of last resort*.

47. Liquidity Risk

Risk due to the inability of the Bank and its subsidiaries to fulfill maturing obligations from cash flow funding sources and/or from high-quality liquid assets that can be pledged, without disrupting the activities and financial condition of the Bank and its subsidiaries. The size of the liquidity risk is determined, among others:

- Accuracy in cash flow or flow of fund planning based on financing and fund growth prediction, include observe the fund rate volatility;
- The precision in managing the fund structure, including the adequacy of funding;
- The availability of asset that is ready to be converted into cash;
- Ability to create access to the interbank market or other funding sources, including the lender of last resort facilities.

Apabila kesenjangan tersebut cukup besar maka akan menurunkan kemampuan Bank dan entitas anak untuk memenuhi kewajibannya pada saat jatuh tempo. Oleh karena itu untuk mengantisipasi terjadinya risiko likuiditas, maka diperlukan manajemen likuiditas, yang merupakan bagian dari pengelolaan liabilitas.

Kebijakan likuiditas Bank dan entitas anak ditujukan untuk memastikan bahwa kebutuhan dana dapat dipenuhi, baik untuk membayar kewajiban pada saat jatuh tempo atau untuk memenuhi fasilitas kredit yang belum digunakan.

Penerapan manajemen risiko likuiditas diantaranya melalui pengelolaan dan pemantauan posisi likuiditas Bank dan entitas anak berada dalam tanggung jawab Bagian Manajemen ALM & Likuiditas di Divisi *Treasury* sedangkan pengukuran serta analisa terhadap risiko likuiditas menjadi tugas Divisi Manajemen Risiko diantaranya *stress test* likuiditas berdasarkan tiga skenario dan pembuatan profil risiko yang terkait risiko likuiditas, selain itu bank telah melakukan perhitungan Basel III terkait risiko likuiditas yaitu perhitungan *Net Stable Funding Ratio* (NSFR) dan *Liquidity Coverage Ratio* (LCR).

Pengelolaan kelebihan dana likuiditas yang tidak terserap penyaluran kredit, teroptimisasi melalui pengelolaan *treasury*.

Sebagian besar kelebihan dana likuiditas tersalurkan melalui instrumen-instrumen yang berjangka pendek dan aman. Umumnya, kondisi likuiditas bank terjaga baik dimana penarikan dana nasabah dapat terpenuhi sekaligus kelebihan dana teroptimalkan dengan imbal hasil yang optimal.

Sumber dana dan waktu jatuh tempo deposito dikelola untuk menghindari adanya dana yang *idle* dan menentukan jumlah serta instrumen aset likuid yang tepat untuk menjamin tingkat likuiditas yang terkendali secara terus menerus.

Tabel berikut ini menggambarkan analisis jatuh tempo aset dan liabilitas keuangan Bank dan entitas anak dihitung berdasarkan sisa periode jatuh tempo kontrak pada tanggal laporan posisi keuangan konsolidasian:

If the gap is large enough it will reduce the Bank and its subsidiaries' ability to meet its liabilities at maturity. Therefore, liquidity management is needed to anticipate liquidity risk, which is a part of the management liability.

The Bank and its subsidiaries' liquidity policies are aimed to ensuring that fund requirements can be fulfilled, either to pay time deposits at maturity or to fulfill unused loan facility.

The application of liquidity risk management includes managing and monitoring the Bank and its subsidiaries' liquidity position in the responsibility of the ALM Management & Liquidity Division in the Treasury Division while measuring and analyzing liquidity risk is the task of the Risk Management Division including stress test liquidity based on three scenarios and risk-related risk profiles liquidity, in addition banks have made Basel III calculations related to liquidity risk, namely the calculation of Net Stable Funding Ratio (NSFR) and Liquidity Coverage Ratio (LCR).

Managing the excess of liquidity fund, which are not absorbed by loans, disbursement will be optimized through managing treasury.

Most of the excess of liquidity will be placed in short-term and secured instruments. In general, the Bank and its subsidiaries' liquidity condition is well maintained where the customers withdrawal can be fulfilled while the excess fund can be optimized with optimum return.

Sources of funds and maturity dates of time deposits are managed to avoid idle funds and determine the appropriate liquidity level and liquid asset instrument to ensure a sustainable liquidity level.

The following tables illustrate the maturity profile analysis of the Bank and its subsidiaries' financial assets and liabilities according to their remaining maturity period at the consolidated statement of financial position date:

Bank dan entitas anak melakukan pengukuran risiko suku bunga meliputi penilaian risiko suku bunga yang melekat pada aset, kewajiban dan pada posisi *off balance sheet*; penggunaan konsep keuangan yang berlaku secara umum dan teknik-teknik manajemen risiko; asumsi dan parameter yang terdokumentasi dan dievaluasi secara berkala; terintegrasi dengan proses manajemen risiko secara rutin baik dari aspek pengambilan keputusan, struktur *governance* maupun proses alokasi modal internal. Dengan menggunakan metodologi tersebut, Bank dan entitas anak dapat mengidentifikasi risiko suku bunga dari portofolio aset dan kewajiban yang sensitif terhadap perubahan suku bunga serta menentukan besaran risiko terhadap Bank dan entitas anak.

Tabel di bawah ini menyajikan informasi mengenai tingkat suku bunga rata-rata per tahun untuk aset dan liabilitas keuangan yang penting untuk tahun yang berakhir pada tanggal 31 Desember 2021 dan 2020 (tidak diaudit):

The Bank and its subsidiaries conduct measurement of interest rate risk that includes assessing inherent interest rate risk in asset, liabilities and off balance sheet positions; implementation of the generally applicable financial concept and risk management techniques; assumptions and parameters which are documented and evaluated regularly; integrated with periodic risk management process either from the aspect of decision making, governance structure or internal capital allocation process. By using such methodologies, the Bank and its subsidiaries can identify interest rate risk of asset and liabilities portfolio that are sensitive to interest rate changes and determine the risk scale for the Bank and its subsidiaries.

The following table presents information on the average annual interest rates for significant financial assets and liabilities for the year ended December 31, 2021 and 2020 (unaudited):

i. Risiko tingkat suku bunga

Analisis sensitivitas untuk beberapa faktor pasar menunjukkan bagaimana laba rugi dan ekuitas dapat dipengaruhi oleh perubahan dari beberapa faktor risiko sesuai dengan tabel dibawah ini. Secara umum, sensitivitas diestimasi dengan membandingkan suatu nilai awal ke nilai tertentu setelah perubahan tertentu dari faktor pasar, dengan mengasumsikan seluruh variabel lainnya tetap. Sensitivitas atas laporan laba rugi merupakan efek atas perubahan estimasi suku bunga atas laba rugi untuk suatu periode, berdasarkan nilai suku bunga mengambang atas aset dan liabilitas yang diperdagangkan dan tidak diperdagangkan yang dimiliki Bank dan entitas anak. Analisis sensitivitas atas laporan laba rugi komprehensif konsolidasian dihitung dengan menilai kembali perubahan estimasi suku bunga tetap atas aset keuangan yang tersedia untuk dijual. Jumlah sensitivitas atas laporan laba rugi komprehensif konsolidasian didasarkan pada asumsi bahwa terdapat perubahan paralel dalam kurva penghasilan.

Tabel di bawah ini menunjukkan sensitivitas dari laporan laba rugi komprehensif konsolidasian Bank dan entitas anak terhadap kemungkinan perubahan wajar atas suku bunga untuk aset dan liabilitas keuangan dengan suku bunga tetap pada tanggal 31 Desember 2021 dan 2020 (tidak diaudit):

i. Interest rate risk

Sensitivity analysis for several market factors showing how profit or loss and equity could be affected by changes in the relevant risk factor are in the following tables below. In general, sensitivity is estimated by comparing an initial value to the value derived after a specified change in the market factor, assuming all other variables are constant. The sensitivity of the statement of income is the effect of the assumed changes in interest rates on the profit or loss for a period, based on the floating rate trading and non-trading financial assets and liabilities held by the Bank and its subsidiaries. The sensitivity of the consolidated statement of comprehensive income is calculated by revaluing fixed rate available-for-sale financial assets for the effects of the assumed changes in interest rates. The total sensitivity of the consolidated statement of comprehensive income is based on the assumption that there are parallel shifts in the yield curve.

The table below demonstrates the sensitivity of the Bank and its subsidiaries' consolidated statement of income and statement of comprehensive income to reasonably possible changes in interest rates for fixed rate financial assets and liabilities as of December 31, 2021 and 2020 (unaudited):

55. Perkembangan Kondisi Ekonomi di Indonesia

Pada awal tahun 2020, Badan Nasional Penanggulangan Bencana Republik Indonesia mengumumkan berlakunya "Status Keadaan Tertentu Darurat Bencana Wabah Virus Corona." Wabah virus corona menjadi pandemi global yang berdampak terhadap perekonomian Indonesia dan dunia, antara lain ditandai dengan melemahnya nilai tukar Rupiah dan menurunnya harga-harga sekuritas di pasar modal.

Resolusi dari dampak ekonomi Indonesia ini, banyak tergantung dari kebijakan fiskal dan moneter yang akan ditempuh oleh Pemerintah Republik Indonesia dan otoritas, yang merupakan suatu tindakan yang berada diluar kendali Bank dan entitas anak. Oleh karena itu, tidaklah mungkin untuk menentukan dampak masa depan kondisi ekonomi terhadap likuiditas dan pendapatan Bank dan entitas anak dan realisasi dari aset, termasuk pengaruh dari nasabah, kreditur, pemegang saham

55. Indonesia's Economic Condition

In early 2020, National Agency for Disaster Management of the Republic of Indonesia announced the enactment of "Status of the Certain Disaster Emergency Conditions Due to Corona Virus Pandemic". The corona pandemic, that become global pandemic may had impacted domestic economy, which was characterized by weakening of the rupiah exchange rate and decline in the prices of securities on the capital market.

The resolution of Indonesia economic is dependent to a large degree on any fiscal and monetary measures that may be taken by the Government of Republic of Indonesia and the authority, an action that is beyond the Bank and its subsidiaries' control. Therefore, it is not possible to determine the impact of future economics condition to the Bank and its subsidiaries' liquidity and earnings, asset realization, effect from customers, debtors, shareholders, and other stakeholders. The effects
